THE BEST

It all began a few years back with a tank battle game from Atari. Since then, the video game market has exploded, growing to include so many games that arcades the size of department stores have opened. Asteroids, Missile Command, Defender, and Space Invaders led the first wave of the video game craze. Lately, Pac-man, Robotron, Donkey Kong, and Tron captured the imaginations of chronic gamers, promising a second generation of coin-operated excitement.

Everyone from businessmen in three piece suits to 10 year old kids in cut-off jeans feed the arcade machines change, enjoying the spectacles of computerized graphics, unearthly sound effects, and multi-levered controls. High School students rank among the most avid fanatics.

'82 - '83 is the year of the video game. Who knows how long this fad will last? Whatever happens, no one can afford to miss the newest video spectacle on the market - Artisan '83' - The Best Game in Town.

THE GAME OF:

The coronation ceremony for Curt Drezek and Diane Kurtz along with the presentation of corsages to Mr. and Mrs. Dusold on their 33rd wedding anniversary highlighted Tech's 1982 prom.

The preparations for the last dance of the year really started in early September, when the senior council began selling donuts and orange juice in the mornings to help finance the Prom. The dinner and dance at the Marc Plaza Hotel only cost Tech couples $28 apiece. "There is no way a prom could be that cheap today without the extra money from donuts," commented Ms. Holzman, prom advisor.

196 couples attended the May 7th event, the largest of any school in the Milwaukee area. After the dinner, which started at 8:00, "a lot of people left before the dancing began," commented Jeff Hein. A local band, Brio, performed till 1:00, helping many Techites to discover this year's theme: "Paradise In Your Eyes". Some promgoers felt there was room for improvement, though, as Nancy Kurtz noted, "It was well organized but also boring. The dance floor was too small to dance on."

Before enjoying a delicious meal, courtesy of the Marc Plaza, these promgoers take time out for a picture.

Luis Cerrillo and his date having fun with a nice fast dance.

ONE LAST DANCE

Prom court included: From top: Christine Wojciechowski and Mike Ackerman, Cathy Wojciechowski and Doug Kissinger, Jane Zube and Tom Jesmok, Clark Stream and Date, Frank Richards and Date, Diane Hardy and Doug Bart, Lisa Pawlak and Mike Gallow, Dolores Anderson and Melvin Sumlin, Donna Monroe and Duane Edwards, Diane Kurtz and Dave Sliwinski, Michele Champeau and Kurt Drezek.

After the crowning of the King and Queen, Kurt Drezek and Diane Kurtz enjoyed a dance.

The old head on the shoulder method always does the trick as Norman Kopp and Terry Grote show.

THE GAME OF CELEB

The Trojan defense mangled Madison, only allowing them 16 total yards, while Tech's offense went on a scoring spree, stacking up 32 points before the end of Tech's homecoming game. Later, Jim Gorecki and Nina Perkins reigned over a joyful homecoming celebration.

Tech scored three times during the game: a safety in the early going, a 15 yard run by Glenn Patrick, and a 75 yard punt return by Fred Bobo. Madison was able to return a kickoff for their only points of the first half. Just into the seond half, Fred Bobo took an interception into the end zone, giving Tech 6 more points. Jim Gorecki kicked a 32 yard field goal and Glenn Patrick scored again on a 4 yard run before Madison struck back with a touchdown. The Trojans emerged victorious, 32 - 13.

A penalty elimated an 85 yard touchdown run late in the first half, robbing Tech of another 7 points. The Trojans played a tough game despite the rain that fell periodically during the contest. As usual, the cheerleaders inspired the mass of Trojan fans, interrupted only by several purple mice which mysteriously sailed out of the stands.

Later, the victorious Trojans assembled in the Tech gym to celebrate. Steve Hegwood, famous DJ from WLUM, kept the party alive for the second year in a row.

During the Homecoming Dance King Jim Gorecki and Queen Nina Perkins shared a smile and a dance.

Senior fullback Danny Foster gains some yardage against Madison.

After the game this young couple enjoys a nice slow dance.

RATING A VICTORY

Captain of the cheerleaders, Jeanne Brahm sums up Tech's homecoming with one gesture.

After making a fine catch, senior James Wilson struggles for more yardage.

Steve Tarantino and date take time out from their dancing for a picture.

Homecoming Court included: Nancy Kurtz and James Wierzelewski, Lisa Hagen and Doug Korducki, Laurel Wozniak and Jim Gorecki, Nina Perkins and Jerome Tally, Ann Drewek and Jim Sarandos, Dan Foster and Julie Landry, Carlean Ward and Glen Patrick.

THE GAME OF:

Two floors away and you can already smell it - the school lunch. Should you tempt fate and sample it? Do you have a death wish or a stomach of steel? If so, the lunch line awaits you.

You start by standing behind some other unfortunate person, slowly moving forward. Finally, you can pick up a tray. It's too late to turn back now.

Grab a warm milk and keep moving. Pick up your plate of ... something, an unidentified vegetable (it's greenish color gives it away), and tater tots, five as usual. If anyone ever gets six, a major food fight breaks out, so everyone receives five.

While waiting to move on, you try to identify the "distinctive aroma" coming from the main dish. Could it be leftover hamburger and fish mix? Maybe its mock chicken? Don't forget your cookie. If you can't eat it, you can always use it for a frisbee. Finally, find a place to sit and dig in.

Now, you're ready for the test. Take your fork and ... what, the prongs melted off your fork? Don't worry, just get another one. Then get some on your fork. That's right, it goes in your mouth. Chew thoroughly, removing all bones, and swallow. Hey ... what's the matter? Green just doesn't look good on you. What's that? Yeah, I'm sure I can find someone selling candy.

Assistant Principal Mrs. Hatton tells a student the "advantages" of eating in the cafeteria.

Lee Dancik, Tad Powalisz, Chris Hartzheim, Dan Gradecki and Jim Pinkowski enjoy a lunch hour outside.

SURVIVING LUNCH

This brave student, Ken Kaszuba, digs right in to another school lunch.

One place to go for lunch is the Box, across the street from Tech.

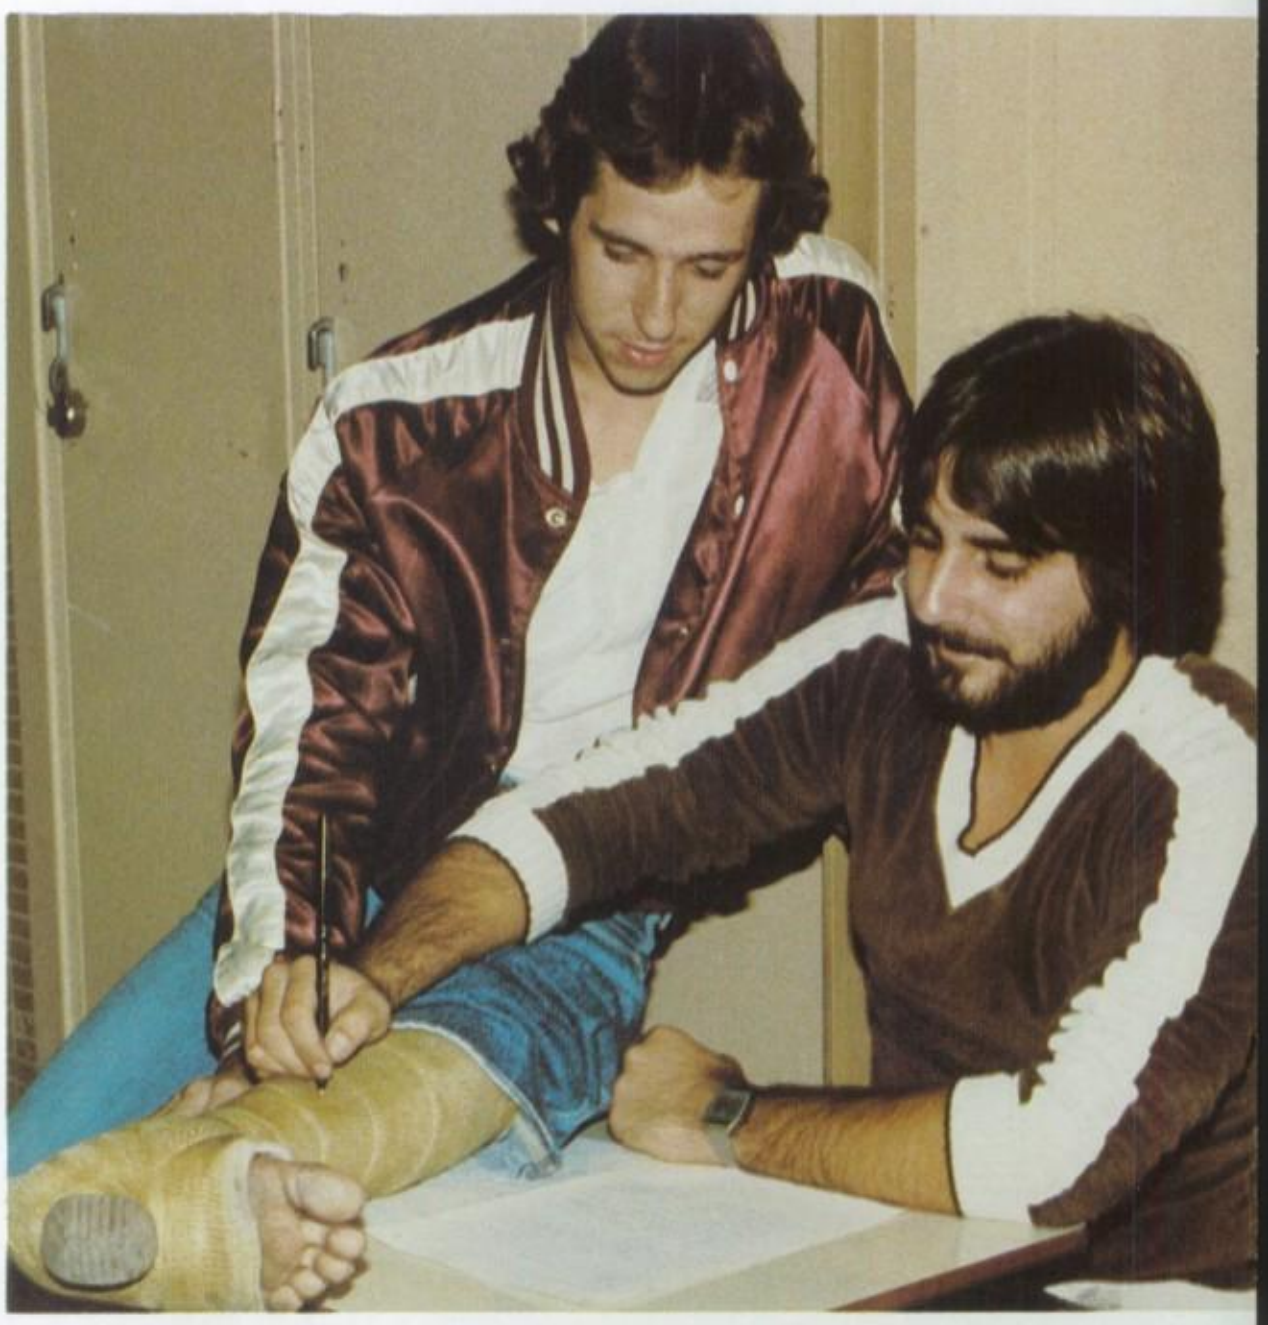
Joe Blandino and Dan Bart need a few milks to get the cafeteria lunch down.

THE GAME OF:

To most students, school means work. This work could range from watching the Brewer's for Sociology to naming organic compounds for Chemistry II, to finishing a project in Cabinet Shop. But not one Techite spends the whole day working.

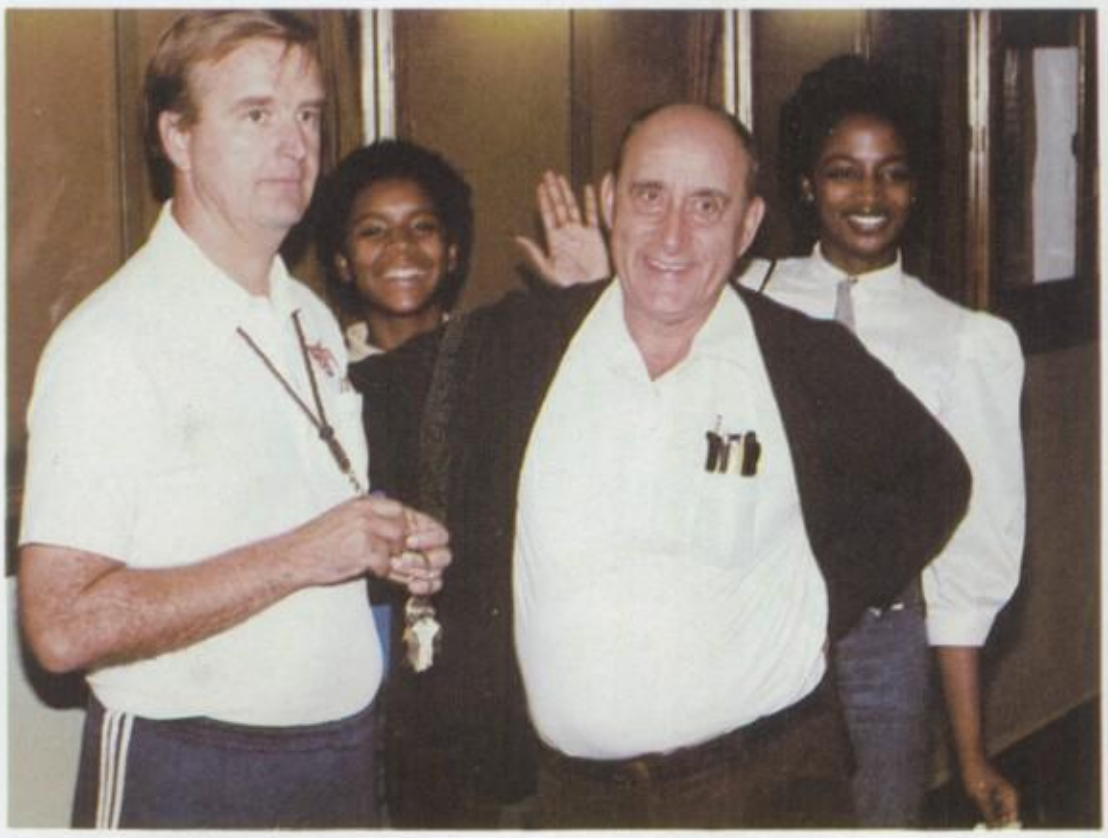
What do kids do the rest of the time? Goof-off, of course. Some start an eraser fight in math class. Others could play cards in the lunchroom, but everyone has his own favorite way of making school worthwhile. Some seniors, mainly the 9 ft. tall type, even enjoy putting "freshies" in garbage cans or helping them out by loaning them a little shaving cream or perfume.

If school wasn't a good place to have fun with friends, wouldn't a lot more people drop out?

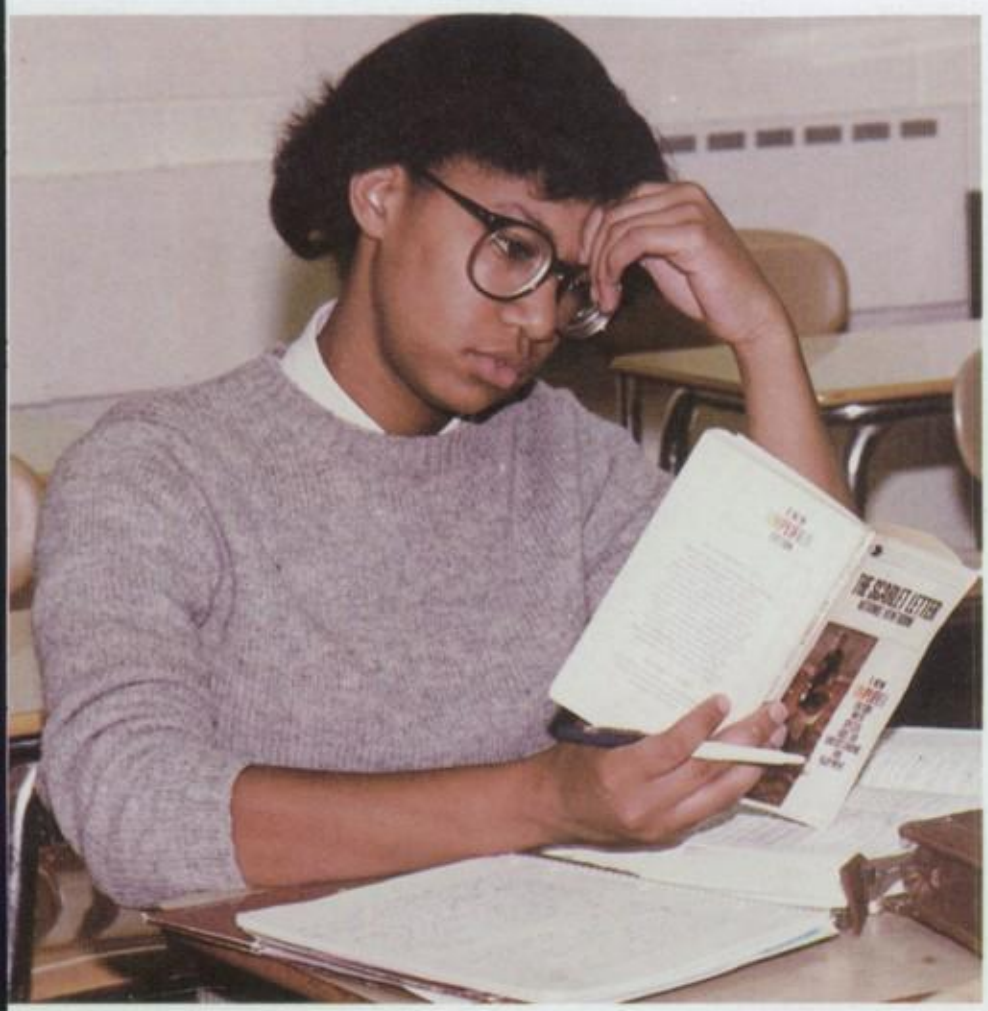


Senior Kurt Verbunker helps out Brian Swartwout by signing his cast.

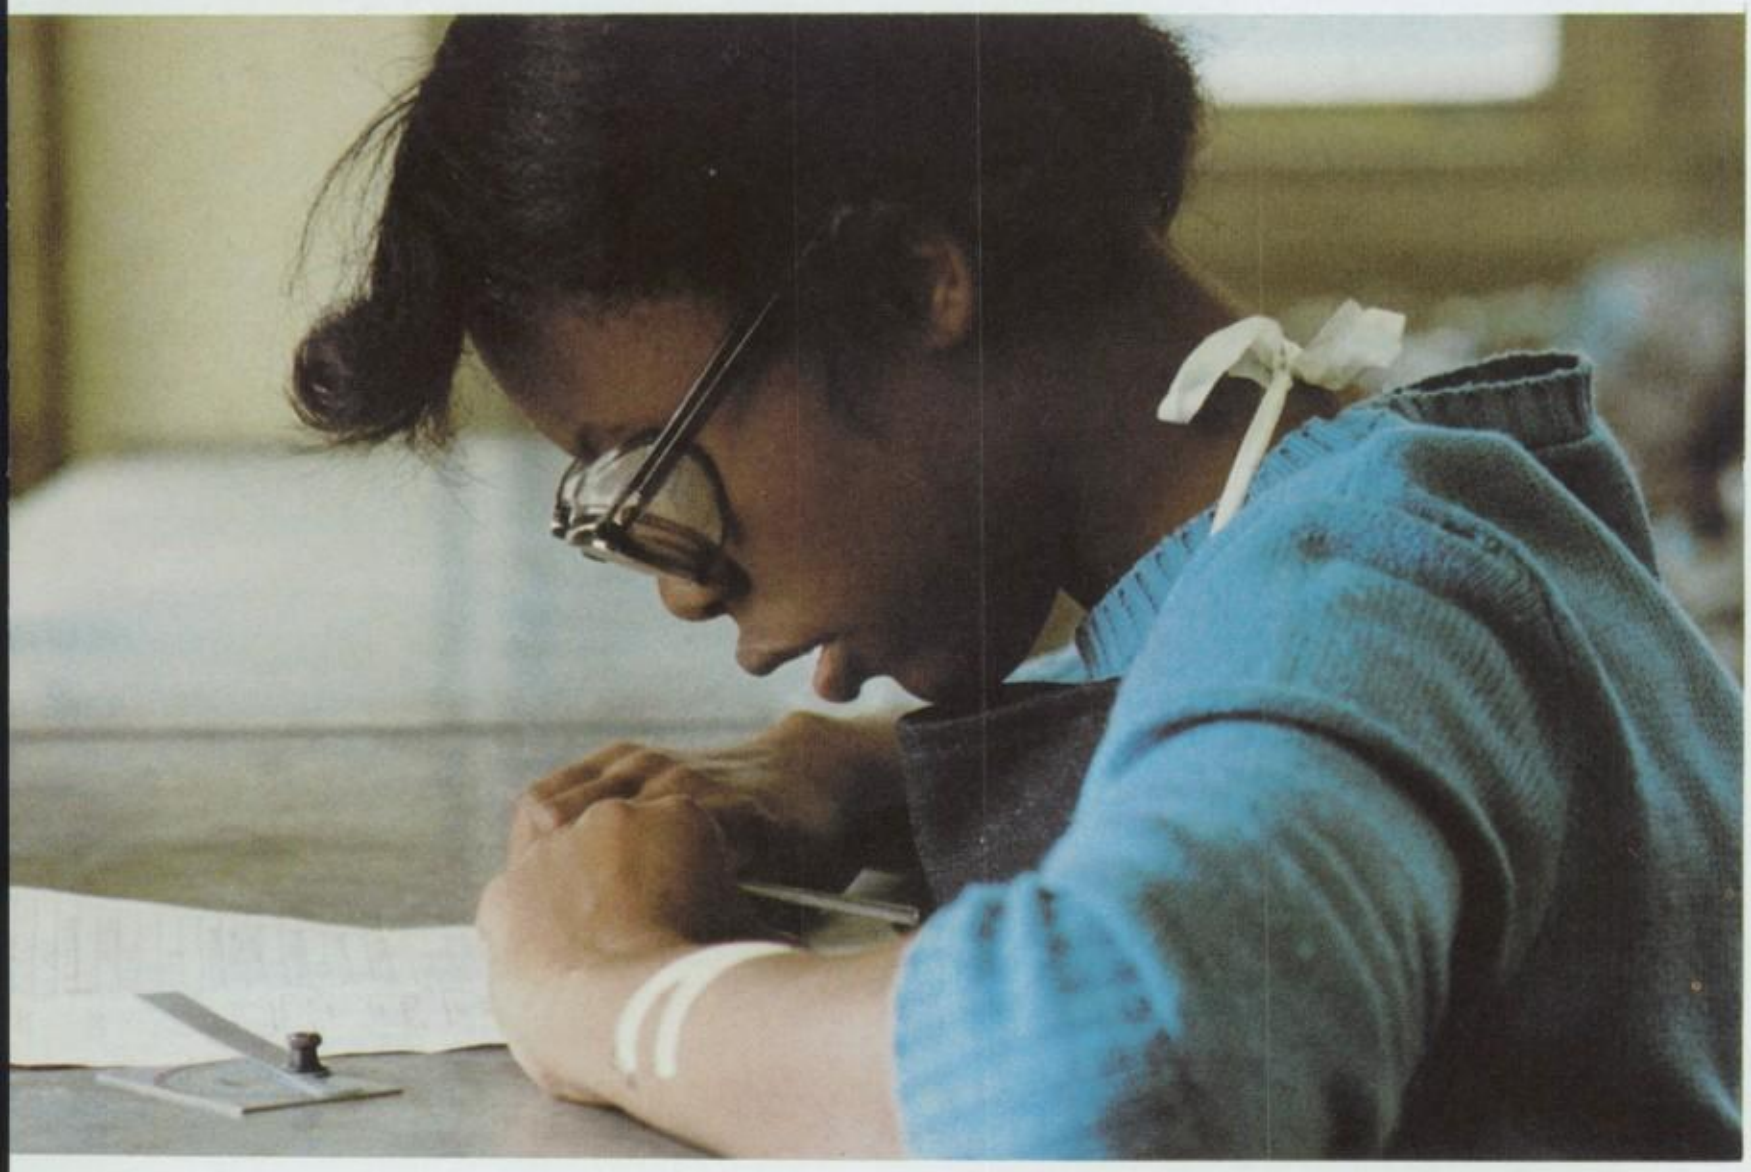
Look behind you Mr. Borowicz and Mr. Skaros, Patrina Wilson and Veanetta Harrell are sneaking up.
Sophomore Victor Drake is all smiles.



LIFE IN SCHOOL



Senior Dolores Martin hard at work, reading *The Scarlet Letter.*
Angela Kelly carefully scans over her next project.
Taking a break from welding is Todd Matousek.



THE GAME OF:

Who really wants to get up early and go to school? Most Techites don't, and they find some very different ways to make mornings at Tech worth their while.

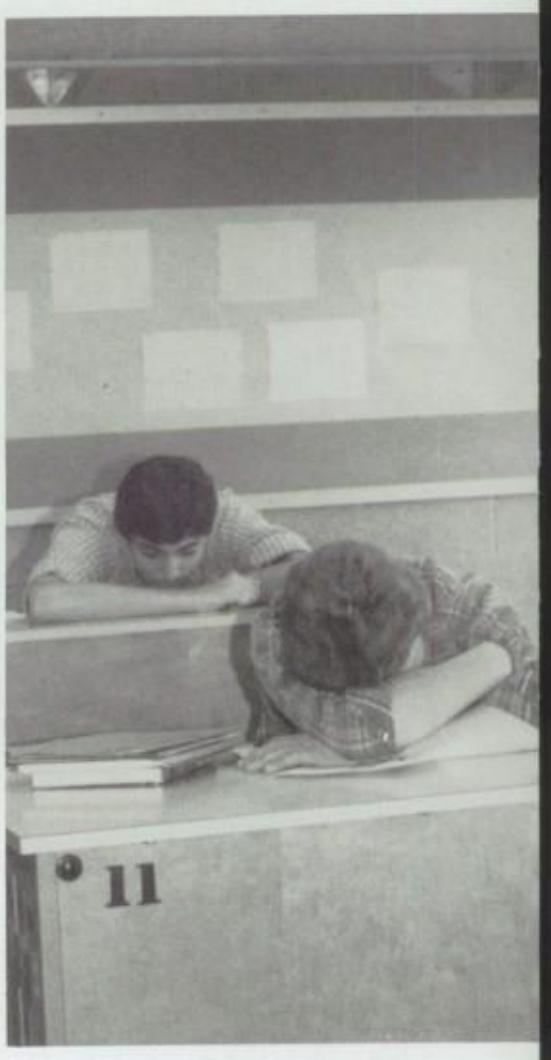
Many people, able to drag themselves out of bed early, gather in the cafeteria before school. Whether they come to munch out on donuts and orange juice, to serve a detention, or to have a good time with their friends, they always seem to fill up the lunchroom.

Other students, not wanting to get up so early, prefer to hang around the outside of Tech. They meet a group of friends, listen to a radio, smoke one last cigarette, or just wait for the doors to open.

Some Trojans even get up early to work. The Math Club always meets before school. The weightroom also opens its doors before the 7:30 a.m. bell.

After the doors to the school open, students spend the next 15 minutes wandering the halls, talking to friends, getting to their lockers and filtering into homerooms. Once in homeroom, many Trojans finish up some last minute homework, pick up a game of cards, or catch up on sleep. Eventually, the 18 minute homeroom period ends, forcing all the Trojans to get up.

Except, of course, those who just couldn't bring themselves to get out of bed when their alarm rang. These people usually end up standing in line in Room 110, waiting to be checked in.

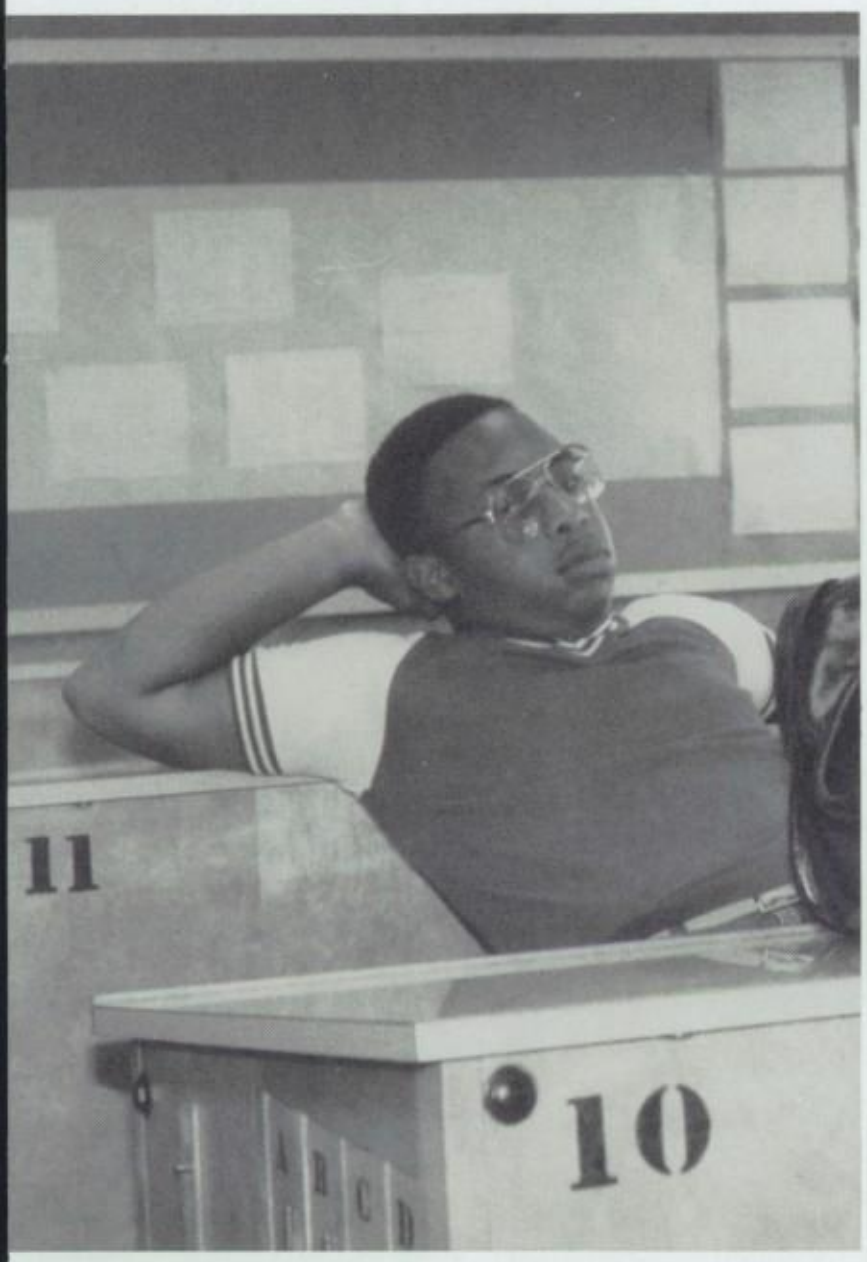


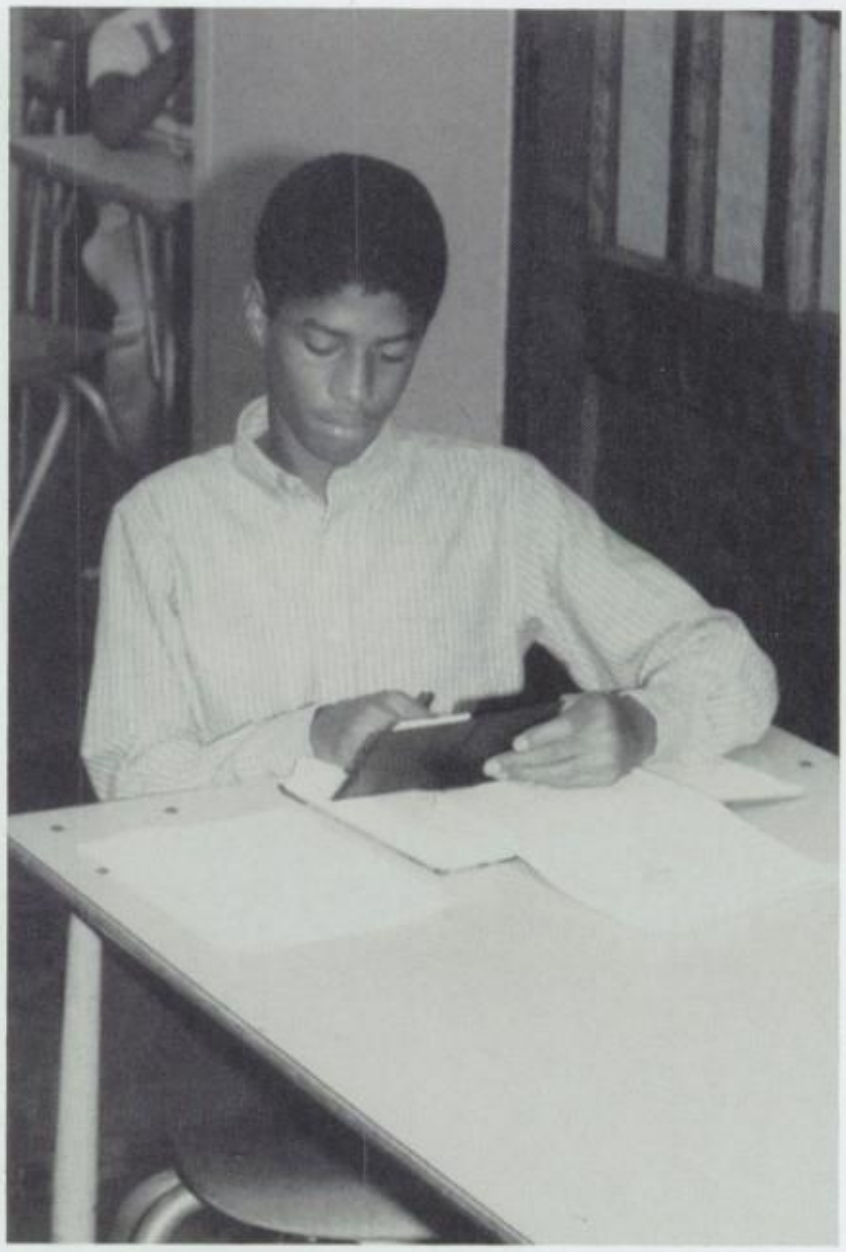
Who says Tech students aren't intelletual? Junior Mark Szmidt reads the business news.

Freshman Michael Ryba, deep in thought, waits for the morning bell to sound.

Sleep is the main thought in everyone's mind in the morning, as Joe Hite relaxes during homeroom.

WAKING UP





Sophomore Roderick Hammond relaxes during homeroom before a busy day.

Playing sheepshead is a good way to start the morning, at least that is what Seniors Donnie Patton, Trung Lee and Juniors Ray Woo think.

Art student Eric Jordan shows one way to use up his time before homeroom.

THE GAME OF:

Despite the fact that somebody forgot to get a new rope for the annual tug-of-war during Homecoming week, Trojans still showed their Tech spirit in a number of different ways.

This years spirit week celebration, planned by Mr. McCallum and the Student Council, got underway with New Wave day on Monday. Orange and blue became the common hair colors for a day as Techites experimented in the realm of New Wave rockers. On Tuesday, doctors, businessmen, firemen and even priests roamed Tech's hallways for Professional Day. Everyone from Snoopy to haunted pumpkins appeared on Wednesday, Halloween Day. On Thursday, all the latests styles in stripes, polka-dots, and plaids were displayed by spirited Trojans. And, of course, as any good Tech student knows, Friday is the day to get out the purple and white.

Homerooms also could compete to see which had the most Tech spirit, decorating their doors in a variety of purple and white styles. The judging was close, but 319 edged out all other sophomore homerooms, 377 outdid the other junior homerooms, 349 showed up all the senior classes and 388 came out on top of the mixed homeroom competition.

The week came to a close on Friday as the cheerleaders delivered homecoming mums in the morning and then inspired the Trojan football team in the first pep rally of the fall.

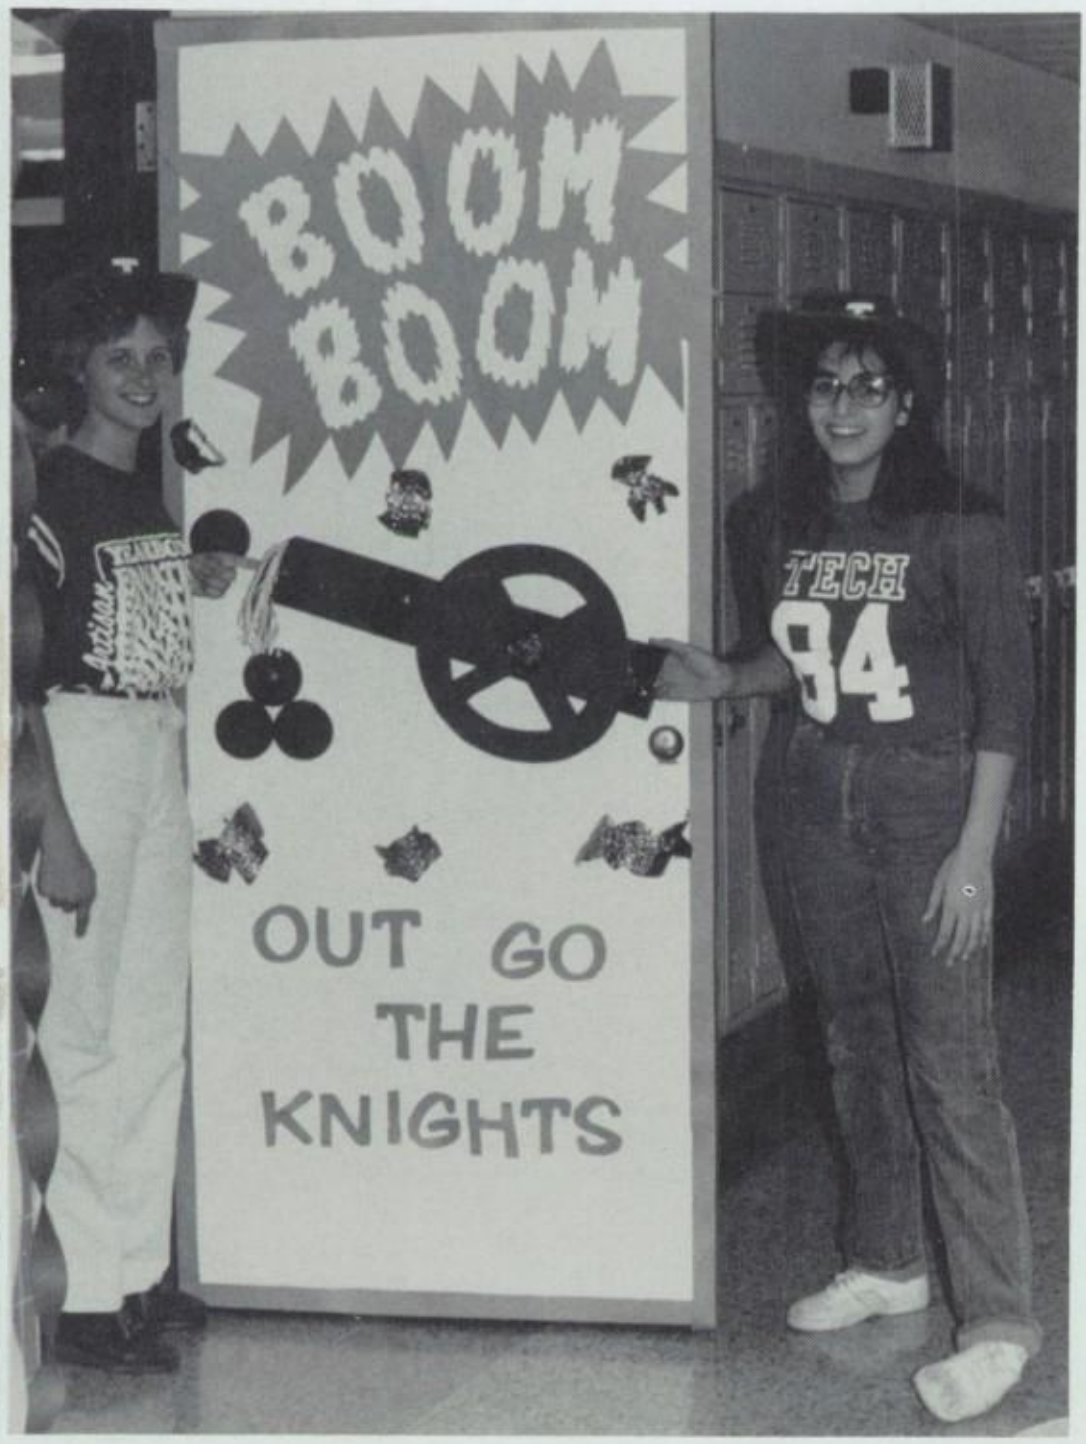
Don't mess with this mean looking punk rocker, Laurel Wozniak.

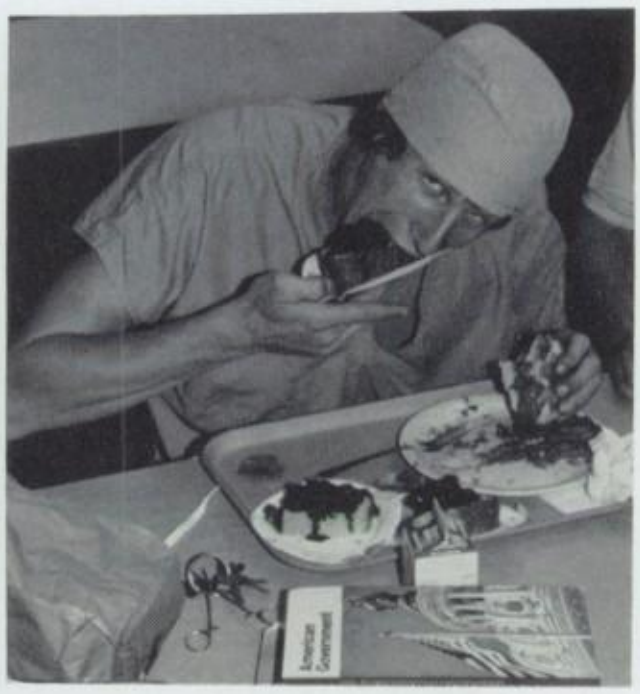
Who is this famous artist? Of course, it's Leonardo De Sargeant.

The Pom Pom squad did another dazzling routine during Friday's pep rally.

During the Homecoming parade senior Brian Dolan showed his Tech spirit as the school mascot.

SHOWING SPIRIT





The door decoration by homeroom 388 told the story of Tech's homecoming.

This doctor, Brian Dolan, sure doesn't know what is good for him.

Seniors Tim Block and Pete Budney blessed Techites during Halloween day.

It looks like Snoopy has the best hand, as John Swiertz and David Meer enjoy a lunchtime card game.

THE GAME OF:

Both the Milwaukee Brewers and Tech's varsity baseball team, powered by consistent hitting and a strong defense, advanced to the championship game, only to come up short the last game of the season, finishing in 2nd place.

The Brewers, led by the league's Most Valuable Player, shortstop Robin Yount, battled their way to the World Series. They finally clinched the American League East race on the last game of the season, beating the Baltimore Orioles in a win or end the season situation. Then, after dropping the first two games of the five game American League Championship series, the Brewers returned home to win the pennant by beating the California Angels in three straight games, a feat never before accomplished.

Then, Milwaukee's team faced the St. Louis Cardinals. In the first game of the Series, the Brewers blew St. Louis away, protected by the superb pitching of Mike Caldwell, who shut the speedster's from St. Louis out. Milwaukee lost the second game in St. Louis and returned home, where they won one game, dropping two to St. Louis. Back in St. Louis, the boys from Milwaukee took the first game, sending the series to a final show-down. In the final game, the St. Louis pitching staff, led by famous reliever Bruce Sutter, shut down the Brewers, and they dropped the game 7-2.

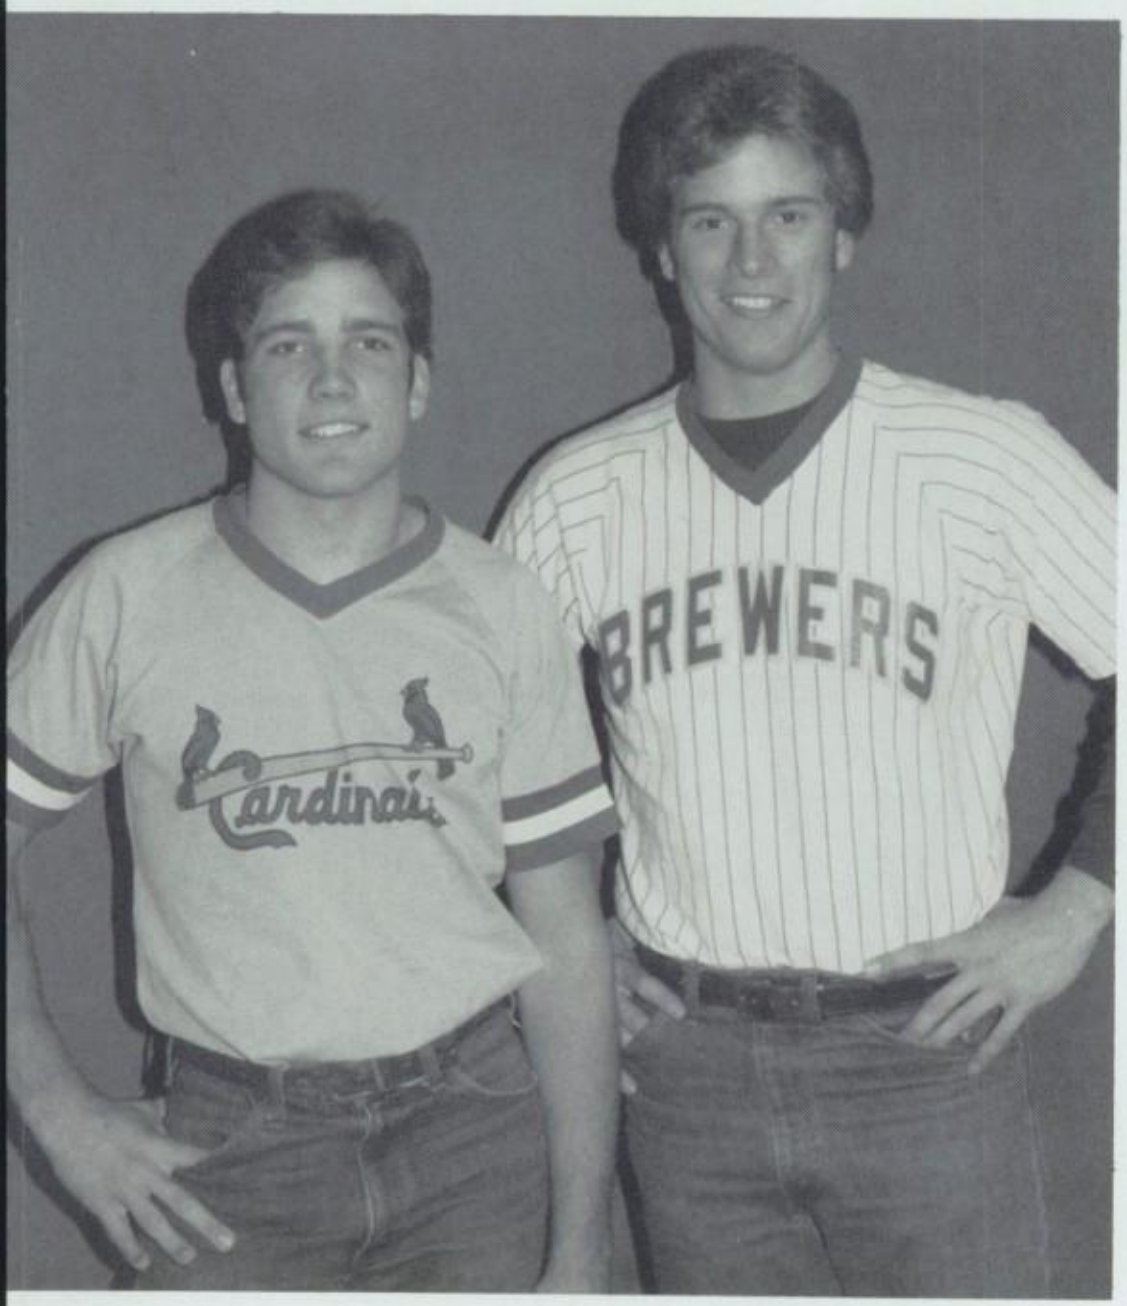
Similarly, Tech's varsity baseball team, after finishing third in the Milwaukee Area Conference behind the hitting of All-State right fielder Merv Waukau, advanced to the State Tournament. They managed to defeat a strong Madison team, who previously dealt Tech one of its 3 losses of the regular season.

In the next game, Tech outmuscled Oshkosh North, 9-3, helped by a strong offensive scoring combination of shortstop Jim Logan, Merv Waukau, and designated hitter Mike Dukat. In the third game of the tourney, Tech's defense proved itself, allowing a powerful Racine Park team only 1 run while Tech hitters managed to drive in 4.

Tech faced a well-rounded Appleton West squad in the championship game. In a defensive battle, Appleton's pitchers shut down Tech's offense, winning the game 2-1.

After a victory in the fifth game of the American League series, Ted Simmons and Paul Molitor joyously embrace Pete Ladd.

BREWBALL



After a disappointing loss to Appleton West at the State Tournament in Wausau, Coach Konowalski receives Tech's second place trophy.
Doug Bart's superb hitting and fielding led Tech to the final game of the State Tournament.
One of the quieter confrontations of the World Series brings on a smile from Seniors Jim Gorecki and Steve Herrenbruck.
Brewer Fever raged through Tech, infecting Dennis Nowak during homeroom.

THE GAME OF:

Several deaths, a single birth, a few invasions, and an oncoming depressions made national and international news in 1982-83.

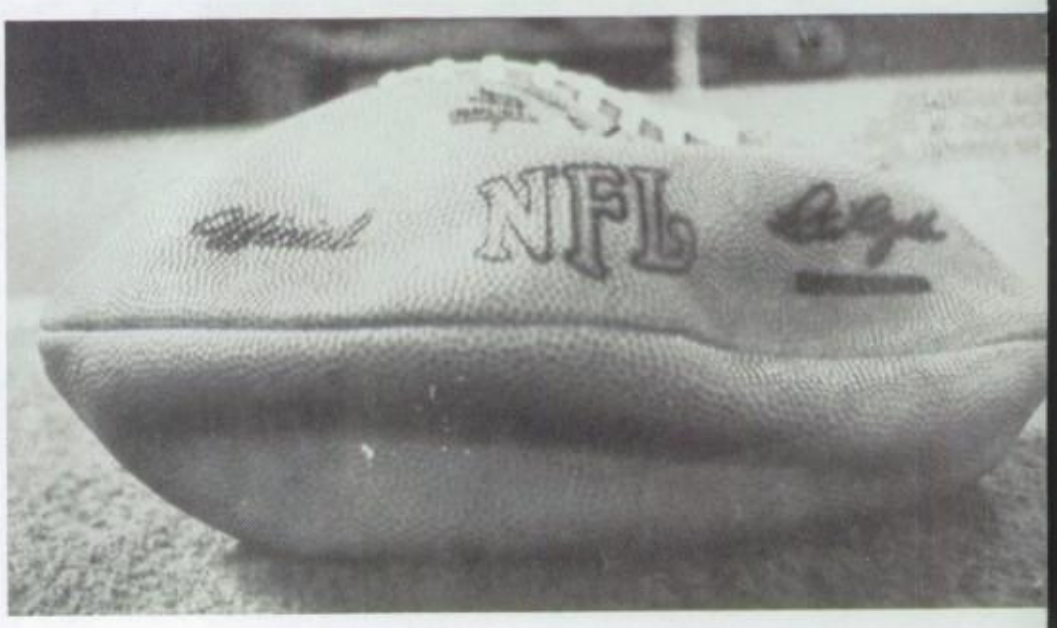
The world lost a few very famous faces this past year, leaving many film and movie fans in a state of shock. John Belushi, known for his part in "Saturday Night Live" and "Animal House" died of a suspected drug overdose. Henry Fonda, the star of "On Golden Pond" and many other movies, also watched his last summer go by this year. Natalie Wood, wife of Robert Wagner, drowned after falling off her husband's boat. And finally, Princess Grace of Monaco, an ex-movie star, died after a car crash.

The joy of new birth also captured the world's eye when Lady Diana, Princess of Wales, gave birth to a baby boy, Prince William. The young heir to the English throne held the public eye for quite a while.

Meanwhile, the British mounted an invasion of the Falkland Islands after Argentina laid claim to the small pieces of land off the South American coast. The British forces succeeded in regaining control of the islands. Fighting proved to be brief but harsh, with both sides taking casualties.

On the other side of the globe, Israeli forces devastated Beirut, demanding that the Palistinians living there move out. After shelling and bombing the city during a 10 week siege, the Israelis invaded. United Nations forces, including French and Italian troops and the US Marines, came in to secure the peace as the Palestinians left by air and water.

On the national scene, John DeLorean, a designer for Chrysler, made the news for alleged dealings with cocaine. Also, the National Football League player's strike shortened the football season, cutting it off in September. In late November, play resumed with the Redskins capturing the Super Bowl. The fight of the century, as it was called, also took place in 1982 between the great white hope, Gerry Cooney, and the champion, Larry Holmes. Holmes won on a technical knockout in the thirteenth round.



One of the most devastating events of the year was the massacre in Beirut.
After two months of deliberations between owners and players, the football strike finally came to an end.

WORLD EVENTS

Princess Diana of Wales proudly displays her son Prince William.
The heavyweight champion Larry Holmes connects with a devastating blow to the jaw of the challenger Gerry Cooney.
Thousands of fans mourned the untimely death of comedian-singer John Belushi.

THE GAME OF:

On the local scene, 1982-83 proved to be a year of extremes - some depressing while others gave new hope.

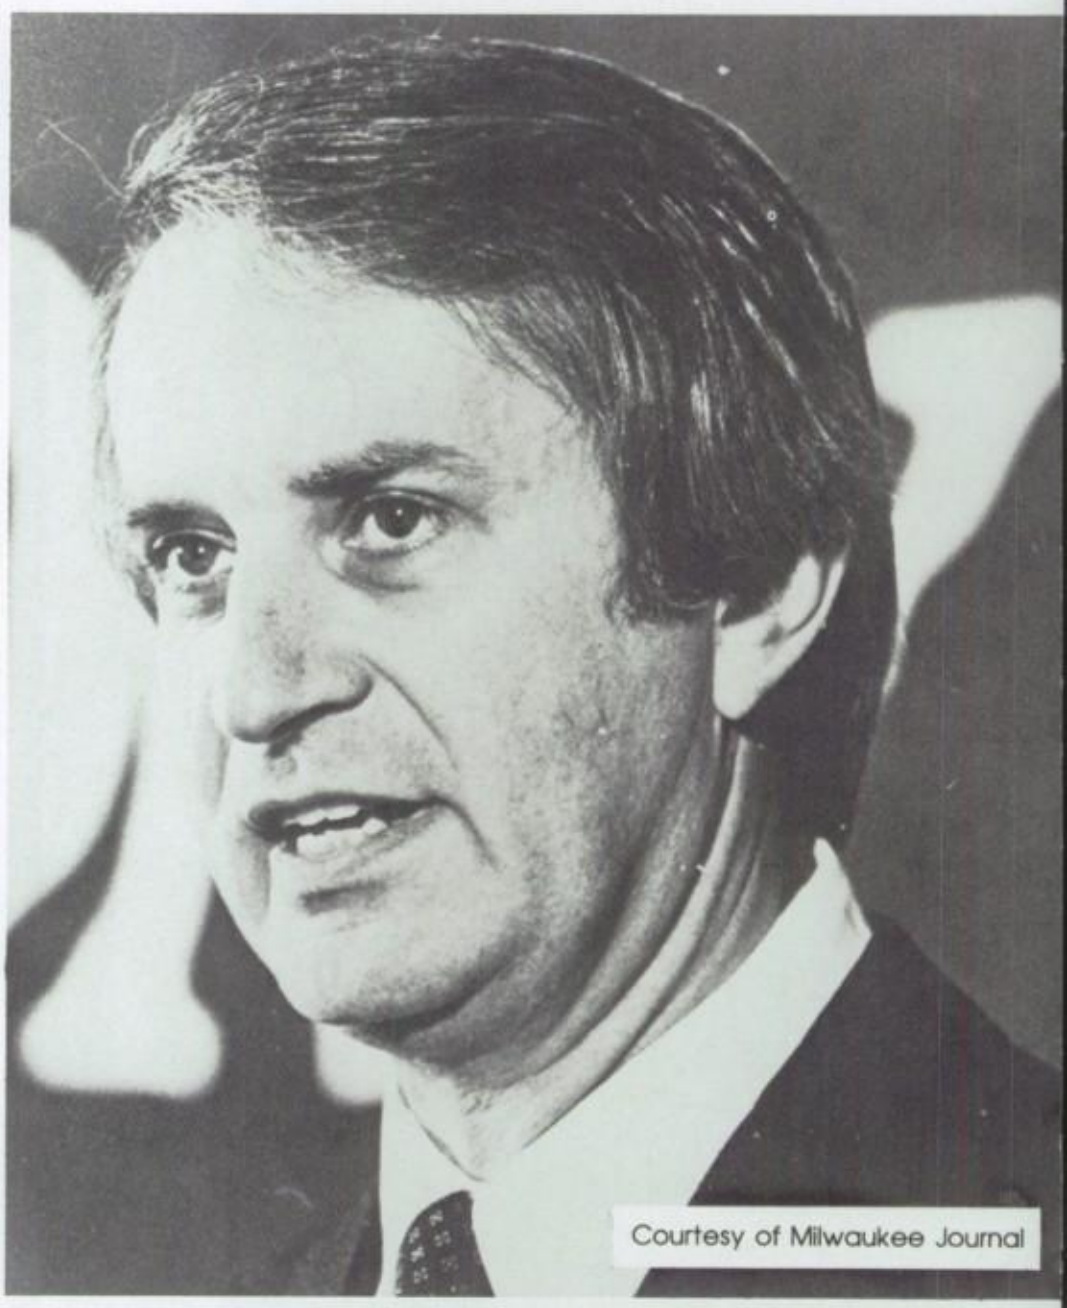
In sports, both the Brewers and the Packers finished the season by entering the playoffs. The Brewers fought their way to the World Series, but lost in the last game while the Packers managed to get to the second round of the play-offs despite the shortened football season. The Wisconsin Badgers even made history when they beat the Ohio State Buckeyes in Columbus for the first time since 1918.

In politics, Democrat Anthony Earl captured the position as Chief-executive for the State, defeating Republican Terry Kohler. A record number of voters turned out for the primary election. Earl took office just after the unemployment rate reached a record high of 11.7%.

The brew city lost two of it's breweries in June. The Schlitz Brewing Company merged into the Stroh's Brewing Co. and the Heileman Brewing Co. acquired Pabst, despite the efforts of Minneapolis businessman Irwin Jacobs to keep Pabst independent.

The Grand Avenue opened in August, giving Milwaukee a new look Downtown. The mall, which stretches over 4 blocks between Gimbels and Boston Store, attracted over 100,000 visitors on its first day. The 3-story retail center cost over $70 million.

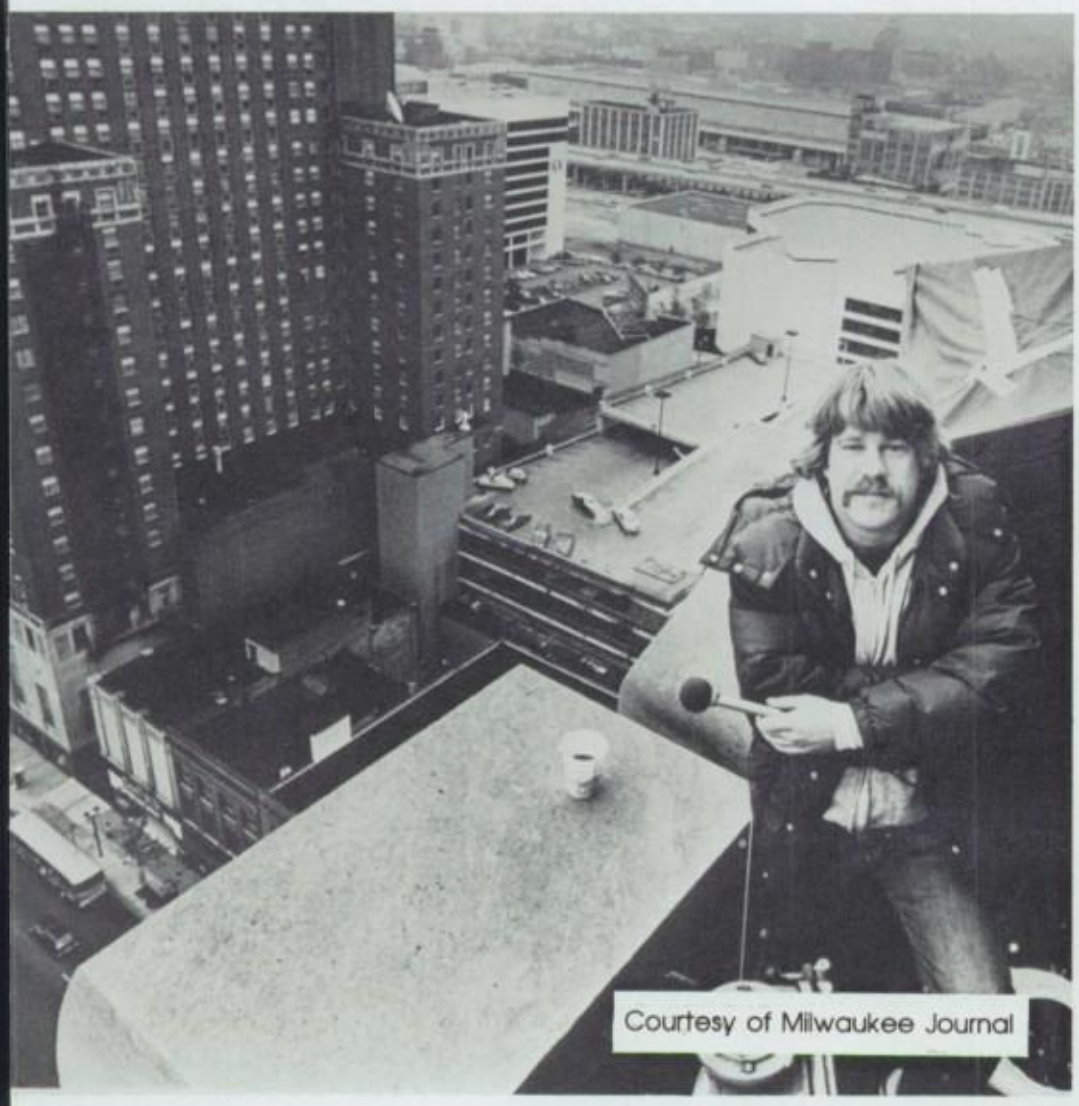
Several groups made stops in the Milwaukee area, including Foreigner at the 2nd World Series of Rock held at County Stadium. The biggest music news of the year, though, involved "The Who." After the group cancelled a concert in Milwaukee on their final North American tour, Who fans in Milwaukee signed thousands of petitions to bring the group to Milwaukee, inspired by Tim "The Rock'n'Roll Animal," a disc-jockey from WQFM who spent several weeks on a ledge outside of the WQFM offices downtown. The Who did come to Milwaukee to play before a sold-out crowd.



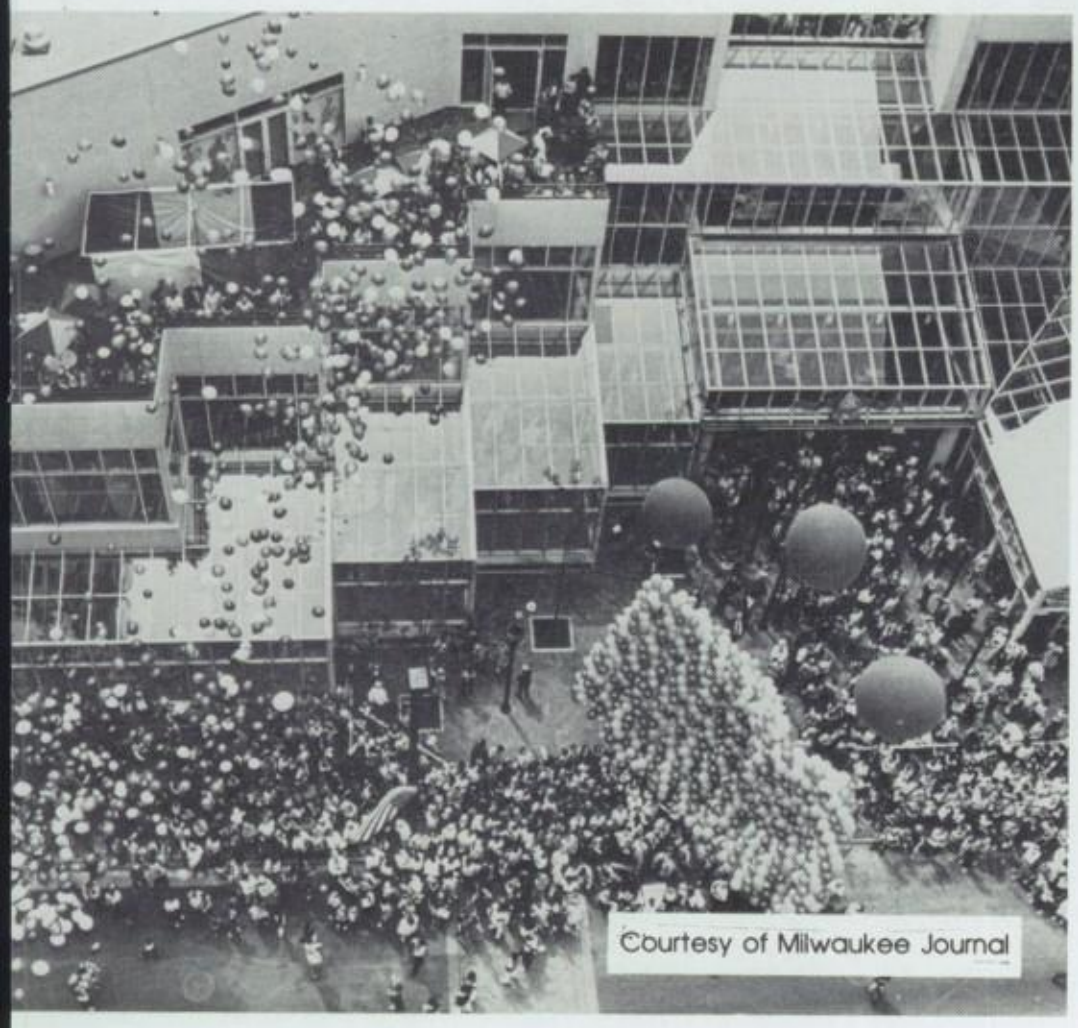
Courtesy of Milwaukee Journal

Democrat Anthony Earl solidly defeated Republican candidate Terry Kohler for the governorship of Wisconsin.
Milwaukee lost two of its breweries when Stroh's beer took over Schlitz and Heileman Brewing Co. acquired Pabst.

WISCON-NEWS



Courtesy of Milwaukee Journal



Courtesy of Milwaukee Journal

Cold and tired, disk jockey Tim "The Rock'N Roll Animal" would not give up his fight to bring "The WHO" to Milwaukee.

Visitors found the Grand Avenue Mall a beautiful place to shop with many clothes, novelty, and food stores.

Thousands of Milwaukeans jammed the Grand Avenue Mall on its opening day in August after a delay because of many craftsmen strikes.

THE GAME OF:

More than a few fads swept the country during 1982, affecting the lives of Tech students in different ways.

Probably the most popular overused saying of the year-"E.T. phone home" - made the scene after Steve Spielberg's movie "E.T." smashed box-office records over the summer. Not only were the little extra-terrestrial's words taken as gospel, his face also began to appear on everything from shirts to shoes to dishtowels. A lawuit even developed over "fake" E.T. dolls out on the market.

Several other small characters - the Smurfs and Strawberry Shortcake - also began to show up on the market, gracing every toy store with their presence in the form of dolls, ranging from 1 inch to 5 feet in height, games, shirts, and buttons. The little blue dudes in hats and the girl with the strawberry scent invaded the home as well as the market, starring in their own cartoons and T.V. specials.

Then, the Valley Girls' mounted an incursion on the American life style, led by Moon Unit Zappa, daughter of famous rock star Frank Zappa. Her song, "Valley Girl", popularized the fad which even had its own language, known as Valspeak. Several new words and phrases, including "groaty" and "gag me with a spoon" invaded the conversations of teenagers across the nation.

Another big movement began when the book "Real Men Don't Eat Quiche" came out. This book, filled with a list of things "real" men do and do not do, caught the attention of the nation. And, in the trail of this fad came the natural follow-up in this age of women's rights, a list of things real women do and do not do.

Fortunately, Techites managed to survive all these fads and make it into 1983. During 1982, many of the fads and news items of the year tended to become overpublicized or overmarketed. So we have compiled a list of a few of the things that we heard, read, or saw all too frequently during the past year.

- *E.T. phoning home.* Everywhere you turn, it seems E.T. has been there. Glowing fingers and hunched over profiles seem to appear all over the place: in stores, on T.V., on the street. Isn't it about time we gave the extra-terrestrial a rest?

- *Ernie von Schledorn's* "Who do you know wants to buy . . . ?" This one advertising slogan has found a place in selling everything from cars to carnations at Tech. Somebody should really teach that man some English.

- *Celebrity and designer candy bars.* After Reggie Jackson had his own candy bar, it seems everyone from the Brewers to Larry the Legend wanted to get in on the act. Who knows, maybe Rodney Dangerfield will have his own candy bar out next year.

- *Valley Girls and Valspeak.* "Gag me with a spoon" has degraded too many conversations already, and who really cares where Moon Unit Zappas has her toenails done anyway?

- *Smurfs and Strawberry Shortcake.* Continued exposure to those little blue men or that smiling strawberry face could drive a normal person crazy.

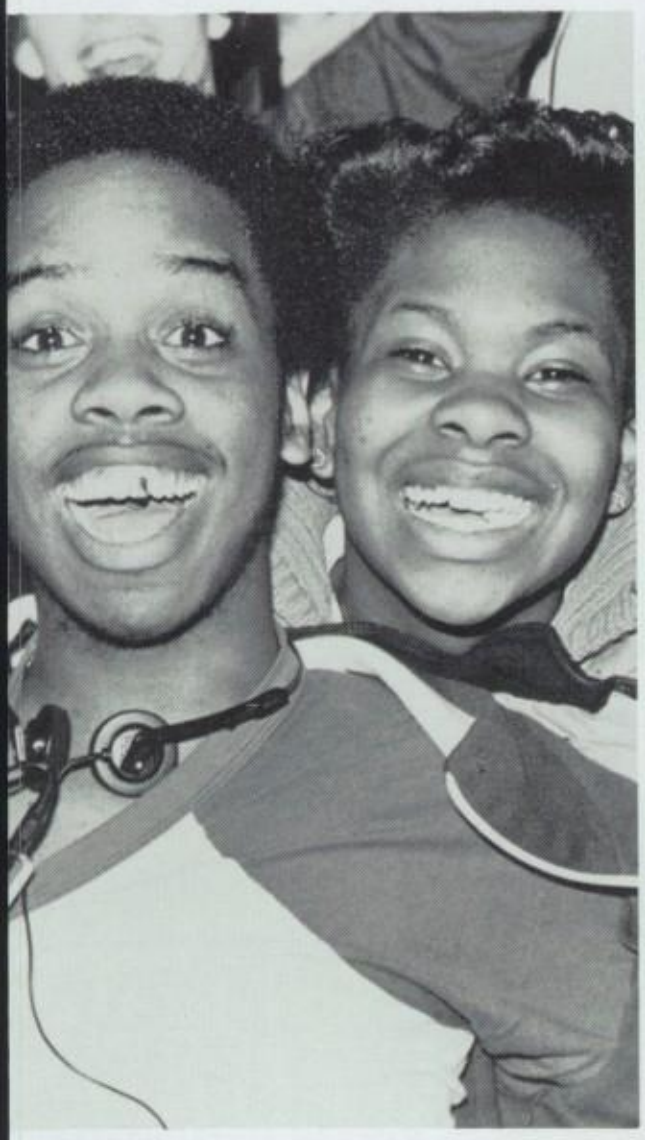
- *Alligators, bears, foxes,* or designer initials on clothes - Who cares who designed the jeans or shirt as long as it fits? And those little animals that appear on everything from underwear to socks to shirts, are they really just for show or do they have a hidden purpose, sort of like Garanimals for kids?

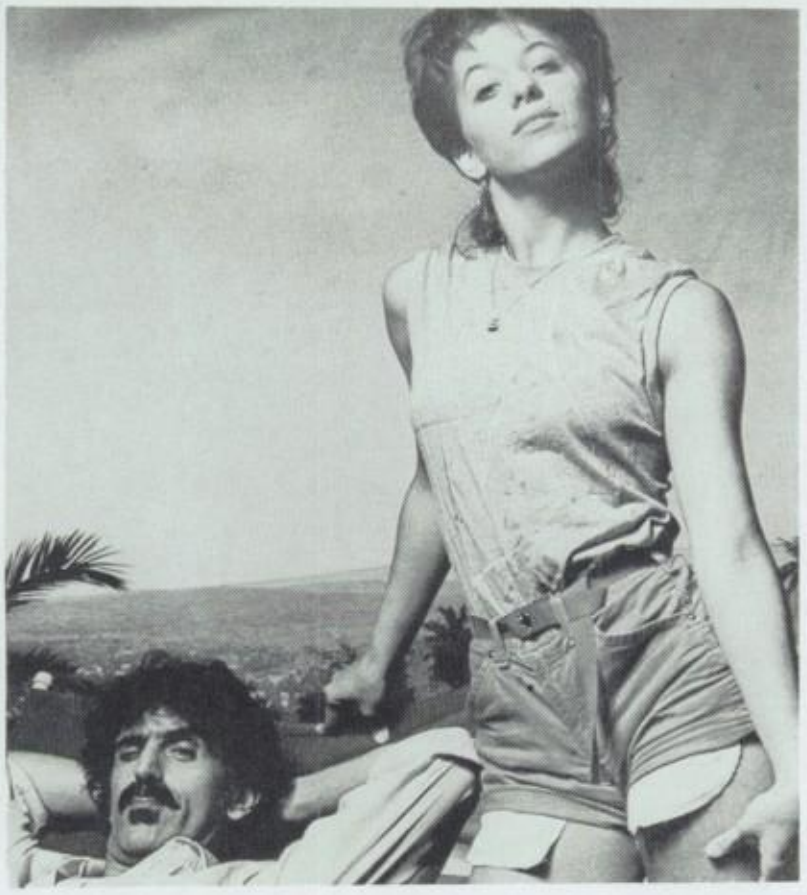
- *Prince William and his mother,* Diana, Princess of Wales. The kid may be cute, but do we have to hear what he had for breakfast on the evening news?

- *Professional athletes strikes.* I think the public has heard enough about the horrible conditions these men have to suffer under while they play games to earn money.

- *Rubik's Cube,* Rubik's Revenge, Alexander's Star, etc. - We really don't need any more little puzzles to play around with, so how come the toy makers keep turning out new versions?

FADS FOR '82





Purple is the perenniel favorite at Tech, but even more was seen in 1983 when Tech won the state basketball tournament.

In hallways, study halls, and even at basketball games, students can be seen wearing the latest fad in audio technology — the Walkman radio.

A guide to all that is truly masculine, the book "Real Men Don't Eat Quiche" appealed to both young and old.
Frank Zappa and his daughter Moon Unit created a new language called Valspeak from their song about Valley Girls.

MR. NED WILKERSON: Assistant Principal; Hobbies: golf, writing, reading.

TEMPLE AT TECH

"Mr. Temple who?" That was the question on every students mind last September. Mr. Temple, Tech's new principal, is very experienced for he was the principal at Hamilton from 1969-'79, and then at Vincent for three years before coming to Tech.

Mr. Temple was previously a machine shop and drafting teacher. He admits he misses being a teacher because, "You're nearer and closer to the students than being a principal." He also stated that, "There is a lot more stigma because of the massive number of students to watch." Mr. Temple seems to be happy at Tech and responds, to the fact, that, "The students are here for a reason. This is the first time in 15 years that I've run into that."

In October, Mr. Temple went to Germany for a month to evaluate military schools. These schools are for children whose parents are overseas in the armed services. Mr. Dusold replaced Mr. Temple during his absence.

Mr. Temple is thinking about remodeling Tech since Tech hasn't been remodeled since 1965. He wants to modernize and improve it. If possible, he would like to build a new field.

Mr. Temple would like to be able to talk with all of his students and be able to see every one but he agrees that it will take a long time. Maybe one day Mr. Temple will get that opportunity.

NEW WAY TO WRITE

Students were given the chance of being actors, writers and directors for one semester this year.

Mr. Sadjak, along with the assistance of Ms. Mihm, created the idea for students writing and performing their own plays in Creative Writing. For two weeks the students will produce a play 15 to 20 minutes long.

Mr. Sadjak stated that, "The hard work for the students makes them very nervous about the outcome of the play, also most of the students are college bound so this is a good learning experience for them."

Senior Nancy Kurtz, along with her classmates, agreed that it was a good experience but it involved a lot of work. "There are many types of problems," commented senior Karl Drezek, "Like developing characters is very tough." Karl also said, "There was a slight problem in getting a conflict for the play." "Everyone keeps changing ideas during a short course of time," was senior Steve Herenbrook's major complaint.

"The conclusion to the project and taping of the play can be the hardest part of all," stated Mr. Sadjak. With no acting everything must be understood with only the hearing of the play. Mr. Sadjak stated that, "Sound effects take a lot of practice before they're right."

"To get a good grade everyone must do their fair share and even more," commented senior Matt Mosher.

After the plays were over with the students worked on poems and short stories.

PRESIDENT HERE?

What? You say the President is here at Tech? Believe it or not, the President does spend a lot of time at Tech. The President of Mu Alpha Theta, that is.

Mrs. Hanson, head of the math department and advisor to the math club, won the job of running Mu Alpha Theta, a national math fraternity for students in high schools and jr. colleges. Well known among the 1200 chapters in the nation because of her speeches and presentations at various conventions around the state and country, she accepted the job after winning a national ballot.

During the next year, Mrs. Hanson's responsibilities include presiding over the National Mu Alpha Theta meetings and the national Council of Teachers of Mathematics and going to Washington for the U.S. Olympiad Team (a team of U.S. students which competes internationally in academic areas) awards as well as accepting requests from any chapter in the nation for speeches, etc. Besides that, she also teaches Algebra and Adavanced Math I, runs the Math department at Tech, and serves as advisor to Tech's Math Club and Tech's chapter of Mu Alpha Theta.

Other things that Mu Alpha Theta chapters do include sponsoring math competitions, math symposiums (lectures), national conventions, and state conventions. To become a member of this national math fraternity, a student must maintain a B or higher average through Adv. Math I and present an unusual math project to the math club.

13

14

16. *Carefully reviewing* an intricate Advanced Math problem, Mrs. Hanson patiently answers the classes' questions.

17. *Mrs. Hanson makes* sure Kathy Langston understands the extra-credit problem.

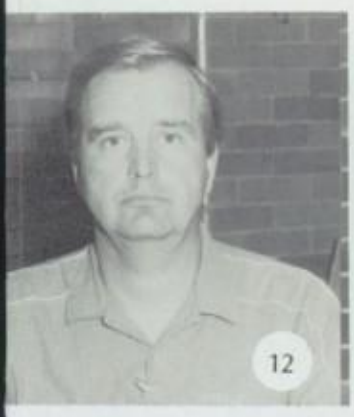
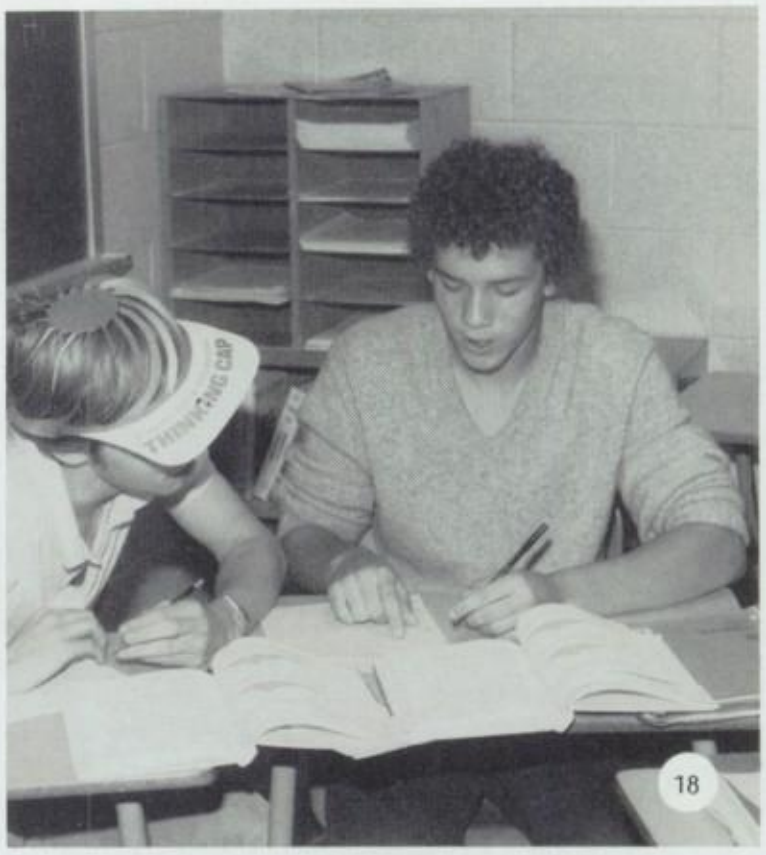
11. *Lisa Washington* checks her ring stands so that she can trust her beakers there.





FIGURING THE ODDS

How would you like to learn how to figure out your own odds in gambling? Or how to take data, organize it, analyze it, and come up with a logical conclusion? If you would, then Probability and Statistics is for you.

Probability and Statistics teaches students, first, how to figure out the chances of an event occurring using the quickest and most accurate method and, second, how to utilize statistics, facts and figures based on a large amount of information, to draw conclusions and make decisions. "Above all, I want the students to have fun learning," stated Mrs. Radtke, who is teaching the course for the first time.

Following this philosophy, Mrs. Radtke introduces her students to many games involving dice, coins, and other probability devices while working through the new book for the course, "Introductory Probability and Statistics." Even though the course appears in Tech's course catalog each year, the class actually only forms once every two years, due to lack of students.

In fact, only 18 students took the class this year, barely enough to fill up one classroom. "I took the class becuase it's interesting and fun, and it's something I might use later on," stated John Swiertz. Scott Castelez noted, "This class helps to round your math skills and gives you a more complete picture of math. Besides, what you learn is practical in the outside world."

18. *Scott Castelaz* thoughtfully explains a Probability and Statistics problem to Mark Boutot.

19. *Teaching his class* the fine art of wresting is Mr. Budzisz.

20. *Mr. Budzisz's gym* class takes a break from basketball.

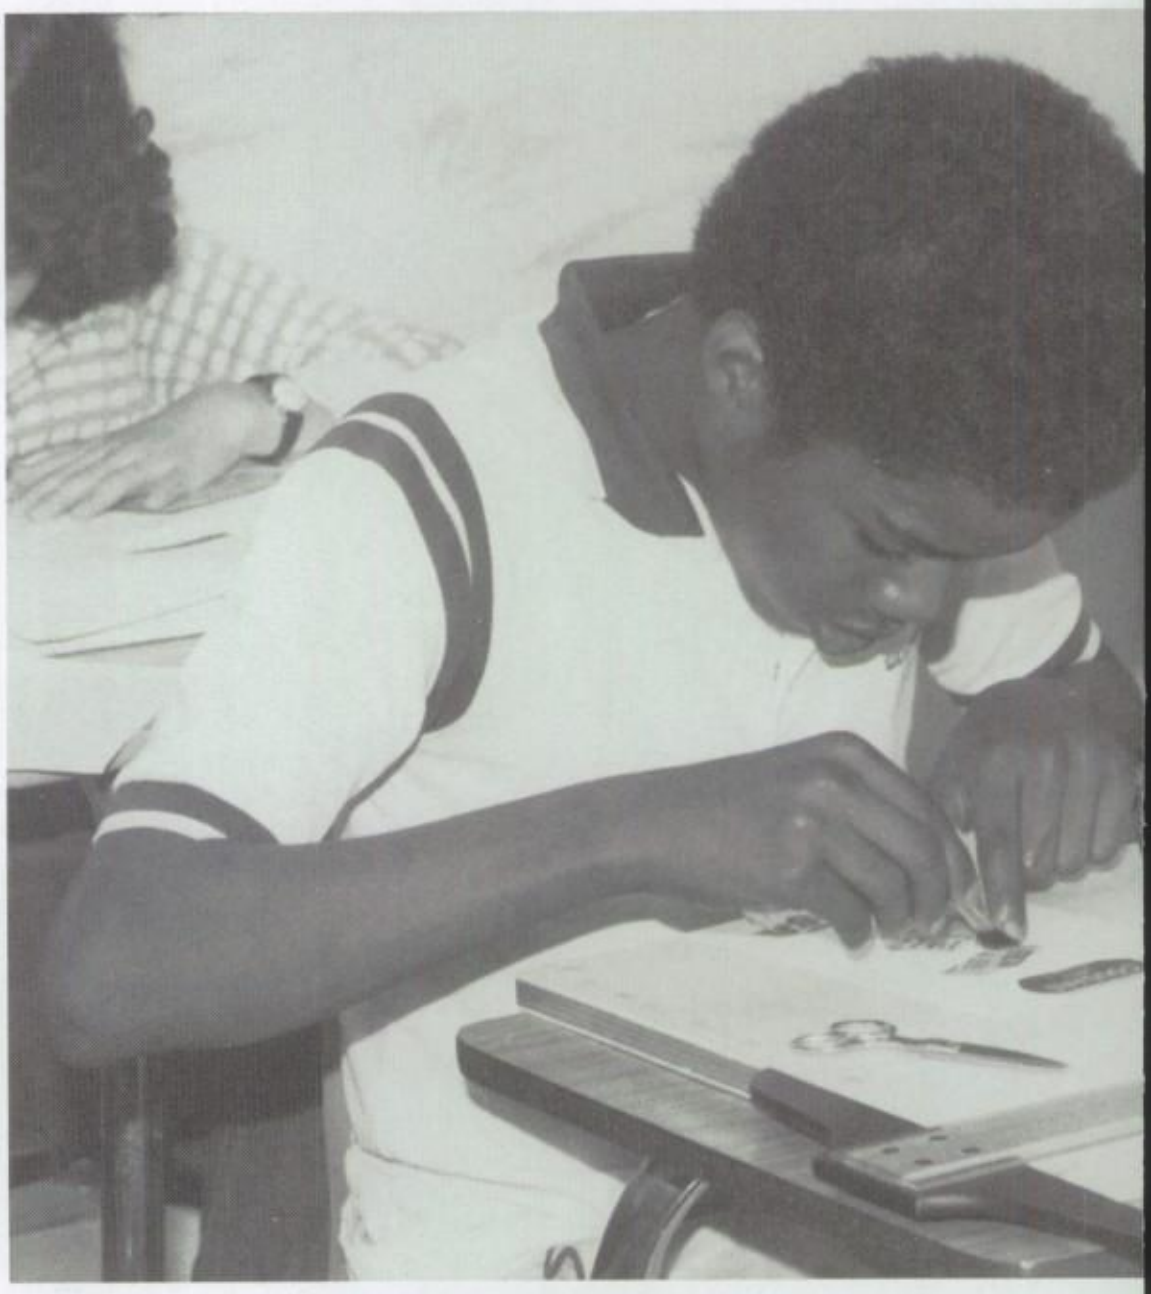
17. MR. T. SCHWALBACH: Commercial Art, Advanced Painting, Exploratory Art.



8. *With a determined look on her face,* Angela Napierala works hard to finish her Commercial Art assignment.

14. *One of Tech's numerous freshmen* hurries to finish his project for Exploratory print shop.

9. *Students in 5th hour Sociology* give their full attention to Mr. Kaluzny, a student teacher.

12. *Quickly writing Sociology notes,* Juanita Austin gets ready for more information.

PROJECTS GALORE

In what class would Tech students be fishing in the fountain at Southridge and watching the Brewer's game to observe crowd reactions?

Sociology, of course. A regular, ½ unit offering at Tech, Sociology has had a new dimension added to it by Mr. Kaluzny, a student teacher from Marquette University. Mr. Kaluzny has augmented the textbook with several projects for the 5th hour class. These included doing something very out of the ordinary and observing people's reactions, watching TV to see how it effects people's ideas, interviewing young children on morality, and talking to old people.

What did all those projects have to do with sociology? "Sociology is basically the study of how and why people react the way they do in a group, based on many abstract concepts," commented Mr. Kaluzny. "Sociology deals with a lot of everyday things that people tend to overlook, like why one action is acceptable and another is not."

What will the class's next project be? Only Mr. Kaluzny knows.

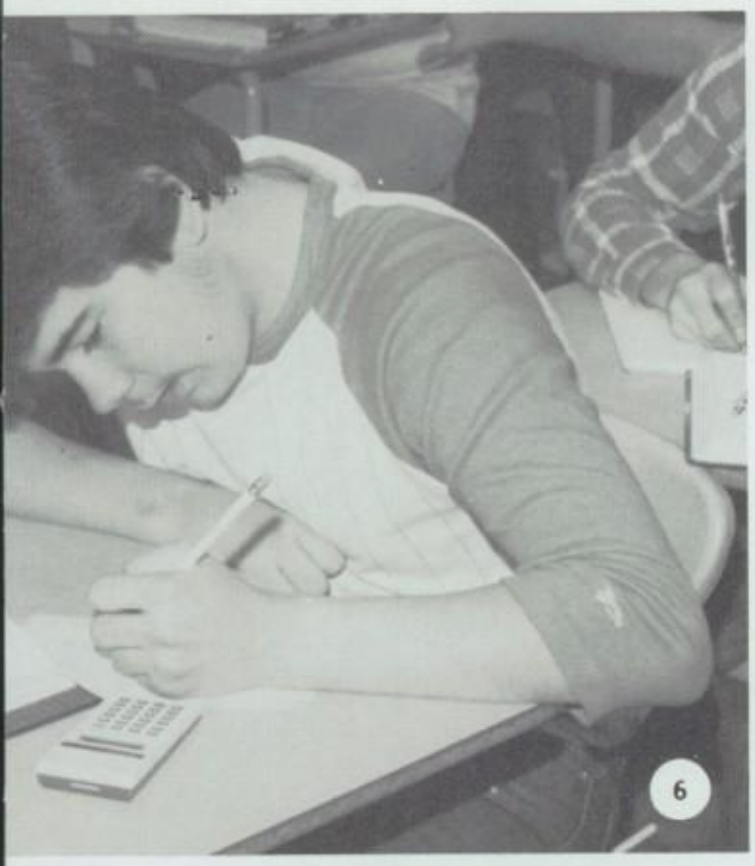
5. *A print shop* student works steadily on a light table while her picture is taken.



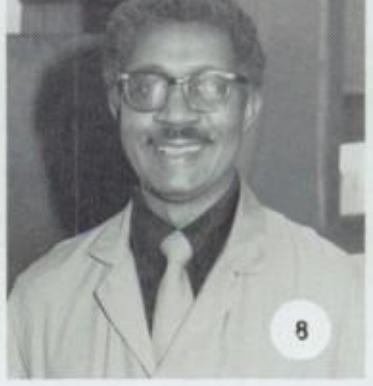
COMPUTER AGE

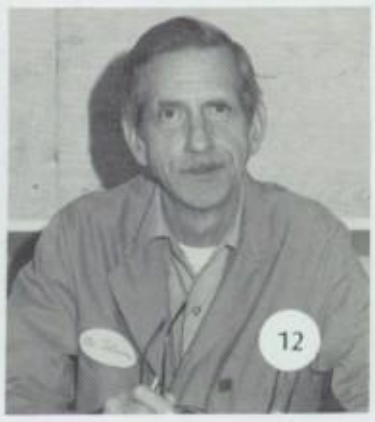
For the rest of their lives, students will live in the computer age. To learn what computers do and how they affect society, students are taking the Computer Literacy course now offered at Tech.

Computer Literacy is taken by students who are specializing in the shops such as Chemistry, Mechanical Drafting, Pre-Engineering and Electronics. This class teaches a great deal about computers and data processing.

Whatever people think or say, the computer revolution will be far more sweeping than the Industrial revolution and it will come more quickly. The effects produced by the computer are outstanding. This is evident by its use in industrial robots, its effects on transportation, money, paperwork, businesses and our own personal lives.

"It's something new and I guess it's not so bad, at least not yet," stated sophomore, Ken Libecki. Mr. Baird concluded with, "Whatever careers students might choose, their futures depend on knowing something about computers."





13. *Milling his work with precision,* Chris Potters goes for an A.

6. *Working out a tough* Computer Literacy problem, Robert Kinney uses his calculator to help him.

40 YEARS AT TECH

Over 40 years ago, Mr. Elmer Eggert graduated from "Boy's Tech," as it was called in 1940, from the wood shop. Today, he heads the drafting department, entering his 31st year teaching at Tech.

In his 33 years of experience as a teacher, Mr. Eggert, has passed on his knowledge in many different shop areas, from Wood to Electric, and from Pattern-making to Auto, finally ending up in drafting.

Many things have changed since 1940. "Discipline has definitely changed," stated Mr. Eggert. "There was never anybody in the corridors during class, and you could only smoke on First and Sixth Streets. There were these wood barrack's buildings in the courtyard, with coal stoves, and if you got out of line, you ended up carrying ashes or shoveling coal. That was very amusing," he remembered.

The buildings and grounds also changed during those 40 years. 1958-'59 marked the year that the south wing was built, adding a gym and a variety of new rooms, most used for drafting. In 1964-'65, the east wing was finished, and Mr. Eggert was put in charge of it's dedication.

But some things at Tech never change. Just like today, a lot of kidding and razzing went on. 40 years ago, Tech was an 80% Polish school, and Mr. Eggert put up with more than a few jokes because he was German.

Although Mr. Eggert has taught at Tech the longest of any teacher at our school today, he still has not equaled the record of his father-in-law, Mr. Barnette, who taught for 36 ½ years after graduating from machine shop in 1913. "I still have a few of his drawings on file," he added.

Retirement is not far off for Mr. Eggert. He hopes to enjoy more time at his cottage up north, fishing and "catching up on some sleep."

AERO TAKES 1ST

Tech's achievements reached new heights last August when a plane, built by Tech's Aero shop under the direction of Mr. Teschendorf, won an award for Outstanding School Flight Project at the Oshkosh Experimental Aircraft Association's annual convention.

Constructed from 1975 to 1980, the plane, only the second of it's kind, qualified as the only four passenger plane ever built by high school students. In the competition at Oshkosh, the plane competed against 15 others built by high schools and colleges from the U.S. and Canada, winning in the Project School Flight Division for home, custom built, and experimental aircraft.

Tech, the only high school to have an aircraft construction program as part of it's curriculum, has sponsored not one, but four airplanes, built from scratch by Aero students. Over 100 Techites took part in building the award winning plane.

11. *Really bearing down,* Mike Palkowski gets into his work.

FOREIGN KNOW HOW

Milwaukee Tech has two teachers, Mr. Treu and Miss Lee, who have come from distant countries to teach in the United States.

Mr. Treu, a full-blooded German, was born in Eastern Germany and then moved to Northern Germany which is now part of Poland. His parents decided to move to the U.S. in 1951 because they had lost their farm during the war and his father was out of work. Their first home in the country was in a small town in Kansas. One big disadvantage was that his family only spoke German so they decided to move to a German dominated city in 1954 called Milwaukee.

Mr. Treu went to high school in Omaha, Nebraska and then returned to Wisconsin to attend college in Madison. He started teaching following graduation from college. In 1974, after teaching in Kentucky for awhile and in Chicago for three years, he began substitituing at Tech, and since then he has been teaching regulary.

At the present time Mr. Treu teaches English and, of course, German. He is also the director of the German Club.

Mr. Treu gives his time to the club because he wants more students to get involved in other languages. "Many students will have to communicate with other countries when they become adults, so I feel it is important for them to learn different languages now," stated Mr. Treu.

Mr. Treu often goes back to his orignal home but will never go back to stay.

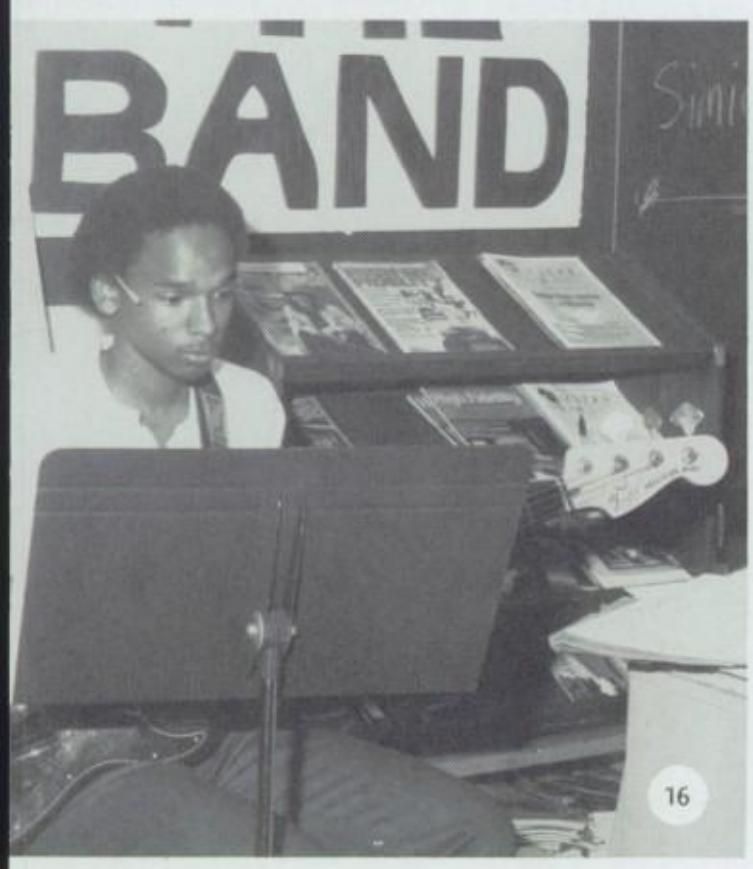
Miss Lee, an English teacher, was born and raised in Hong Kong. She moved into the United States in the summer of 1973.

Miss Lee, made her way through the U.S., starting with San Francisco for a day and then traveled out of the U.S. to Vancouver. After her stay in Canada, Miss Lee began college in Chicago, where she attended Illinois State University.

So far, Miss Lee has taught at 4 schools in her career. Her 1st year of teaching was spent in Hong Kong. Returning to the U.S., Miss Lee taught in Iowa for 3 years and then moved to Milwaukee. She has been here 3 years now, 2 of them at Tech.

"The United States is a peaceful environment in comparison with Hong Kong," commented Miss Lee. "Pollution covers most of the area and it's densely populated, but the island is considered the Pearl of the Orient with many outstanding features such as the seeing of lights off the mountain peaks at night."

Even though she misses her family, the food and Hong Kong itself, Miss Lee will never return there permanently. She enjoys life where she is now.



12. *Mr. Treu* gladly aids one of his German students with a difficult word.

13. *Helping Brian Dehubring* with his reading is Ms. Lee.

14. *Double checking* their work are Bridget Fitzgerald and Tanja Johnson.

15. *Tightly clamping his work,* Scott Greziowiak prepares to plane it.

16. *During his 5th* hour Jazz Ensemble class, Rodney Nobles studies a new piece of music.

PINHEADS?

Pinheads? What are Pinheads? A new religious faction? A bunch of saps? A branch of the Swiss underground?

The Pinhead movement ((*P*eople *I*nvolved in *N*uclear *H*olocaust *E*radication and the *A*nti-Christ's *D*estruction) began in 1980 when three transfer students, Dave Wagner, Bob Babich, and Dave Meer, met at Tech on orientation day. Since they all had the same classes as pre-engineers, the group solidified. Several other pre-engineers, including Troy Pickl, Paul Hugdahl, Mark Boutot, John Swiertz, Chi Ligh, and Leonard Prescott, along with one electrician, Trung Lee, joined up, and the members grew closer through trials in Mr. Magno's chemistry class and Mr. Zewewski's electronics class.

Originally, the Pinheads got together just for fun: to play sheepshead, to have a football game, or to go see a movie. Early in the 81-82' school year, Dave Wagner started calling people "pinheads" and the group got it's name. Over the summer, the Pinheads stuck together, spending a lot of time riding bikes, playing cards, and cruising the city.

In September, 1982, three new pre-engineers, Mike Behnke, Matt Mosher, and Chuck Thimmesch, joined the Pinheads. At the same time, Troy (Buck) Pickl, leader of the radical half of the Pinheads, began to suspect that the Anti-Christ was alive and studying at Milwaukee Tech. He immediately launched an investigation.

Pinheads are easily recognizalbe because of several characteristics: 1. they tend to be rather intelligent 2. they often wear a clothespin pinned somewhere on their clothes 3. they use the phrases "Obviously" and "This is true" 4. they play sheepshead habitually.

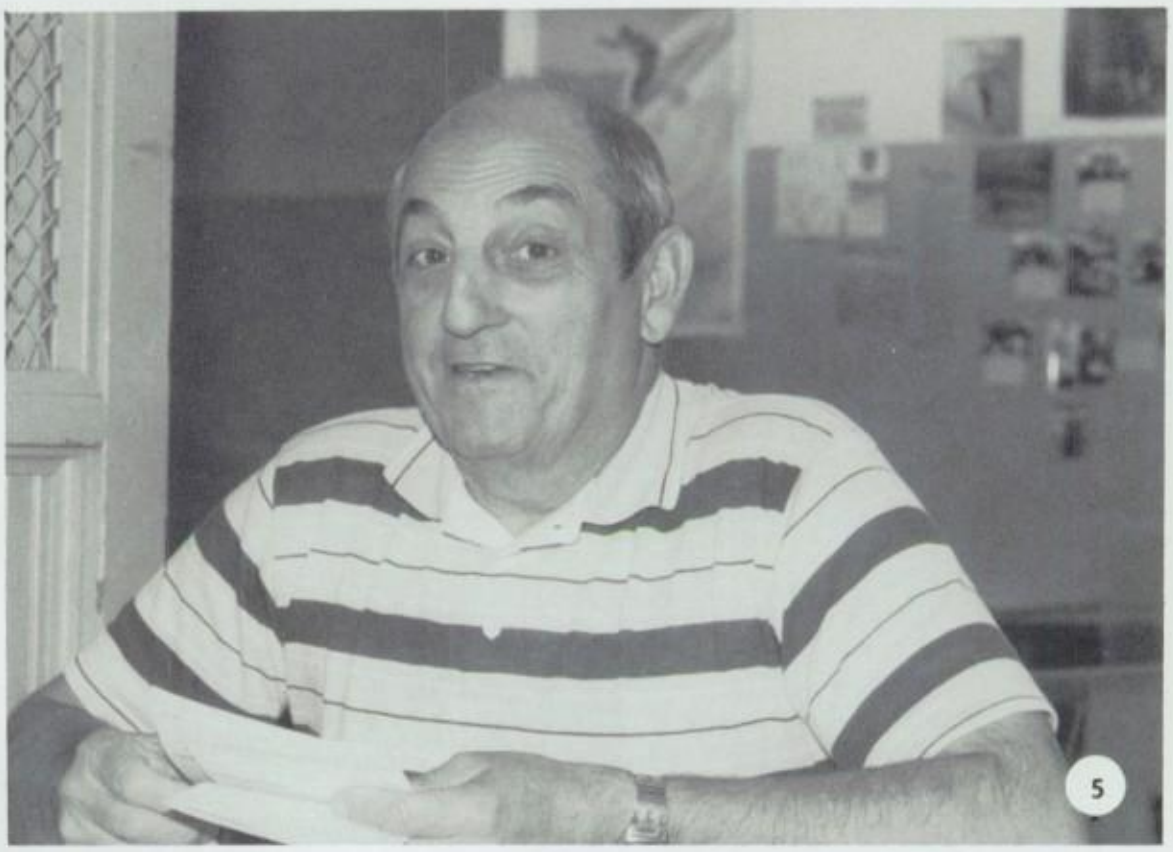
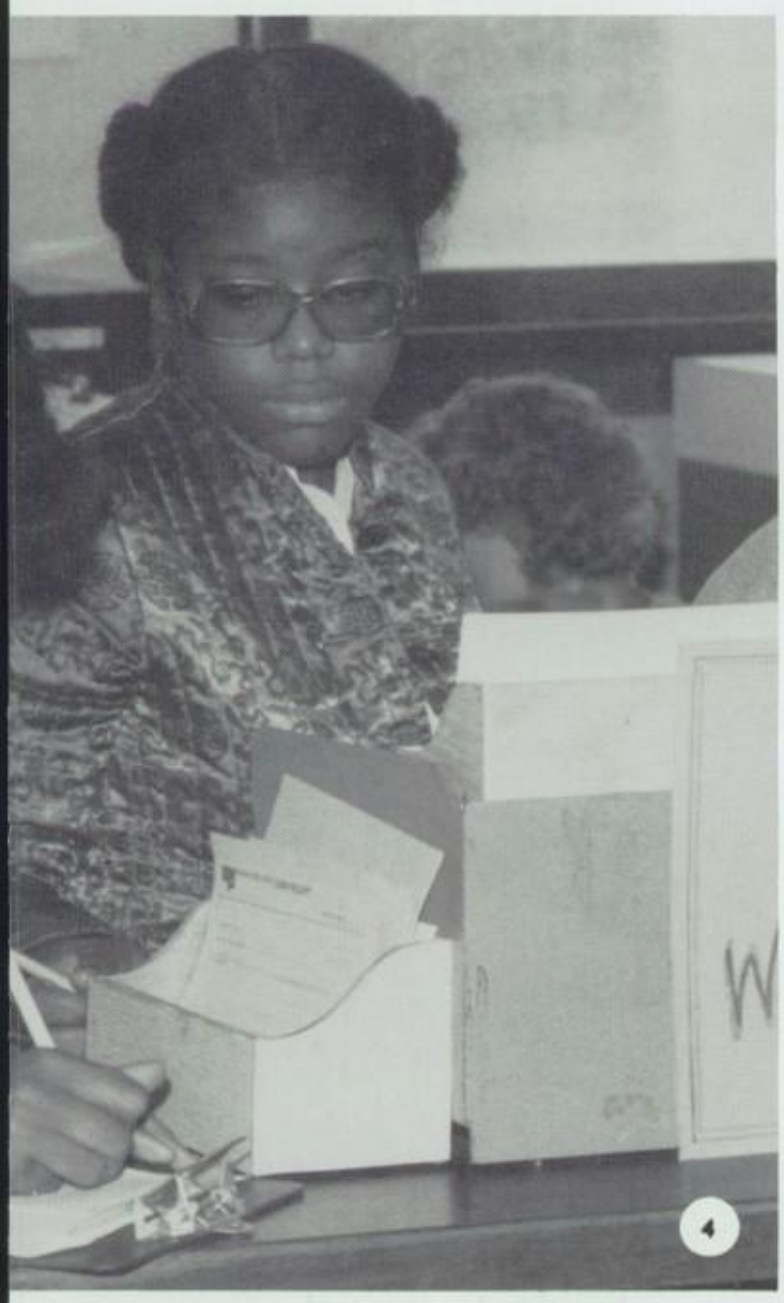
4. *Two of our dedicated office monitors,* Gail Williams and Barbara Gray, at work.

2. *Our dependable attendance* secretary, Christine Fraley, is new to Tech this year.

5. *Remember:* "If you're naughty, Mr. Magno will get you."





MAGNO WANTS YOU

What Techite hasn't felt a tingle of apprehension when a monitor walks into 7th hour class with a handful of pink passes, all signed "Magno"?

Most students, no matter how careful they are, get at least one of the dreaded slips of paper during their 4 years at Tech. And then, it's down to Room 110 to confront a short man in a blue lab coat: Mr. Magno. Why does this Physics and Chemistry teacher summon all these students to his "office"? Does he enjoy watching students try to squirm out of a truancy?

"I don't enjoy giving out passes," stated Mr. Magno, "In fact, the job is getting boring, but it is my job and somebody's got to do it."

Why are students summoned before Mr. Magno? The biggest reason is truancies. Any person marked absent for a class and not absent from school gets the call. An average of 50 Tech kids get called down a day. If a student doesn't show up, Mr. Magno uses the easy location method: he calls their parents.

"I wonder how much it costs the taxpayers for every student who is truant," commented Mr. Magno, "I could solve that problem easily, just throw each kid guilty of truancy out for a year."

But is Mr. Magno really like most students think he is? "No, not really. He's a pretty nice guy once you get to know him, just don't get in trouble with him," commented 7th hour monitor, Chris Smith.

SENIOR BIO

PETTISATRICIAN

Kelli Pettis, a senior in the Pre- Engineering shop, has accomplished many things while at Tech including being an outstanding cheerleader during the last 4 years. "When your a cheerleader you become popular, you get to know new people and it also helps you to find out what team work is all about," stated Kelli.

Kelli is a member of the Human Relations Executive Board. Kelli and other selected students go to workshops at different schools to talk about the school problems and try to find solutions.

As a member of Mu Alpha Theta, Kelli is a public relations secretary. She goes to the math meets and puts on presentations. "The math club has helped me to understand the basic ideas and the logic behind my classes," commented Kelli.

The biggest honor she has received is being on the National Honor Society her junior year and senior year. During her junior year she had to maintain a 3.5 grade point average, have a good school record and be in an activity or sport. That year she finished 12th out of 548 students.

With Kelli's many interests, she is still able to keep her grades up. "I set my priorities high to keep my grade point up. If I have things to do I do my homework first," stated Kelli. "School is the most important thing to me. A good education is what business people are looking for," commented Kelli.

After high school, Kelli is hoping to receive a scholarship and go on to UWM. "My all time goal is to become a pediatrician. It has been a dream of mine since I was young," concluded Kelli.

SENIOR BIO

KING HONORED

Senior Jennifer King is very independent when it comes to her school activities and homework.

Jennifer is enrolled in the Upward Bound Program at Marquette University since the summer before her freshman year.

Jennifer is also a participant in the National Honor Society since her junior year.

Jennifer is in the Chemistry shop and is doing very well in it. Her other activities include being on the soccer team, the math club and the Craftsman.

Jennifer tends to study two hours a day. When asked if she had any special methods of studying she answered, "I just concentrate on what I'm doing."

Besides academics, Jennifer enjoys her music. She plays the flute and has been in band since her freshman year.

Jennifer kept a grade point average of 3.8 during her junior year and has a cummulative of a 3.6 average.

After graduation, Jennifer plans to go on to college to major in either Chemistry or Pre-Medicine.

SENIOR BIO

SWIM ARTISTS

Tech has two outstanding winners, Nancy Kurtz and Laurel Wozniak. Both girls are on Tech's girls swim team and they both have chosen Commercial Art as their shop.

Whether she's swimming or painting, out on the basketball courts or pitching a softball game, senior Nancy Kurtz always keeps occupied.

Nancy, now on the swim team for four years stated, "I never swam competitively before my freshman year and didn't even know how to swim very well." She participates in the 50 yard and 100 yard backstroke and also specializes in the 50 and 100 yard freestyle.

Nancy is currently in her 3rd year of Commercial Art. She has entered many competitions including the Women's Club and Journal Art Contest where she was awarded a first place gold medal along with $200. Nancy took a second place and a honorable mention at Wisconsin State Fair and she also received a certificate in the Scholastic Art Award Show for outstanding work.

"I like the challenge of creating an image as accurately as possible in different medias and capturing and studying an object gives one a different insight on how it looks and feels. You notice the smallest detail that most people never care to fix," Nancy said.

Besides all her efforts that go into her artwork, Nancy also has been on the varsity softball team for 4 years, beginning her freshman year as pitcher. "I think I enjoy softball over all the other sports because it seems to come much easier to me and I just love it," concluded Nancy.

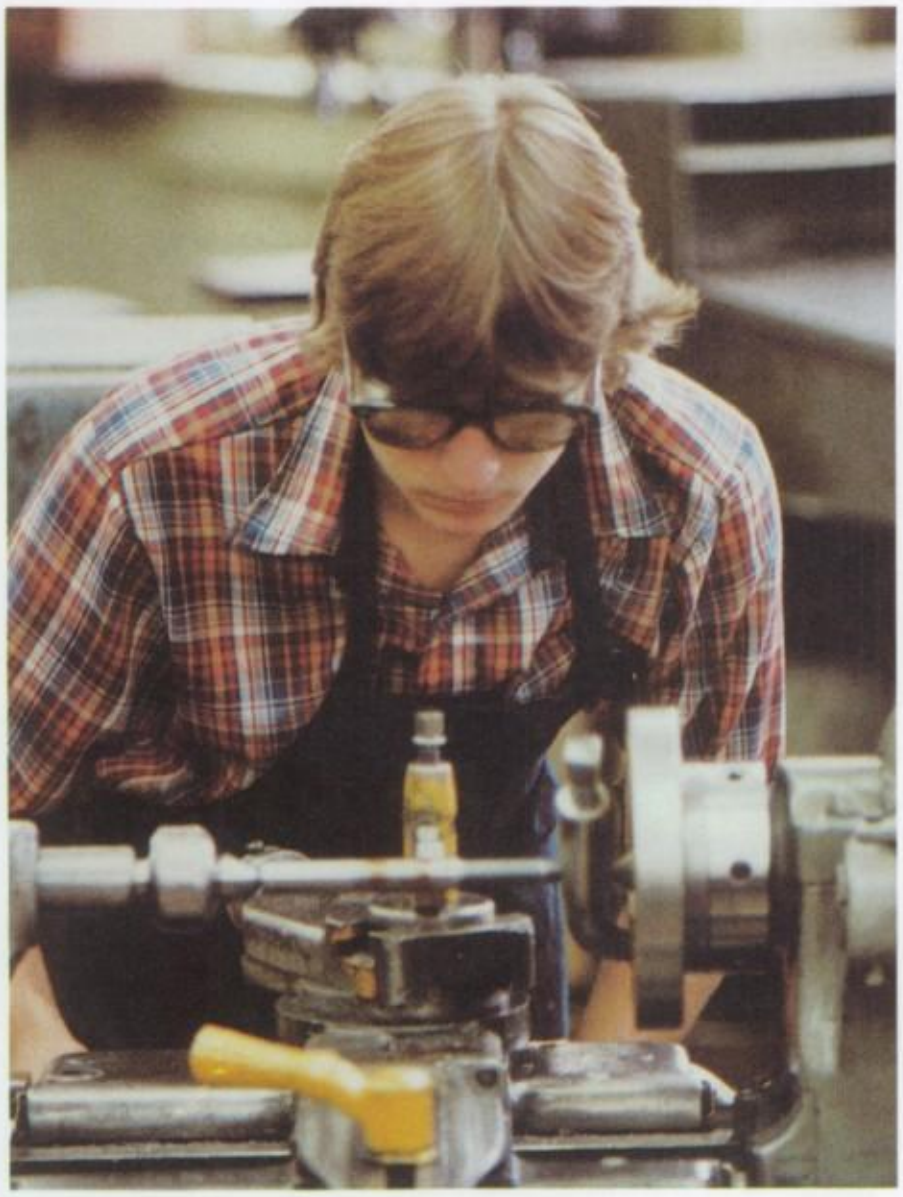
In the conference last year, Laurel Wozniak, top swimmer of Tech's varsity girls swim team, placed 1st in the 100 yard backstroke with a time of 1 minute, 1 second and 3rd in the 200 yard I.M. with a time of 2 minutes, 32 seconds.

Laurel went to Rufus King College Bound high school for 2 years. Laurel's freshman and sophomore classes consisted of our schools junior and senior courses, such as British and American Authors, U.S. Histoy and Biology II. College Skills, a class at Rufus King, prepared her for all college entrance exams.

King's girls' swim team was cut Laurel's sophomore year, but she wasn't able to swim because of a broken collarbone. Beth Kissinger and Laurel Wozniak, two of the cities finest swimmers, decided then to come to Tech.

"Entering Tech my junior year, lead me into Commercial Art for my shop because I didn't need as much background information as I would have for the other shops," stated Laurel. One of her watercolor paintings was on display at the State Fair during the summer of '82.

Laurel will be going on to college but as for now she hasn't decided which college or a profession that she may be interested in.



Robert Makola, while staring at his stock, operates a lathe in machine shop with unequaled adeptness.

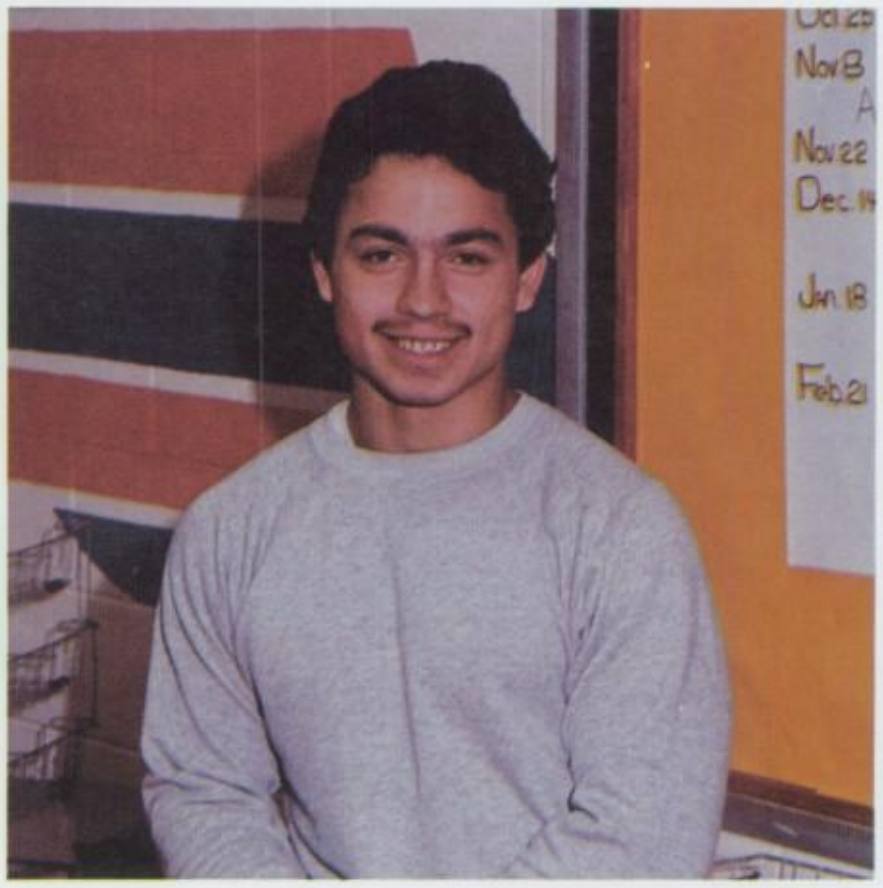
SENIOR BIO

PEPPE: BOY OF THE YEAR



High honors were granted to Peppe Ybanez from Gov. Dreyfus in August of 1981 and 1982. In the Boys' Club the senior made "Boy of the Year" for two years in a row, 1981 and 1982. His first year he took runner-up in state. In 1982, Peppe took first place in State Class B competition and went on to take second in the Regional section, only one step away from National competition. Peppe's support came from the Seher Unit Boy's Club which he attends.

Peppe is noted for a bench press of 330 lbs., a squat lift of 400 lbs. and a dead lift of 450 lbs. It is even more impressive that he can lift these massive weights since he only weights 165 lbs. himself. In August of 1982, Peppe attended a Powerlifting Tournament at Milwaukee's Christian Center and took first place. He also uses his strength to box and took first place in state at Downtown Eagles Boxing Club during July of 1982. Peppe was undefeated for the entire season with 3 by technical knock-outs, 22 by knock-outs and the remaining 25 by points.

Keystone Club, a community service for young adults coordinated by the Boy's Club, is where Peppe has been president for 3 years. During the Easter of 1982, Peppe and his club went on a conference trip to Orlando, Florida where the club participated in meetings with students from around the world. "It was one of the best learning activities in my life," stated Peppe, "For it helped the people serve the people and benefit the people of young leaders of America."

"I hope to get into the Air Force Academy after I graduate because my goal in life is to be an astronaut for NASA," concluded Peppe.

SENIOR BIO

BRAIN CLONES

Two Tech seniors, Jay Olsen, a member of the chemistry shop, and Dave Meer, a pre-engineer, not only earned the highest Scholastic Aptitude Test(SAT) scores ever achieved by Tech students, but also qualified as National Merit Scholarship semi-finalists.

The SAT, a college entrance exam, consists of three verbal sections and two math sections. Based on the number a student gets correct minus a fraction of the number a student gets wrong, points are awarded to the student, with a maximum of 800 points for each the math and the verbal sections. Jay scored 710 on the verbal and 780 on the math for a total of 1490. Dave also received 710 on the verbal and 790 on the math for a total of 1500.

On the Pre-Scholastic Aptitude Test (PSAT), Jay scored 220 points and Dave received 209 to qualify both for the National Merit Scholarship program. Currently, both are semi-finalists in the program which qualifies them for several scholarships.

Besides their test score similarities, both Jay and Dave participate in the Math Club. Dave currently serves as President and Jay works as Vice-President of this large organization, and both have been initiated into Mu Alpha Theta, a national fraternity for Math students. Also, these two enjoy playing sheepshead, Dungeons & Dragons, and building models.

Despite their many similarities, these two Techites are not clones. Jay served with Tech's JROTC for three years, working with the Drill Team and holding the post of Group Commander. He works in the bookstore and hopes to attend U.W.-Madison majoring in Chemical Engineering.

Dave , on the other hand, is co-editor of the Artisan, Tech's yearbook, and a member of the National Honor Society. He spends most of his summer biking and camping and plans to attend MIT to study Industrial Engineering.

SENIOR BIO

TROJANS ENLIST

For many seniors, the question, "What am I going to do for the rest of my life?", plagues them throughout their last year at Tech. Some choose to go to work after getting their diploma, many through an apprenticeship program. Others go on to college. And a select few join the United States Armed Forces. Four Tech seniors, Bob Babich, Paul Makowski, Charles Lembach, and John Christian, have already chosen to serve their country after graduation.

Bob Babich, a pre-engineer, chose to join the U.S. Army for two years to help pay for college. "Joining the army will help me make it through college without borrowing money from my parents," noted Bob. Only a few weeks after graduation, on June 28th, Bob will leave for El Paso for boot camp and training as a Hawk missile crew member.

Another pre-engineer, Paul Makowski, decided to attend college and join the Air Force at the same time by enlisting at the U.S. Air Force Academy. In late August, Paul begins four years of rigorous schooling at the Academy in Colorado Springs, Colorado. After graduating as an officer in the U.S. Air Force, Paul plans on training two additional years to become a pilot. Eventually, he plans to retire from the Air Force to fly commercially.

Charles Lembach, an electronics students, signed up for the Army's college bound program. First, he will serve in the Army for four years. Then, the Army pays for his four years of college education. And finally, Charles plans to return to the Army to take up a career in electronic warfare.

John Christian, a member of the Aero shop, signed up with the Marines. He chose this branch of the services because he hopes to make a career out of aero mechanics, and the Marines offer a six year training program in this specialized field.

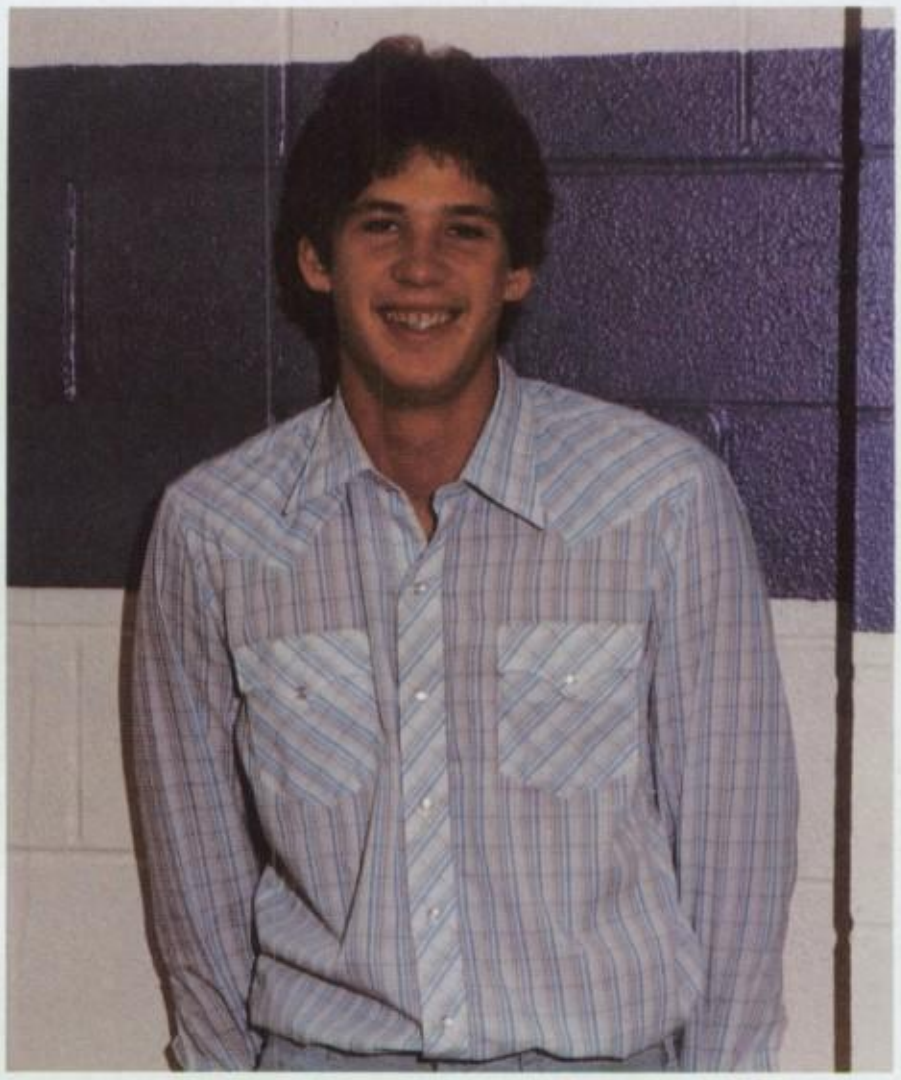
SENIOR BIO

ALL-STATE STAR



What other Tech baseball player could make the varsity team his freshman year, All-City as a pitcher his sophomore year, and All-State as an outfielder in his junior year besides Merv Waukau?

The coaches around the state chose Merv, a senior in the Metal Fabrications Shop at Tech, for the 1st All-State Team because not only did he play a consistent defense in right field, he also maintained a .511 batting average throughout the season. His good defense and excellent ability to get a hit in pressure situations helped lead the Trojans to second place in the State.

Merv and his family moved from an Indian Reservation near Shawano, Wisconsin to Milwaukee when he was 2 years old. Merv started playing organized baseball at age 10 for the San Diego Padres at Wilson Park as a pitcher.

Besides playing for Tech's baseball team, Merv also works on the school's newspaper, the *Craftsman,* and plays on the varsity basketball team. He also finds the time to finish his homework, maintaining a 3.2 average during the season, which isn't easy to do since he practices 3 hours a day, 6 days a week during the baseball season.

Merv plans to continue his education, preferably on a baseball scholarship. "I'd like to play down South: in Florida, Oklahoma, or Hawaii," commented Merv.

SENIOR BIO

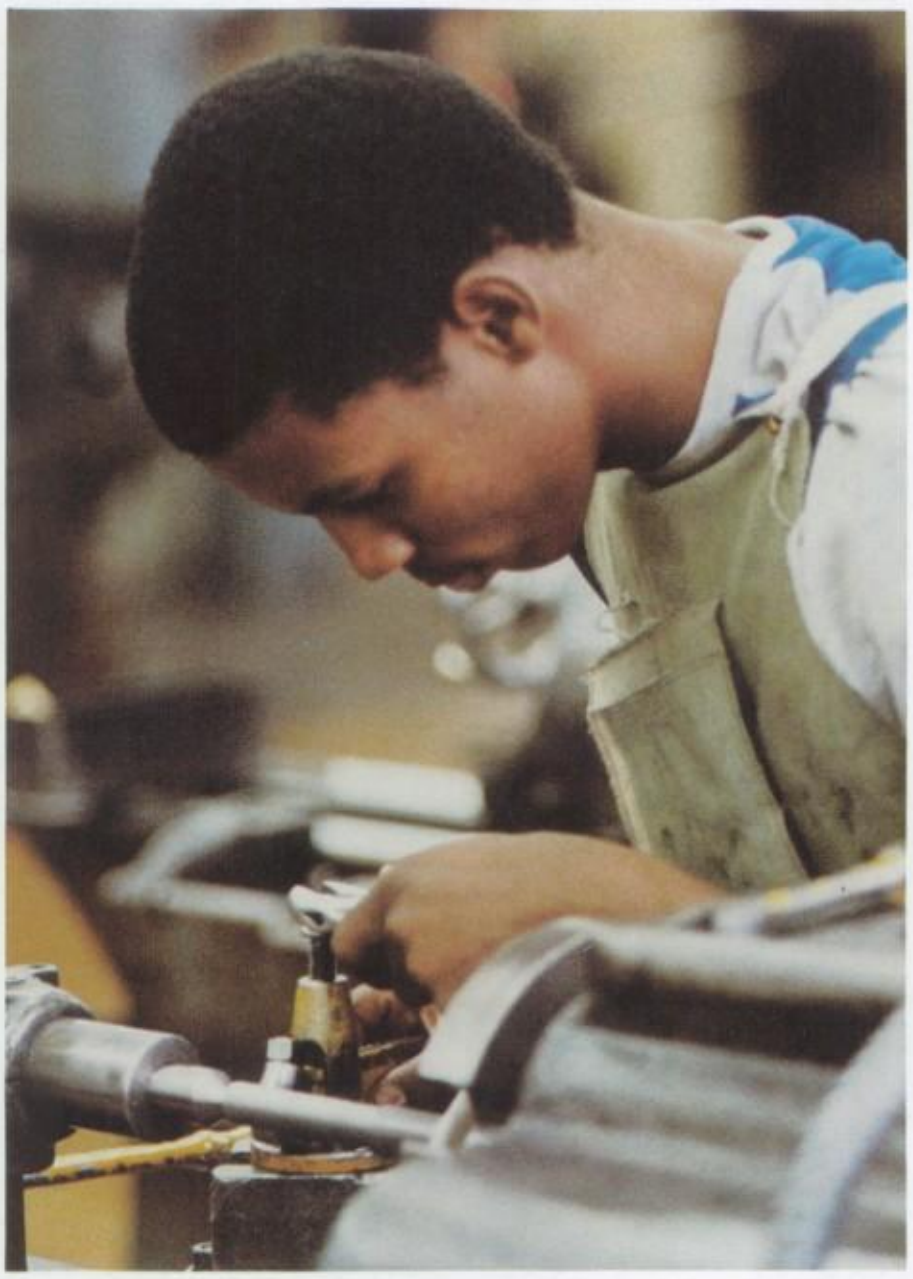
TECH LEADERS

Last year, five Tech seniors, Scott Castelaz, Dave Zinky, Darin Costello, Greg Zych, and Bart Chamberlain went to Badger Boy's State in Ripon.

Each year, roughly 2,000 juniors from around Wisconsin gather together in Ripon for a week to experience government first hand. They form a community and take a position in the executive branch of the government that runs the community.

The five Techites who attended the convention were chosen by Tech's teaching staff for their leadership abilities. Dave Zinky, a pre-engineer and member of the cross country and track teams, Darin Costello, a machinest who works on the *Craftsman* and wrestles for Tech, Bart Chamberlain, a chemistry shop student and member of the math and chess clubs at Tech, Greg Zych, another pre-engineer who plays football and participates in track, and Scott Castelaz, an electronics student who plays varsity soccer and is an editor of the *Craftsman* and the *Artisan,* represented Tech at Ripon.

"Badger Boy's State is an experience. Juniors from all around the state are picked to learn the responsibilities of leadership through the executive branch of government," stated Bart Chamberlain.



Armed with a wrench, Rodney Crape makes last minute adjustments to his lathe's bit vise.

SENIOR BIO

GORSKI ABROAD

Last summer, senior Jerry Gorski spent two months touring West Germany, living with German families, and learning about the West German culture.

Jerry and 160 other students spent July and August travelling throughout West Germany. The trip, sponsored by the American Field Service (A.F.S.), allowed Jerry to experience German culture firsthand, spending most of his time living with three different families in Hamburg and Bremen. Jerry spent the rest of his time attending a German school or sightseeing.

The 160 A.F.S. students not only toured Bremen and Hamburg, the second largest city in Germany, but they also travelled through the northern part of the country. Jerry also saw the famous East German border.

"German kids are basically like American kids except for a few who act like Americans from the 60's," noted Jerry. "I even saw a few punk rockers."

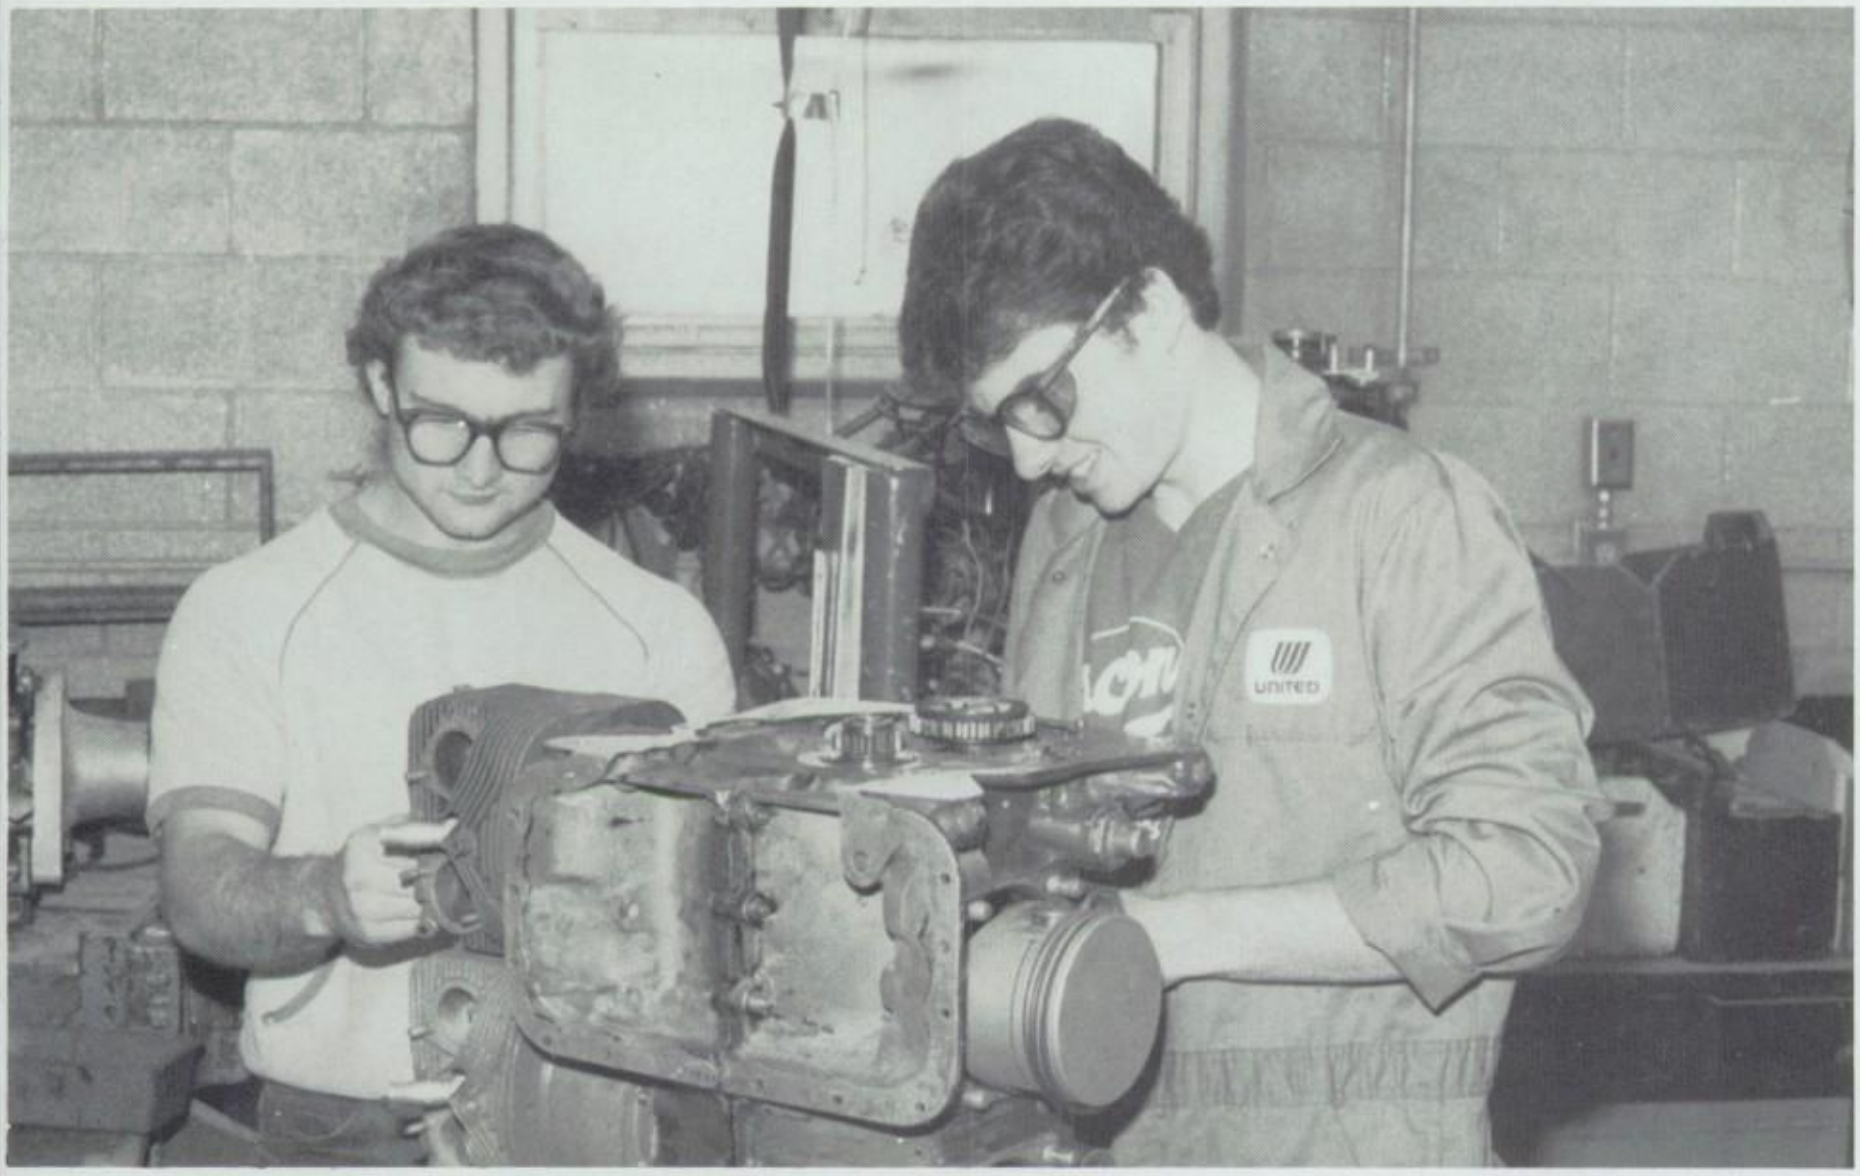
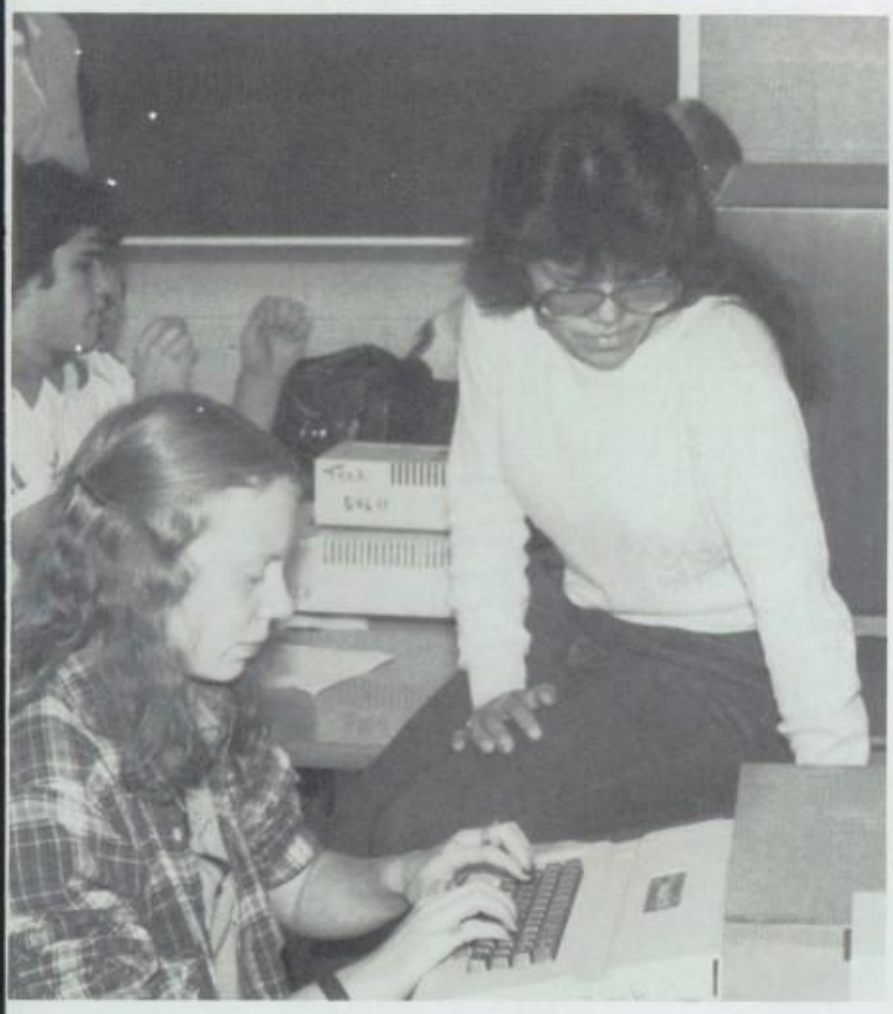
SENIORS PLAN FOR FUTURE



John Leone and Jerome Czubinski skillfully labor on an aircraft engine while in aero shop.



Typist Tina Farber puts her clerical skills to the test on computer while Isabelle Torrez looks on attentively.

During 5th hour, Karen Schlaikowski and Jaymie Vandusen discuss their probability and statistics homework with enthusiasm.

Mark Zaboklicki and John Brasnov talk while making minor adjustments on the lathe during 7th and 8th hour machine shop.

LOOK AT STATE

After placing third in the city in singles tennis play, Junior Clare Look went on to the state tennis tournament, becoming the first Tech girl's tennis player to make it to state.

The trip to the state meet culminated a 4 - 2 season for Clare, an architectural drafting student. Clare, Tech's number one singles player, has participated in the sport since the age of 10. She captured first place in the Column's Tennis Tournament at 14. In her freshman year, she and Claire Napierala took 4th place in number one doubles competition in the city. Over the summer, *The Milwaukee Journal* printed a article honoring Clare and her sister for their tennis achievements.

Clare also runs for Tech's girl's track team. She is a member of the 2 - mile relay team that captured 1st in City Outdoor and 2nd in City Indoor last year. She also figure skates.

Clare's participation in sports does not hamper her grade point, however, which she maintains at 3.7. "Sometimes it's really hard to keep up my grades and still do my best at tennis and track," noted Clare.

She plans to continue her education in architecture at college while striving to reach Wimbleton or the U.S. Open.

Not quite sure if her work is right, Denise Gonzales asks Judy Orr for some help.

SUPER SOLO

Junior Eric Jordan proved his singing ability when he soloed his way to a medal in city - wide singing competition last year.

Eric, a Commerical Art student began his singing career at a young age, following in the footsteps of his sister Lisa who sang with Tech's vocal ensemble. In his sophomore year, he sang "One In A Million You" at the Winter Counterpoint Concert. Ms. Haywood, Tech's music and dance teacher, noting Eric's talent, chose him to compete with other students at an annual musical competition held at Vincent High School. Eric came home with a medal.

"I always enjoyed singing," noted Eric, "It gives me a chance to do something that really makes me feel good."

Eric, continuing his interest in singing, practices two to three hours a day, keeping his voice in shape for his work with Tech's vocal ensemble.

A NEW BEGINNING

What does it feel like to leave your homeland to try to start a new life in a different country? Junior Jovo Dragicevic knows.

Jovo, a native of the city Knin in Dalmatia, Yugoslavia, moved to the United States with his family. His father, seeing the economy of Yugoslavia declining, felt that the family could have a better life in the States and decided to move in with his brother, who happened to live in Milwaukee.

Jovo still speaks his native language, Serbian, at home, mainly because he is the only member of his family who can speak English fluently. "I guess I can speak English better than the rest of my family because I've gone to school here in the states longer than anyone in my family," commented Jovo. Jovo started school in first grade at age 7 in Knin, for Yugoslavian schools have no kindergarten.

Jovo, an electronics student, chose to attend Milwaukee Tech because of the vocational education program. He also serves the school by working on the *Artisan*. In his 2nd year on the staff, Jovo is the sports' editor.

Jovo also enjoys soccer. "I started playing soccer when I was 8 because, in Yugoslavia, it's the national sport," explained Jovo.

Jovo plans on furthering his career in electronics at U.W. Madison after graduating from Tech.

Jovo Dragicevic

Tooting his own horn is Terrance Simons who practices with other Tech Students under the direction of band leader, Mr. Simiele.

The just can't stop eating them "Jays" Sam Dawson and Tony Burell take a break to get some quick energy before their next class.

Designing a new fashion for Paris models is Michelle Premetz. Michelle is taking Commercial Art as her shop.

Monkey see, monkey do is demonstrated by Marty Mosher mimicing John Galioto whose cover design was chosen for the new guidance pamphlet.

STAR ARTIST

Art isn't just coloring inside the lines for Sophomore Commercial Art student John Galioto. John designed the cover of the 1982-83 Milwaukee Tech course catalog.

Art teacher Mr. Jacobs, after seeing some of John's sketches, asked him to design a new cover for the course catalog that would replace the traditional Trojan Head symbol, making the book look less sexist.

John, who carries a B average in his art classes, has enjoyed drawing since grade school. He came to Tech to draw, but had trouble deciding between the Commercial Art shop and the Architectural Drafting shop. "I chose Commercial Art because I like to draw more or less free hand," stated John.

He plans on continuing his art career at Tech by entering the scholastic art show this year with a graphic or commercial design.

NEW LINEMAN

The middle of the defensive line of Tech's varsity football team is no place for the weak-hearted. Even some seniors have trouble playing there. And yet, Lee Coleman, a sophomore, started in Tech's defensive line.

Lee played his best games against Waukesha North, his first start, and against Kenosha Tremper. Unfortunately, he suffered a back injury in the Tremper game which put him out of play for two weeks. Even though he returned to finish the season, Lee felt that he "didn't play up to potential after the injury."

"For me to improve next year, I'll have to lift weights over the summer and work on my quickness," commented Lee. Senior Bill Rouleau added, "It's so hard to block against Lee because he's so quick, and if you match his speed, he overpowers you."

Lee was not the only sophomore to make the varsity squad. Brian Mickey also worked as back-up quarterback.

Concentrtion is the key for excellence as Jim Felski demonstrates using his artistic abilities.

MATH TREK

Last August, sophomores Chris Smith and Pete Lenz, along with fifteen other math club members, went to St. Louis by bus to participate in a national competition for Mu Alpha Theta held annually. Last year it was held at Washington University in St. Louis.

Chris and Pete matched math skills with hundreds of students from all around the country. In their free time they attended seminars, held on campus, on chosen topics of math ranging from Algebra to Geometry, to Advanced Calculus, so that they could prepare before the meets and learn more about math's practical applications.

But the trip wasn't all work. The convention included time for fun like checkers, chess and computer games. They also visited Six Flags over St. Louis and the St. Louis Arch. "It was great, something that I will never forget," commented Chris Smith.

"The whole trip didn't cost that much either, because during the year the math club sold carnations and that helped defray the costs of transportation and room and board," concluded Pete Lenz.

Freshman Kathy Brahm has found success in volleyball here at Tech.

BRAHM STARS

Would you believe that a freshman started on one of Tech's varsity teams that captured a sectional title?

Kathy Brahm did. She earned her position as one of the six starters for Tech's volleyball team, helped the team capture 1st place at the sectional tournament, and earned a major letter in the process.

Kathy, a volleyball player since 4th grade, came to Tech from Sacred Heart School, where she plays for the CYO team during Tech's off-season. "My sister, Jeannie, started me out on the right foot in volleyball," noted Kathy. "She taught me the basics and helped me improve my skills."

"When I first joined Tech's team, I was really scared. But then, I began to feel more at ease as I got to know the other girls on the team until I felt I really belonged. The other girls welcomed me very warmly," commented Kathy.

Next year, Kathy plans to continue playing volleyball for Tech in what she hopes is another fine season.

Denise Quint finishes her new design in Exploratory Print.

NO CHOICE?

One of the most interesting and unique aspects of Tech's curriculum is the exploratory shop program for freshmen. No other school in the city runs a class similar to it.

Exploratory shop takes Tech freshmen on a tour of all the possible shop courses available at Tech, allowing them two weeks in each area to gain "hands-on" experience to see how they like the shop. Although the program works effectively, some freshmen feel that they must choose their shops too early in the year. Early in the second semester, freshmen fill out their programs, and must decide which shop to take after having gone through only half of the exploratory program.

"If only we could get through all of the shops before we have to choose, it would be great," commented freshman Rich Ross.

Other freshmen feel that the exploratory program is too one-sided. "They should widen the fields more to include more shops oriented for women," remarked freshman Lisa Jacobs. "Most of the shops right now are oriented more for the boys."

FROSH SHRINK

What's worse than being a freshman at Tech? How about being a small freshman. Many students at Tech have noticed that freshmen get smaller and smaller each year. Some upperclassmen may find themselves asking questions like: What happened to those freshman to make them so small? Did their moms accidentally drop them in trash compactors when they were young? Don't they eat their vegetables?

But these small freshman must endure many hardships which larger students never dream of facing. How would you like to walk down the hall and accidentally run into someone's belt buckle? Or to trip over somone's shoelace while running to class? Not only must the small freshman endure these high school horrors, they must also put up with the normal freshie's problems: perfume and shaving cream. And some miniature freshmen even face the perils of getting stuck into a wastebasket in the cafeteria and not being able to climb out. Obviously, life is rough for the smaller members of the class of 86 at Tech.

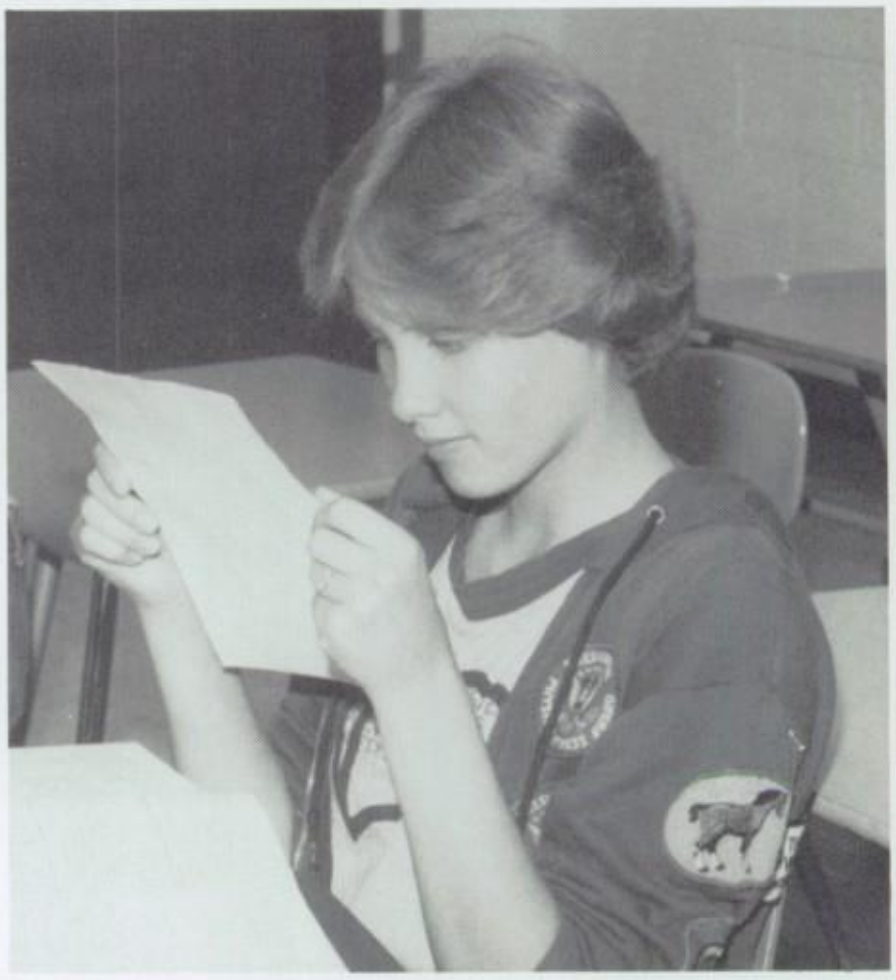
Kris Stika, better known as "Joel's little sister", feels that seniors boss freshmen around too much.



SENIORS ARE. . .

The seniors and the freshmen have opposed one another since the beginning of the high school era. Most people at Milwaukee Tech know what the typical senior thinks of a typical freshman, but do they know what the typical freshman thinks of a senior? Let's take a look at a few of the "typical" freshmen's good honest opinions and comments .....

Kevin Jackson, H.R. 296. "Seniors aren't that bad, but I wouldn't do the things they do to freshmen when I become a senior."

Scott Klafke, H.R. 157. "I think seniors are all right and I can't wait to be one myself."

Dale Palkowski, H.R. 155. "I think the seniors are unruly and they push the freshmen around just because we are new to the school."

Kris Stika, H.R. 388. "Artisan seniors send me running around the building. They think they're the bosses of the whole place!"

Andrew Garncarz, H.R. 397. "Give to the zoo, support a senior!"

Janet Trevisan, H.R. 290. "They are real snobs that walk around with their noses in the air. They are worse than freshies!"

Michelle Collins, H.R. 219. "Seniors are considered slobs, they always treat us freshies like dirt. Just wait until we're seniors!"

Eddie Patton, H.R. 265. "All seniors are the back end of a donkey's .....!"

Kelly Laast, H.R. 193. "They are very conceited and think they can use the freshies, but they can't!"

Sherry Weber, H.R. 219. "They are perverts! They think they can push around all the freshies."

A great majoriety of freshmen are sick of being treated like freshmen and can't wait to be upperclassmen. Life isn't easy for first year students at Milwaukee Tech.

A good reason why seniors look down on freshmen is their size. In future typing classes, as Steve Reilly demonstrates, new chairs will have to be purchased just so the freshmen can touch the floor.

FRESHIES?

Every 8th grader in the city knows what those 7 ft. tall seniors at Milwaukee Tech think of freshmen. They all have heard that those Tech seniors detest freshies so much that they do anything to make life hard for the new students. Are seniors at Tech really that cold-hearted? What do they really think of freshmen?

"Freshman is a disease."-Steve Schuld.

"Freshmen seem to be shrinking. They get shorter and shorter each year."-Mike Behnke.

"They really don't act as scared as they used to, and some of them are even pretty outgoing."-Felite Harmon.

"Freshman: generally incompetent to act as representatives of the human race."-Paul Hugdahl.

"They're just like most other people but somewhat smaller and sillier at times."-David Adams.

"Give a freshman a Playboy and he's happy for life."-Donnie Patton.

"They're always in the way."-Theo Merriweather.

"If freshmen are the leaders of the future, the world is really in trouble."-Dave Wagner.

"Freshmen are fun to watch, mainly on the first couple days of school."-Leonard Prescott.

Did you know that M & M's can save lives? These M & M boxes are used for two free minutes on a kidney dialysis machine.

M&M RESCUE

Mr. Komlodi, a machine shop teacher, has initiated a campaign to help an ailing friend with kidney problems.

How does he do it? By collecting old M&M boxes. The company which makes M&M's has promised 2 free minutes on the kidney dialysis machine for Mr. Komlodi's friend for every empty box. So, the machine shop teacher, along with several other teachers around Tech, including Mr Goessner, a drafting teacher, have set up boxes for used M&M boxes.

Mr. Komlodi has collected the boxes for over a year for his friend who needs an average of 30 minutes a day on the dialysis machine. "It makes me feel good to be able to do something to help him," commented Mr. Komlodi, "but I really don't want any rewards. I just want to help him."

FOOTBALL

TROJANS FINISH 3RD

The varsity football team started slowly but came back to take 3rd in the Milwaukee Area Conference this year. Losses to Bay View and Hamilton hurt the team's chances to repeat as conference champs.

In the game against Hamilton, a miscue cost Cliff Fischer a sure interception. Cliff tipped the ball and Hamilton's fullback caught the deflected pass and ran 9 yards for the winning touchdown. Bay View's running game simply overwhelmed Tech's defense. Bay View ran for more than 200 yards, while holding Tech's offense for the entire game. The biggest play was a 91 yard run by Bay View's halfback.

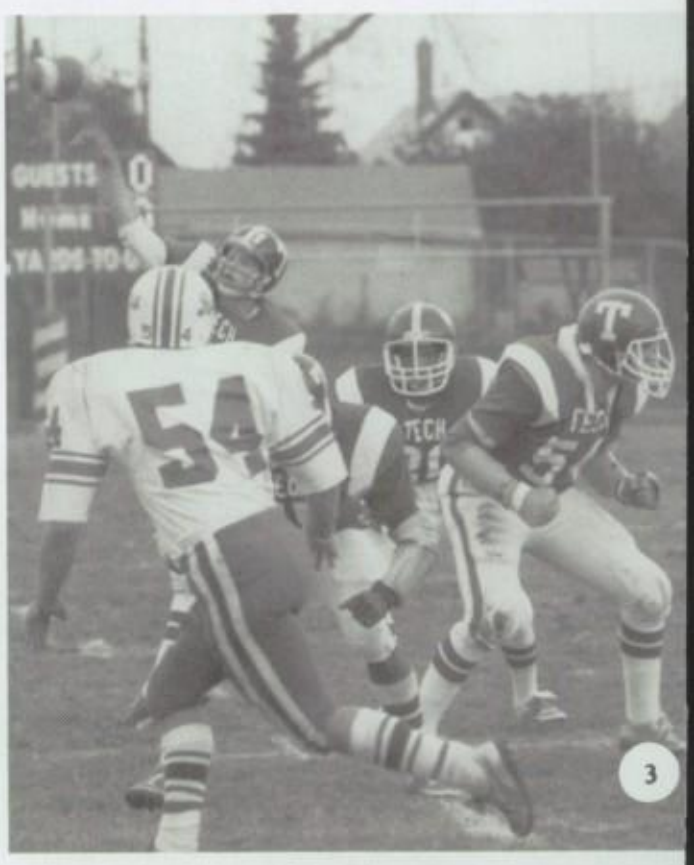
Tech scored impressive victories against Racine Park, South Division and Pulaski. In the Park game the combination of Tim Block to Fred Bobo resulted in a 91 yard pass for a touchdown in the final seconds of the game to beat Park 33-30. Tech shut-out both South and Pulaski.

"The overall season could have been better," replied Coach Konowalski, "There was just not enough contributions by the seniors."

Dan Foster, all-conference fullback last year, was switched to offensive guard and defensive tackle. Dan turned in an impressive year and earned the MVP for defense.

Tim Block, winning the last four games as quarterback, filled in for Tim Kehoe after Tim broke his arm in the Hamilton game.

"The best players returning to the team next year are Ralph Radtke and Fred Bobo," commented Coach Konowalski. Fred Bobo commented about the season, "It was a learning experience for those who first experienced varsity play. We all know we were state material and we are looking forward to state next year."



1.) *Concentrating on the count,* Derrick Lewis awaits the snap.
2.) *Tony Lagalbo looks on* as his teammates sack the quarterback.
3.) *Getting great protection* from his offensive line, Dave Skonecki gets off a pass.
4.) *Steve Knurowski and company* trounce the Rams' line.

3.) *Lee Coleman looks on* as his teammate struggles for yardage.

4.) *A Pulaski Ram* tackles Lee Coleman as he struggles to gain yards.

VOLLEYBALL

GIRLS CAPTURE 1ST

For the first time in Tech's history, the varsity volleyball team managed to serve, return, and spike their way to 1st place in the Regional playoffs.

The girl's started the season by defeating Bay View and North in their first two matches. In their third match, against Hamilton, the dominant volleyball team in the city, the pressure overcame Tech and the girls lost 2 out of 3 sets.

The girls overcame this loss and, under the leadership of senior Tammy Tarantino, finished the season with a good record, qualifying them for Regional competition. At the Regionals, the volleyball team defeated their opponents in set after set, ending up in first place.

Tammy Tarantino, the team's most valuable player, contributed greatly to the victories. "Tammy is probably the most enthusiastic and aggressive member of the team. She really helps the team stick together," commented Chris Kornburger, a junior on the team.

Two freshmen, Kathy Brahm and Linda Karsh, also played important roles in many of the volleyball team's victories. "Kathy, not knowing how the other team members played, did an outstanding job filling in," noted JoAnn Sulewski, another junior on the team.

VOLLEYBALL

Bay View	15-12	15- 7	9-15
Hamilton	9-15	15- 5	2-15
Tremper	16-14	9-15	2-15
Pulaski	11-15	15-11	15- 7
South	15-10	2-15	15-17
Park	9-15	3-15	15- 9

(Tech score first)

1.) *R. Minch and M. Collins* look on as K. Jankowski pops the ball up.

2.) *Bottom Row:* K. Ausberry, C. Mitchelle, L. Sliwiski, K. Jankowski, D. Syrokos. *Middle Row:* C. Deluca, J. Kronka, L. Daniels, D. Gans, R. Minch, A. Reiutleisch. *Top Row:* S. Ryan, V. Harrell, D. Austin, S. Stringer, M. Collins.

4.) *Bottom Row:* D. Sargeant, T. Tarantino, L. Karch. *Middle Row:* B. Moran, C. Kornburger, C. Maleski, K. Brahm. *Top Row:* R. Brown, J. Trewitski, C. Hron, J. Sulewski, K. Chamberlin.

SOCCER TEAMS FALTER

Tech had limited success on the soccer field in 1982, as the boy's team's record dropped to under .500 and the girl's team, lacking players, only played three games of the season.

Despite the fact that only 4 of 8 starters from last year returned, the boy's soccer team managed to complete the season with almost a .500 record. Under the leadership of Captains Steve Angeles and Mark Zawlocki with some help from most valuable players Jose Ramirez at half back, Yong Kang at full back, and Sam Kongla at forward, the boys finished fourth in the city-cross-over tournament. The team also attended its first WIAA State Tournament, but was eliminated by South in the first round.

"The soccer season started out very slow, but ended up better than I anticipated," stated Coach Birkholz. "Despite our loss of starters we found some good new players who should do better next year now that they have experience."

After the girls soccer team played only three games, Mr. Birkholz, coach of the team, and Mr. Dusold decided to cancel the rest of the season due to lack of participants.

Over 20 girls signed up for the team, but only 14 received their physical examiniation and 7 showed up for practice regularly. Sue Ristic, a junior who had played soccer since her freshman year, and Sue Milde, manager for the team, went from homeroom to homeroom recruiting. But their efforts did not gain many new members.

The 11 girl squad played three games, scoring only 1 goal, before Mr. Birkholz and Mr. Dusold were forced to cancel the remainder of the season.

1.) *Showing excellent form,* Steve Angeles used a corner kick.
2.) *Laying:* Paula Sontag. *Row two:* Sue Milde, Roxi Thompson, Isabel Torres, Deborah Turner, Gina Jaje, Rosanne Padron. *Top row:* Leann Wood, Sue Ristic, Sherry Retzloff, Gwendolyn Parker, Kim Blundon, Christine Blundon, Roxi Thompson, Carolyn Mitchell.
3.) *With great intensity,* Jose Ramirez charges the ball.
4.) *Using good defense,* Isabel Torres holds off the opponent.

BOYS' BASEBALL

BASEBALL TAKES 2ND

Tech's baseball team captured second place in the State Tournament at Wausau, boosted by consistent hitting and effective use of every player on the team.

The baseball season which ended in June of 1982 really began in the summer of 1981 when several varsity players travelled to Oklahoma State University for a batting camp. For many of the players, the camp paid off. "Merv Waukau is a perfect example of how effective this camp was," stated pitcher/first baseman Karl Drezek, "as he went to the camp last year and came back to hit .511 during the season."

Coach Konowalski used Merv's consistency by placing him second in the batting order. Second baseman Jim Logan, the lead-off hitter, often got on base. As Merv hit the ball, Jim would take off, usually leaving runners on first and third. The designated hitter, Mike Dukat, also hit well during the season, finishing with a .400 average.

A strong defense backed up Tech's offensive attack. All-state right-fielder Merv Waukau, center-fielder Tom Sowinski and left-fielder Karl Drezek along with reserve Larry Zeroth formed a strong outfield for Tech. When Larry Zeroth gunned down a Kenosha Tremper player at the plate in the City Championship, he demonstrated just how strong the outfield was. All city shortstop Doug Bart and third baseman Ricky Kartz provided extensive coverage of the left side of the infield.

Coach Tom Konowalski orchestrated his team well. He gave the signs to catcher Steve Knurowski who then relayed them to the pitcher. This method paid off, since Tech pitchers struck out more hitters while allowing the lowest number of earned runs in the conference. The coach also handled his runners well. In the State Championship, Mike Panfil, a pinch runner, scored Tech's only run of the game.

A third place finish in the Milwaukee Area Conference enabled Tech to advance to the Sectionals. The team defeated Madison, Oshkosh North, and Racine Park to earn a place in the State Championship game. In a tough defensive battle, Tech lost 2-1 to Appleton West. "We're gonna be there next year, too," said Karl Drezek.

1. *Swinging in perfect form,* Doug Bart hits the ball hard.
2. *With lightening speed,* Jim Logan steals second base.
3. *Whallopping the ball,* Jim Logan connects for a base hit.

GIRLS' SOFTBALL

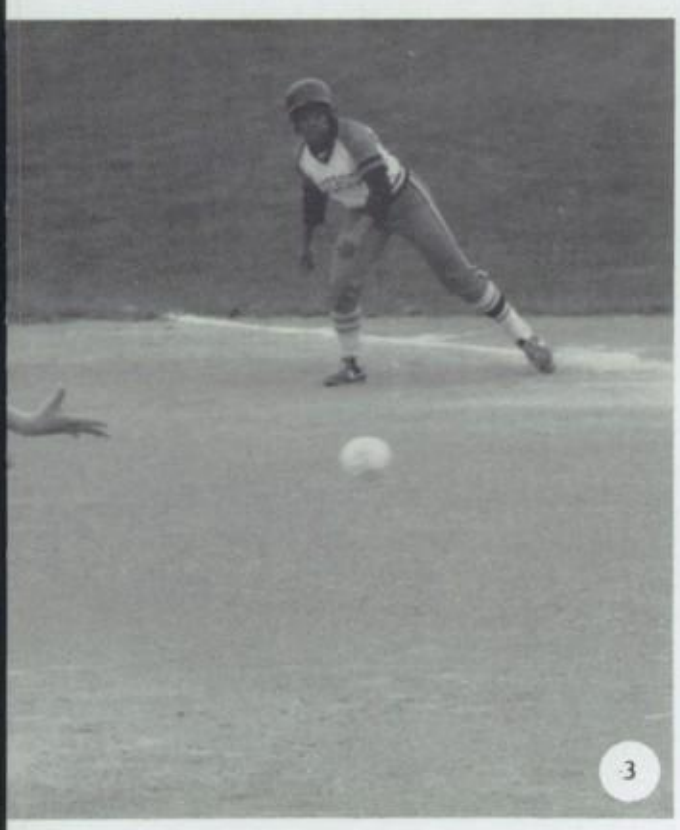
GIRLS WIN DIVISION

Four all city players led the girl's softball team to the Blue Division Title for the second consecutive year.

Sheila Popovich in center, Jewell Law at 1st base, Gloria Arns, pitching, and Carol Kopcyzinski playing 3rd base all won spots on the all-city team, helping Tech's tough defense. The defense really made a difference throughout the year. JoAnn Sulewski and Jewell Law combined for 5 double plays in one game against North.

The team came up against a tough rival in Vincent. Vincent's fast pitcher stopped Tech's offense, only allowing Tech to tie or win by a 1 run margin, in the two games between the teams.

Although the team lost to Bay View in sectionals and Waukesha North in a non-conference game, it finished better than ever before. "We have 9 girls with Varsity experience returning this year, 7 of those major letter winners," commented Mr. Leland, who coaches the team. "We're looking forward to another successful season in 1983."



1. *Doing a great job* catching behind the plate is Paulette Lee.
2. *With Joanne Sulewski* up to bat, the opposing team is worried.
3. *Pitcher Nancy Kurtz* throws another strike to lead Tech to victory.

BOYS' TRACK

INJURIES HURT TRACK

Despite many fine individual performances, injuries hampered the boy's track team, only allowing them to finish 5th in the conference.

Two important runners, Dave Zinky and Greg Zych, spent part of the season sitting out. Zinky broke his leg and Zych was injured in a car accident. Also, several 1981 champions, Reuben Mendoza, for example, did not return for the 1982 season, leaving the track team weak.

At the City Relays, the track team brought the title home for the first time ever. "That win in the relays was really the high point of the season for us," commented Coach Keiley. The team also finished 2nd in the State Sectionals, qualifying for the State Meet. At the sectionals, Dave Zinky finished the 880 in only 1:58, a very good time.

The team performed well in post-season competition, sending a host of runners to the State Meet. At State, Dave Zinky and Fred Bobo led the mile relay team to 2nd place. James Wilson also placed second in the state with a long-jump of 22' 5", a school record, while the 880 relay team of Jerome Tally, Fred Bobo, James Wilson, and Terry Gillion captured first with a time of 1:28.

"Speed, brains, and versatility are the strong points of our team," commented Derrick Lewis. 1982 was Mr. Kieley's last year as head track coach. Mr. Goral will succeed him in 1983.

1. *Racing to the finish* was senior Tim Block.

2. *Bottom Row:* Fred Bobo, Derrick Lewis, Joe Mcneil, Rob Cigale, Dave Zinky, Mike Dobs, Anthony Ray, Anthony Parrett, Doug Kissinger. *Second Row:* Coach Foster, Mark Neumann, Eric Winters, Tom Mckay, Oddie Eggleston, Mike Oliver, Rick Schuman, Kelly Horigan, John Bode, Len Jordan, Coach Magno. *Third Row:* Kurt Schroeder, Brandon Stinson, Dan Studer, Ron Coleman, Chris Hartzeim, Greg Kraemer, Rob Sitzberger, Greg Zych, Terry Quezaire. *Fourth Row:* Coach Keiley, Reggie Smith, Jim Sarandos, Wallace Powell, Antoine Wilson, Victor Rose, Jeremy Brownie, Peter Dufek, Tim Block, Charles Childs, John Skurulsky, Coach Goral. *Top Row:* Bob Sczney, Dan Libecki, Phil Walesa, Todd Daniels, Russ Michalski, Andy Kopca, Daryl Giese, Luis Donate, Calvin Slocumb, Todd Kucharski.

GIRLS RUN TO STATE MEET

Strength in the field events and increased participation helped the girl's track team hurdle past difficulties and place second in the Milwaukee Area Conference.

Twenty-five girls, the most ever out for track, gave the team the depth it lacked in the past. Cathy Wojciechowski in the high jump and Lisa Washington in the long jump along with Theresa Thurman and Marie Johnson in the shotput and discus made Tech almost unbeatable in the field events. With the addition of the two mile relay event to girl's track, the distance runners also played an important part in Tech's best season ever. The new two mile relay team consisted of Kathy Fischer, Sheila Neal, Lisa Hagen, and Clare Look. The sprinters also contributed to the fine season, with Vivian Williams and Nena Perkins leading the way.

The girls overcame a tough Bay View team but fell behind Marshall to finish second in the Conference Outdoor Meet. The team advanced to the state sectionals and, after placing third, made it to state for the first time. High-jumper Kathy Wojciechowski, long-jumper Lisa Washington, and the mile relay team of Kathy Fischer, Sheila Neal, Vivian Williams and Nena Perkins qualified for the State Meet in Madison. Lacking experience in state competition, the team did not finish well.

Although many seniors left the team last year, the girls hope to do well again this year. "We're looking forward to another good season with a lot of good runners returning," remarked senior Deborah Potega. Ms. Wilson, the coach, also feels good about the coming year. "If we get good freshmen as we did last year, we're gonna be really tough this year," she commented.

1. *With great concentration,* Theresa Thurman throws the discus.
2. *Cathy Wojciechowski* hurls her body over the high bar preparing herself for the landing.

Thurman, L. Marion.

GIRLS' TENNIS

TENNIS STEALS CITY

Tech's varsity boy's tennis team stole the city championship from first ranked Kenosha Tremper, winning 5 out of 6 titles at the city tournament.

Alan Wimes captured the No. 2 singles event and Tony Martinez outplayed his opponent to take No. 3 singles. Marlin Mosley and Frank Richards took the No. 2 doubles title while Jim Periard and Kent Fuchs won the No. 3 doubles event. Despite these impressive wins, the team needed a victory at No. 1 singles to take the city. The team's hopes hung on Mark Schoba's shoulders. Mark's match went into a tie-breaker, but he came out on top, securing the city title.

"Mark was the first No. 1 singles player from Tech to ever take the city championship," stated Coach Borowicz.

The team practiced every day from 3:30 to 6:00 to master the finer points of tennis. Marlin Mosley commented, "You can never really get enough practice. If we practiced from February to August it still wouldn't be enough." Even with all the practice, the team suffered from an inconsistent serve, which almost cost them 2nd place in the Conference Blue Division. "We didn't get our serves over until August even though we started early," noted Tom Rodgers.

The team named Coach Borowicz as their Most Valuable Person because of his help. "Even though the coach was all work, he was still a nice guy and like a father figure to us," remarked Jim Periard.

1. *Front Row:* Coach Leigeb, Denise Bart, Renee Pfeifer, Cindy Angelo, Wendy Swartwout, Andrea Galioto, Sharon Smith, Laura Schuman. *Back Row:* Mary Makowski, Rachael Napierala, Kim Singer, Clare Look, Lynda Trensch, Chris Smith, Jennifer Ligh.

GOLF

GOLF DRIVES TO 3RD

Led by the first Techite ever to score a hole-in-one, Jon Charles, the varsity golf team managed to place third in the city conference meet at Brown Deer Park last May.

Under the guidance of Mr. Tier, first-year coach, the team drove their way past several opponents. Against Hamilton, Jon Charles shot his hole-in-one and Steve Kasal earned two eagles, shots of two under par for the hole, leading the team to victory.

"Mr. Tier really did a good job for his first year as coach," commented Steve Kasal.

"Lack of consistence and experience hurt the team last year, but the sound play of the J.V. team, Ralph Ratke and Jeff Schlas, is hopeful," states Coach Tier.

GIRLS' SWIM

NEW COACH FOR SWIM

Tech's girl's swim team faced a dismal season. After losing 6 seniors from the '82 team, leaving only 3 experienced swimmers to return, the team, already small, had to stroke through the first part of the season with only a temporary coach.

Seniors Nancy Kurtz and Laurel Wozniak, along with Junior Paula Krystowiak, led the young, inexperienced team through the first 3 weeks of the season. Finally, Debbie Franson took over the coaching duties from Mr. Sarenac, the temporary coach. Coach Franson immediately began working on the swimmer's stamina, using a new work out cycle. "Debbie's special attention helped everyone to cut their times," stated sophomore breaststroker Susan Kurtz.

"Having a small team was our biggest disadvantage, but our strong swimmers usually pulled us through. In a meet against Pulaski, we only lost by a margin of 1 point," explained Coach Franson.

Sophomore Cary Krystowiak and Laurel Wozniak swam well during the season. Both Cary, who competed in the 200 and 500 freestyle events, and Laurel, who swam in the 100 fly, 100 breaststroke, and 200 medley, placed in the top 5 at the City Meet.

"The team really showed an improvement at the end of the season," noted Franson.

BOYS' SWIM

SWIM LOSES TITLE

For the first time in 16 years, Milwaukee Tech's swim team failed to bring home the Conference Championship, despite strong individual efforts by senior Jim Woyte, sophomore Mike Carter, and senior Jeff Peterson. The team finished third at the MAC championship meet behind Racine Park and Kenosha Tremper.

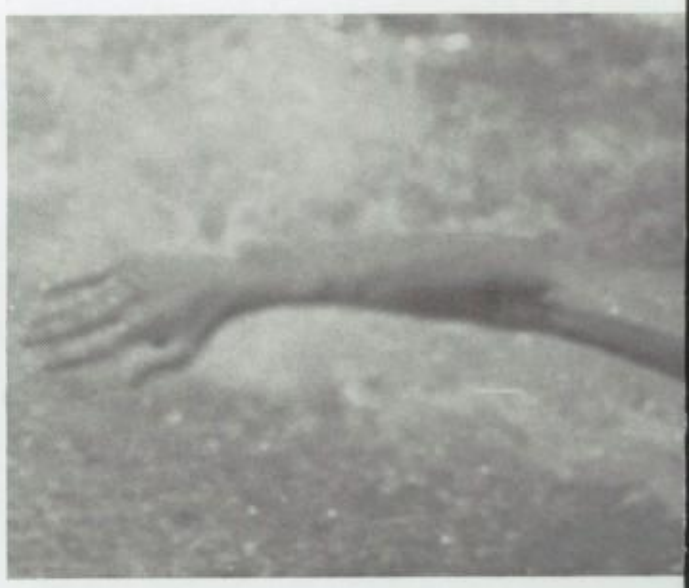
Under a new coach, Mr. Sarenac, the swim team began practicing earlier this year, using a shorter but quicker practice routine. Despite the loss of 4 supposedly returning lettermen to jobs and other activities, the team managed to win many of its dual meets. At the Menominee Falls Invitational, Tech took 2nd out of 6 teams. "The Menominee Falls meet was probably our best invitational of the season because most of the team placed high," noted Chris Speier, a senior free-styler.

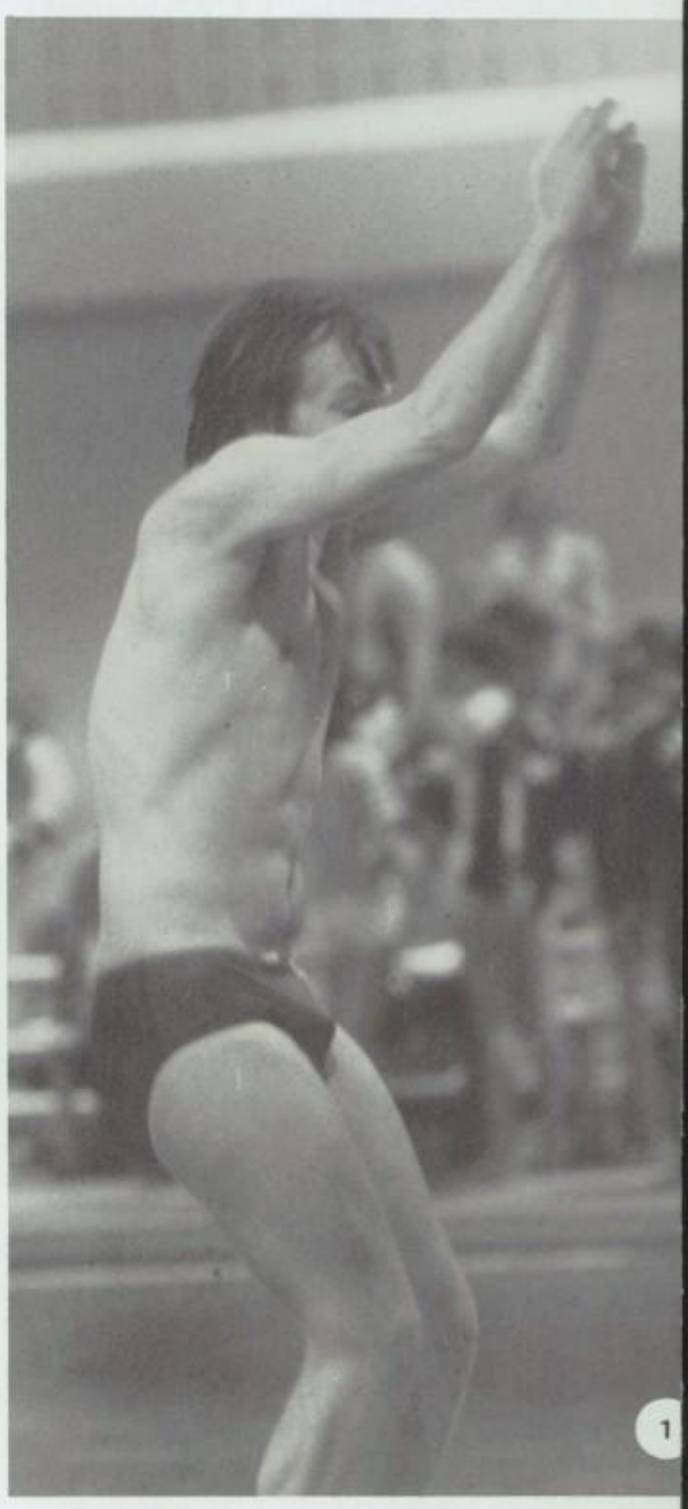
At the Milwaukee Area Conference Relays, the team placed 3rd again, behind Kenosha and Racine. In the MAC Championship meet, John Woyte brought home the gold in the 100 breastroke for the second year in a row. Mike Carter finished 2nd in the 100 backstroke and Jeff Peterson took 2nd in the 100 fly.

In the last meet of the season, the State Sectionals, Tech managed to finish 3rd again. Jim Woyte captured 2nd place in the 100 breastroke while both Mike Carter and Jeff Peterson came in 6th in their events. Jim, the only member of the team to earn a place at the State meet, did not place.

Meanwhile, the younger Tech swimmers had an exceptional season, capturing 1st in the MAC Freshman-Sophomore Championship and 2nd in the MAC Freshman-Sophomore Relays, giving Tech hope for more Conference Championships in the future.

"I feel our swim team did pretty well this season, mainly because we had swimmers who really wanted to work," commented Tom Saskowski, 200 and 500 free-style swimmer.





2. *Varsity/Bottom:* J. Sandahl, J. Krueger, T. Woyte, C. Camp, T. Michaels, G. Tyler, S. Stone, T. Saskowski. *Top:* K. Kaniasty, P. Dufek, C. Speier, S. Kasperzak, J. Schnapp, G. Pederson, A. Krumrai, J. Woyte, M. Carter, R. Rydlewicz(MGR), G. Roethle.

BOYS' BASKETBALL

SHOOTING FOR STATE

Often number 1 throughout the season, Tech's Boy's Basketball team started out strong this season, finally posting a 7-1 record overall and a 6-1 record in the conference.

After falling to a fired up Marshall team in the season opener, Tech came back and played hard to win. "Almost every game that we have played has been tough for us," commented Coach Win Parkinson. Tech's toughest game was against Madison which went down to the last minute with Tech holding on to a slim margin to win.

Tech has four returning lettermen from last year's team and was picked to finish first in the conference by the Milwaukee Journal at the start of the season, but the team ran into some troubles living up to these expectations. "We've had troubles rebounding so far this season, and we can't play an all-around good game. We'll play a good half, bottom out in the third quarter, and come back with a fairly strong fourth. You can't do that and expect to win," commented senior forward, Merv Waukau. "Even though we are having some troubles rebounding, I think we can out rebound them and take first in the conference," commented Coach Parkinson. Senior forward, Greg Leach also added, "If the team works hard, plays team ball, and executes good, we have a good chance of taking state."

Next years team looks promising. "There will be experienced guards, and down low, the juniors are getting playing time this season so they should do pretty good," commented Merv Waukau.

GIRLS' BASKETBALL

1ST AT SECTIONALS

Lead by solid shooting from Valerie Butler, Paulette Lee, and Andrea Maclain, the girl's varsity basketball team fought their way to 2nd place in their division, finishing with a conference record of 9-3.

During the season, the team easily defeated Madison and Bay View behind a solid defense. A 1-point margin cost the girls two of their three conference losses. In both the Washington and Marshall games, Tech lost in the last minute by a single point. The girls also lost to Hamilton, probably the best team in their division.

The team shot, jumped, and dribbled their way to 1st place in the South Milwaukee Sectionals in post-season play. After blowing away South 52-30, the team faced a dedicated Bay View squad. Valerie Butler scored the winning 2 points on a jumpshot to defeat the Redcats, 41-39. "In the South and Bay View games, we finally got it all together and played like a real team," commented senior Nancy Kurtz.

"We had a very good, solid team. What we lacked in height, we made up for in quickness," noted Coach Williams.

WRESTLING

WRESTLERS PIN MANY WINS

Tech's Varsity Wrestling team had a rough start this season but ended up with a record of 3-3. A lot of credit can go to the two most victorious wrestlers, Milton Cockroft and Jim Wierzelewski, both whom are seniors and have been wrestling ever since their freshman year.

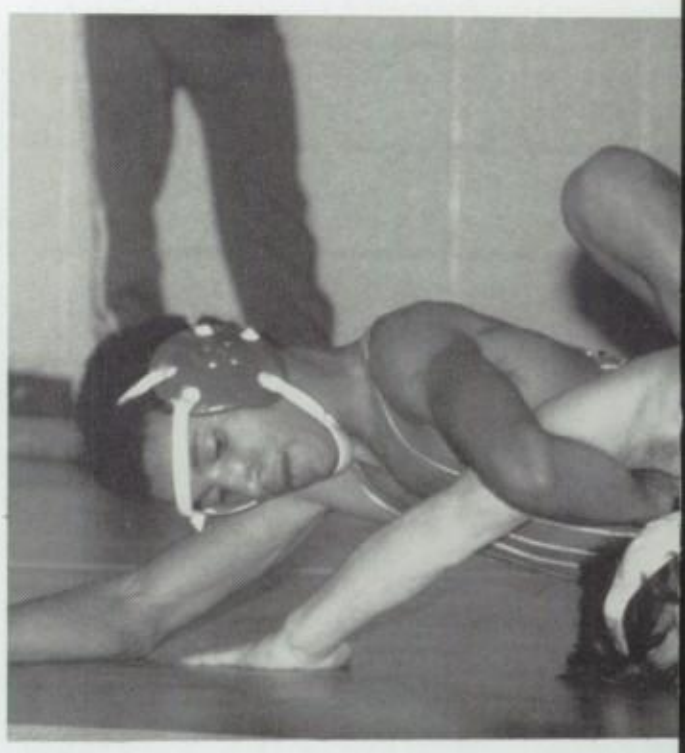
Two of the toughest opponents for the team were Kenosha Tremper and Racine Park. They defeated Park and easily crushed Bay View. First year senior Jim Gorecki stated that, "Bay View was one of the easier teams. We beat them 32-15."

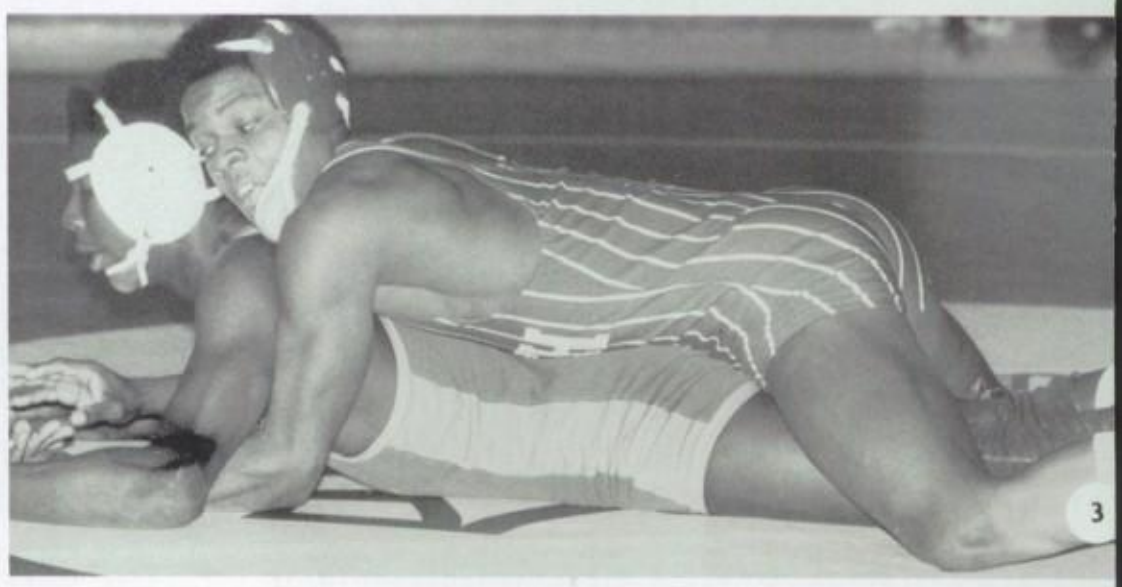
Merrit Coombs and Scott Budnowski, who had helped the team greatly, were voted as the two most improved wrestlers for the season. "With the wrestlers that we have this year, I could say that I am very happy," commented Coach Kostrivas.

"One of the draw backs of the team was the inexperience of the underclassmen. We took the team for granted too soon. With the help of the alumni and Leroy Cockroft, the J.V. coach, the team was able to improve themselves," commented Jim Wierzelewski.

Steve Knurowski also added, "Coach Kostrivas didn't expect more from you than you could handle. He took time out for you."

"The team deserves credit for their hard work and dedication for all that they had put into the season," concluded Jim Wierzelewski.





1. *Robert Cargile* helps out his team by bringing in another victory.
2. *Front Row:* D. Morales, S. Bornowski, R. Parker, S. Angeles, R. Cargile, M. Crumble, M. Newman, D. Pope, D. Abad. *Back Row:* C. Williams, O. Blockman, M. Cockroft, D. Korducki, J. Wierzelewski, J. Gorecki, S. Knurowski, Coach Kostrivaz.
3. *Pinning his opponent to the floor,* Ottis Blockman takes control of the match.

CROSSCOUNTRY

TECHS 2-MAN VARSITY

Graduation and jobs robbed Tech's Cross Country team of most of its experienced runners, leaving 1st year Coach Keiley with a 2 man varsity team.

Most of last year's varsity team graduated with the class of '82 last spring, while many juniors from the '82 team dropped cross country in favor of jobs, leaving Tech extremely low in varsity running experience.

Since most cross country meets require a 5 man team, Tech really didn't have a varsity team. Instead of promoting junior runners to varsity, Coach Keiley retained a strong J.V. team, sacrificing the varsity squad so the younger runners could gain experience. This J.V. team placed well at several meets, taking 5th place in the City Meet.

The 2 varsity runners, Seniors Dave Zinky and Jerry Glazewski, still ran at 8 meets, including the Milwaukee Area Conference meet, where Dave placed 22nd.

"Next year will be a big improvement because we have some good young runners coming up," noted Coach Keiley.

1. *Bottom Row:* K. Mcdermott, C. Knueppel, M. Moran, K. Schroeder, R. Schuman. *Top Row:* Coach Keiley, M. Hammar, S. Pedersen, D. Zinky, P. Walesa, G. Glazewski, R. Bolze.
2. *Although tired,* Mark Lemmer really pushes the last mile in the three mile run.

ARTISAN INC.

Putting together and selling a yearbook presents quite a challenge to the Artisan staff, the Business staff, and the Photo club each year.

Over 40 students make up the Artisan staff, which puts out Tech's yearbook. These students, after taking a special class taught by Ms. Mihm, yearbook advisor, design, organize, and assemble the 200 page book. These young journalists must choose pictures, write captions, find interesting stories, and put it all together using a theme, or central idea, which runs throughout the book. Led by a group of over 10 editors, the staff manages to turn out an award-winning book each year. "Not many people realize how much work goes into each page of the book, for every page must be designed and worked on individually," commented senior David Meer, co-editor in chief.

The business staff must not only sell the yearbooks to the students, they must also raise money for the book's production through fund raisers and advertisement sales. Ms. Anderson, who recently took on the job of Business Staff advisor, heads a group of 12 students in charge of all the business needs of the book.

The Photo Club also plays an important role in putting out the Artisan. Several members of the club take, develop, and print many of the pictures which appear throughout the yearbook. These photographs try to capture the life and happenings of Milwaukee Tech on film, a job not easily accomplished. "Without the help of the Photo Department, which covers some of the last minute printing expenses, the yearbook would never be," commented junior Bill Lewandowski, a yearbook photographer.

Leslie Pietraszewski and Debbie Sargeant contemplate the mysteries of yearbook layout, as Debbie explains the type of artwork she needs for the underclass section.

NEW EXPERIENCES

While the Chess Club gained a new adviser and some new freshmen talent, the German Club continued to experience the German culture, and the Iron Mine added new equipment to help keep Tech's athletes the best in the conference.

Not only did the Chess Club start the year with a new adviser, Mr. Cohen, they also gained Eddie Patton, known as the "Fearless Freshman." Eddie, the only freshman member of Tech's undefeated J.V. team, got his nickname from Mr. Cohen, because he is "willing to challenge anyone to a game of chess." During Tech's varsity matches Eddie often plays the opposing team's coach. So far, he has won all but one of these matches.

Meanwhile, the German club continues to participate in many varied activities while learning about German culture. Not only does the 10 member club meet regularly to discuss German customs, they also attend the Folk Fair at Mecca, hold a Christmas dinner at Mader's, and have a German style picnic in the spring. "Even though its a small group, we still have fun," commented Mr. Treu, adviser to the club.

And Tech's Iron Mine expanded by adding a leg-extension, 2-50 pound dumbbells, and a crossover pulley machine to a weightroom which "is better equipped than most colleges" according to Mr. Pagel. This, and other equipment, attracts athletes from every Tech sport, who lift weights year round to keep in shape.

JUNIOR-SENIOR STUDENT COUNCIL

DECISION MAKERS

Many decisions must be made in the course of a school year, and the Student Council, Senior Council, and Human Relations often must help in making these decisions.

The Student Council allows Students of all levels to participate in the running of Tech, giving them experience in democratic government as well as helping Tech to solve many of it's problems. One person from each homeroom, elected by the members of the homeroom, attends the Student Council meetings, where current events, including parties, dances, and open houses, are discussed and planned. "I think the Student Council is good because it lets students help with the decisions of the school," noted Candy Brzezinski, a Student Council member.

Similarly, the Senior Council meets to discuss, plan, and run special events for the Senior class, including Senior Breakfast, Prom, the Senior Class trip, and Graduation. Not only does this give students practical experience in organizing and running events, it also allows student input into school activities.

The Human Relations group also organizes student activities, but it tries to deal with the personal side of such gatherings. "In Human Relations, we try to make students feel good about going to Tech," commented Deadra Browder, a Human Relations member.

Kelli Pettis, bag lady of Human Relations, works on snow flakes in 280.

TECH: SCHOOL +

Many students at Tech take advantage of the programs and activities which make our school more than just a place to learn. I.C.E., O.J.T. and Intramural Bowling each add a different aspect to the learning experience at Milwaukee Tech.

The I.C.E. (Industrial Cooperative Education) program helps seniors from Tech's many shop areas gain first-hand experience in the industrial world by helping them to find jobs. The program allows students to operate on a half-day schedule; in the morning they attend classes and in the afternoon they work. "I.C.E. offers more than just a job, it offers experience. But in order to get that experience, one must first find a job, which, in this year of recession, is not easy to do," commented Bill Rouleau, a senior in Electric shop who has applied for a job with Seiman Allis, a division of Allis Chalmers.

Similarly, the O.J.T. (on-the-job training) program offers students from the Industrial Office Education shop a chance to gain knowledge about office related careers, including Accounting, Data Processing, Administrative Management and Secretarial positions. By familiarizing the students with certain aspects of the business world, O.J.T. allows them to set their future career goals and become dependable workers.

Tech's intramural bowling league also adjusts students to life beyond high school by helping participants to develop team spirit and pride in accomplishments. The league runs every Tuesday at 3:30 at Southview Lanes on 13th and Mitchell. For only $1.65 a week, Tech students compete for team and individual prizes. Since the scoring is handicapped, everyone has a chance to win. "It's tiring at times, but I still enjoy it," commented Mr. Thomas, who supervises the league.

VARSITY CHEERLEADERS

TROJAN SPIRIT

Although the new rules for extracurricular participation and lack of dedication forced several members of Tech's cheerleading squad to resign, the girls managed to hang together and keep the Trojan spirit going.

Under the direction of a new coach, Ms. Walker, the cheerleading squad of 11 girls looked forward to a promising year in 82'-83' in September. "Due to the new grade requirements, some of the girls decided to quit," commented senior Tanja Stewart. "This was only one of the problems the squad faced. Lack of dedication and organization cost the squad more girls. And a lack of fan support was often discouraging." The girls, despite their problems, managed to lead Tech fans in cheering on the football team and the basketball team. "The lack of fan support really dimmed our spirits," noted Junior Sharon Nowak, "but we stuck together and pulled through."

Pompon
Row 1: M. Petzel; A. Drewek; N. Gilmore; S. Aranda; M. Perkins; D. Wilson; K. Brown; *Row 2:* R. Padron; A. Smith; N. Repetti; K. Laast; R. LaFleur; A. Barbee; W. Pero; C. Braxton; *Row 3:* M. Kopp; S. Szweda; D. Sproles; A. Hooper; D. Powell; Y. Moore; C. McCollum.

A tense moment in Tech's Homecoming game was seen in the face of Yvonda Moore.

"If I don't look down, I'll never see that purple mouse crawling over my foot," thinks Jeannie Brahm.

Members of Tech's pom-pon squad work on a new routine during practice.

For the pom-pon squad, there's no such thing as taking a break.

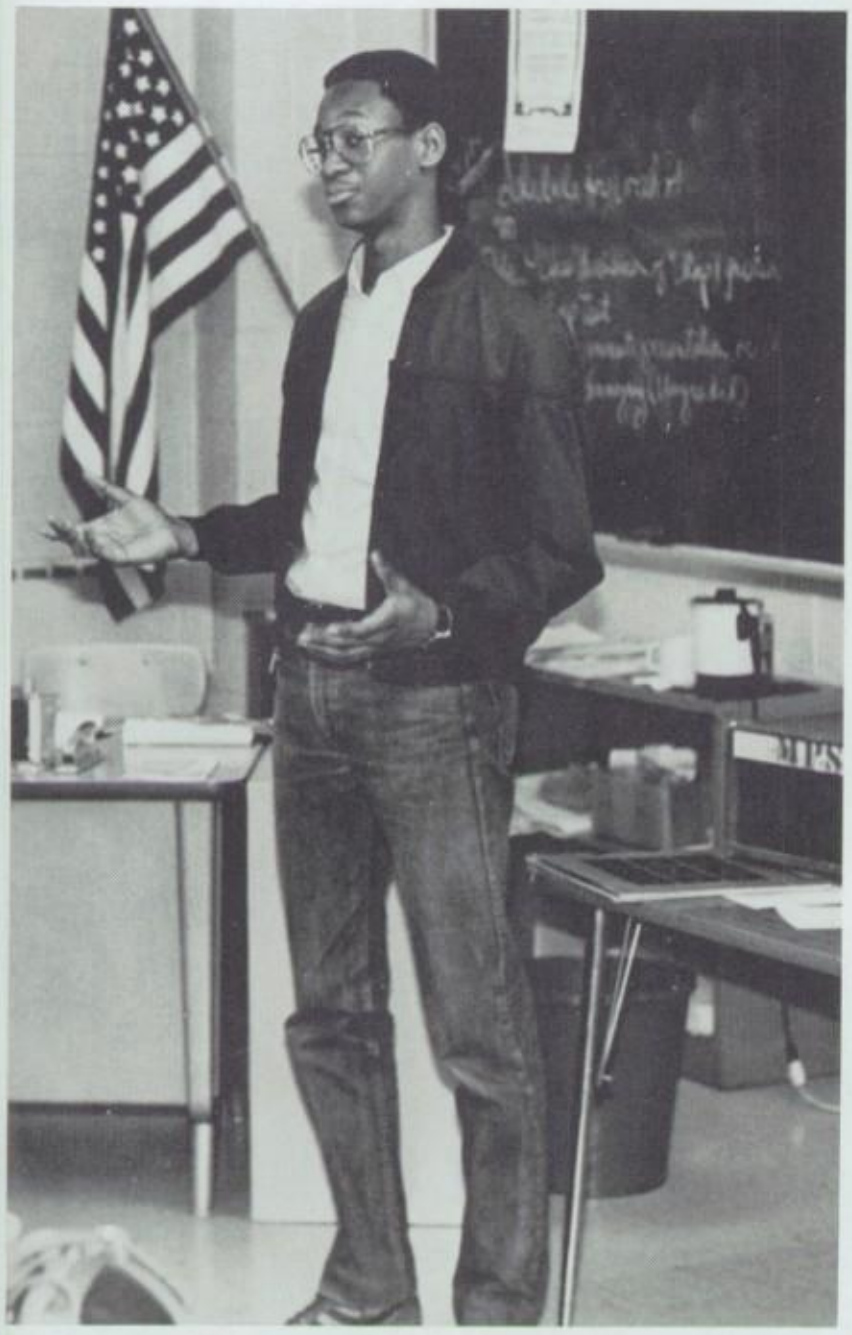
"*Honest man!* I ain't done nothin'!" exclaims Eric Riser



COMMUNICATORS

Two Tech organizations, the *Craftsman* newspaper staff, and the Debate Team, help students to expand and develop their ability to communicate. The Craftsman staff reorganized this year as the Debate Team hosted the Allen-Bradley/Milwaukee Tech Debate Tournament.

The *Craftsman* staff, under the direction of the new adviser, Ms. Meyer, regrouped not only by changing the format of the paper but also by changing the functions of staff members at regular intervals. "There is much more organization on the paper this year compared to other years," commented Scott Castelez, a member of the staff. Pete Budney, another reporter for the *Craftsman,* added, "This year's paper is better because Ms. Meyer changes each staff member's position for each edition, so people learn more because they get to work in different areas."

Although Ms. Meyer officially took over in September, she began work on the September issue last February. The paper underwent a few more changes, including being printed outside of Tech for the first time. Also, a new *Craftsman* class, composed of students chosen by Ms. Meyer for their enthusiasm and writing ability, gave the people involved in putting out the paper time to work and a chance to learn about journalism techniques.

Tech's Debate team not only hosted the annual Allen-Bradley/Milwaukee Tech Debate Tournament, but also placed. The Junior Varsity team of John Roth, Jim Rahfaldt, Brad Montgomery, and Eric Riser captured 2nd place, earning one of the many trophies, medals, and certificates donated by Allen-Bradley. Over 95 teams from 35 schools competed in the three divisions of Debate: varsity, junior varsity, and novice.

Allen-Bradley began sponsoring the event when Dr. Lee McMurrin, superintendent of schools, developed the partnership between schools and industry 4 years ago. Mr. Angeli, adviser for the Debate team, convinced Allen-Bradley to sponsor the tournament, considered to be one of the best competitions in the State.

Craftsman: A. Drewek, K. Pettis, T. Stewart, C. Ward, K. Klusman, *Row 2:* J. Beck, D. Potega, R. LaFluer, N. Kurtz, J. Braham, M. Prochniewski, *Row 3:* T. Farber, C. Hodder, R. Jackson, K. JROTC

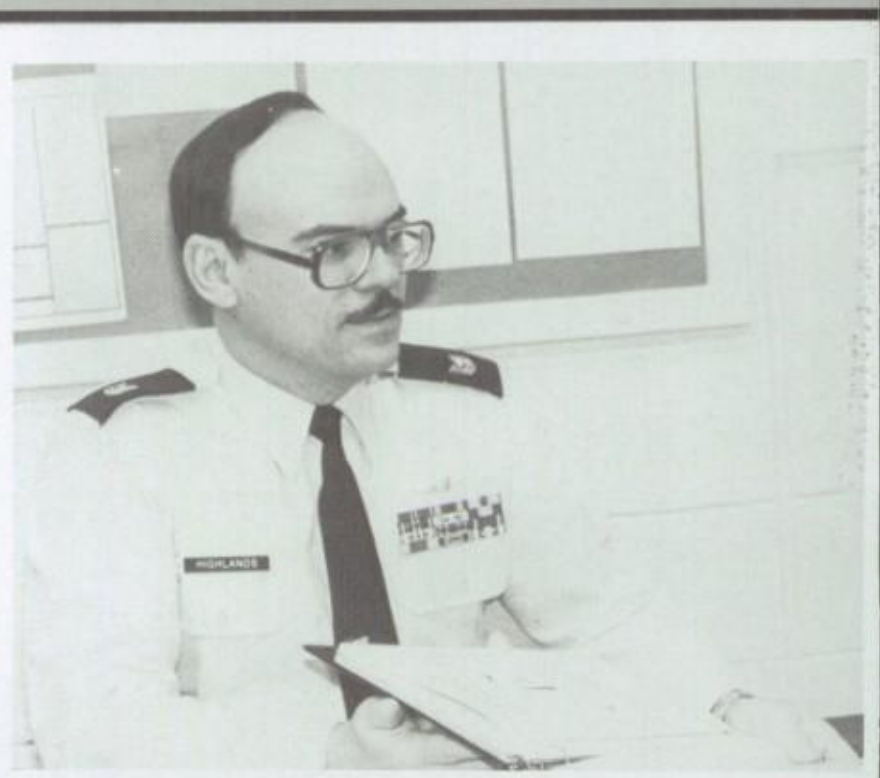
NEW BLOOD

Both Tech's Rifle Club and JROTC gained important new personnel this year, helping these clubs achieve their goals.

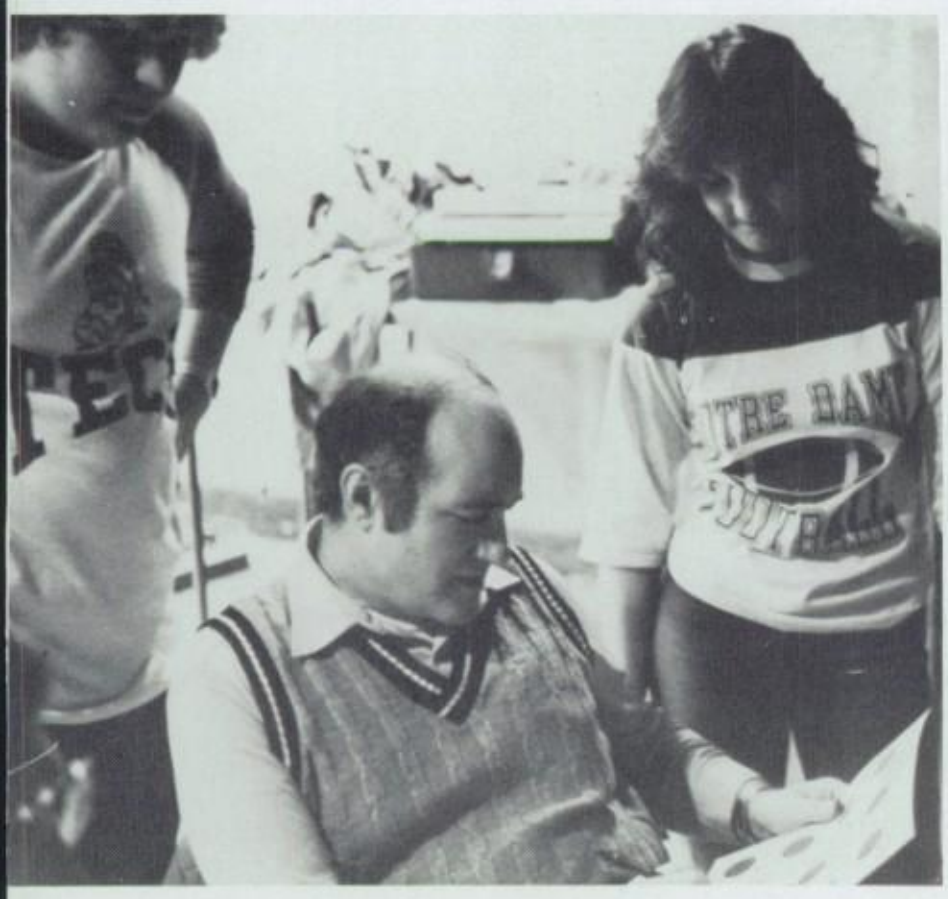
Sergeant Highlands, an Air Force retiree, joined Major Florow in teaching JROTC classes at Tech. Sergeant Highlands, who teaches military customs, ceremonies, courtesies, leadership, management fundamentals, and communications came to Tech because of the retirement of Sergeant Evans last year. Sergeant Highlands believes the JROTC program is "an excellent vehicle for importing military values of responsibility, honor, and patriotism to young adults."

"I accepted my post at Tech because Tech has a high and readily visible standard of education and discipline. I only regret not coming here sooner," commented Sergeant Highlands.

Many new freshman, including Wendy Roehl, Leonard Wilson, Bryan Bystrzycki, and David Grebe, helped the Rifle Team rebuild after the 1982 season. Wendy, the only girl on the team, lead the pack in scoring, even though she only began shooting in the fall of 1982. Wendy, who currently shoots from the sitting or prone positions, scores hits on the 1/16 inch diameter bullseye from 50 ft. away regularly. "Girls are easier to coach because they usually come with no experience so they don't have any bad shooting habits," commented Mr. Towne, who coaches the freshman team. All the freshman practiced for the March Sports Show Event, a statewide competition.



ROTC: P. Robinson; M. Rossa; J. Slack; M. Small; P. Sontag; S. Stringer; R. Trevisan; D. Turner; R. Yancey; A. Aranda; T. Blackwood; J. Boradnax; D. Brown; J. Cieslak; M. Flecha; T. Froemming; T. Geurtsen; K. Grams; G. Habeck; T. Hooks; T. Jackson; V. Jackson; D. Parker; G. Parker; V. Perine; P. Salazar; R. Sullivan; S. Thompson; J. Villwock; D. Walters; W. White; A. Williams; K. Williams; M. Winter; K. Berger; B. Castro; T. Davis; A. Dodd; R. Fleck; P. Grabowski; R. Green; M. Hardy; L. Harris; L. Hernandez; M. LaPointe; K. McDermott; J. Nick; T. Nowak; A. Reeves; P. Rollins; Y. Shin; K. Talbert; K. Washington; B. Winski; B. Bowen; P. Boyce; J. Cole; T. Dnaiels; D. Edwards; C. Gonzalez; G. Krueger; R. Michalski; C. Mitchell; E. Ray; K. Roberts; C. Slocumb; S. Stone.



A steady arm and good eyes are a necessity for rifle club member Jeff Novack.
A newcomer to the JROTC staff, Sergeant Highland, heads the program with Maj. Florow.
Rifle Club advisor, Mr. Towne, explains accuracy to Wendy Roehl.
"*JROTC* HONOR SQUAD" is ready for anything!
JROTC adviser, Major Florow does the paperwork that is part of his job.

At first glance they look like they don't belong together. But if you look closely, you'll see that they're worn by someone who wears two hats . . . or shoes.

Most days he's an ambitious college student, studying hard and working for his future.

A few days a year he puts his other foot forward as a member of the Wisconsin National Guard.

Those few days a year really pay off . . . with a regular monthly paycheck and tuition assistance that pays for a good share of his college tuition-as much as $1000 each year for four years.

WISCONSIN NATIONAL GUARD

Put your best foot forward. Call today, toll free, and learn how the Wisconsin National Guard can help you get in step with great experiences and benefits.

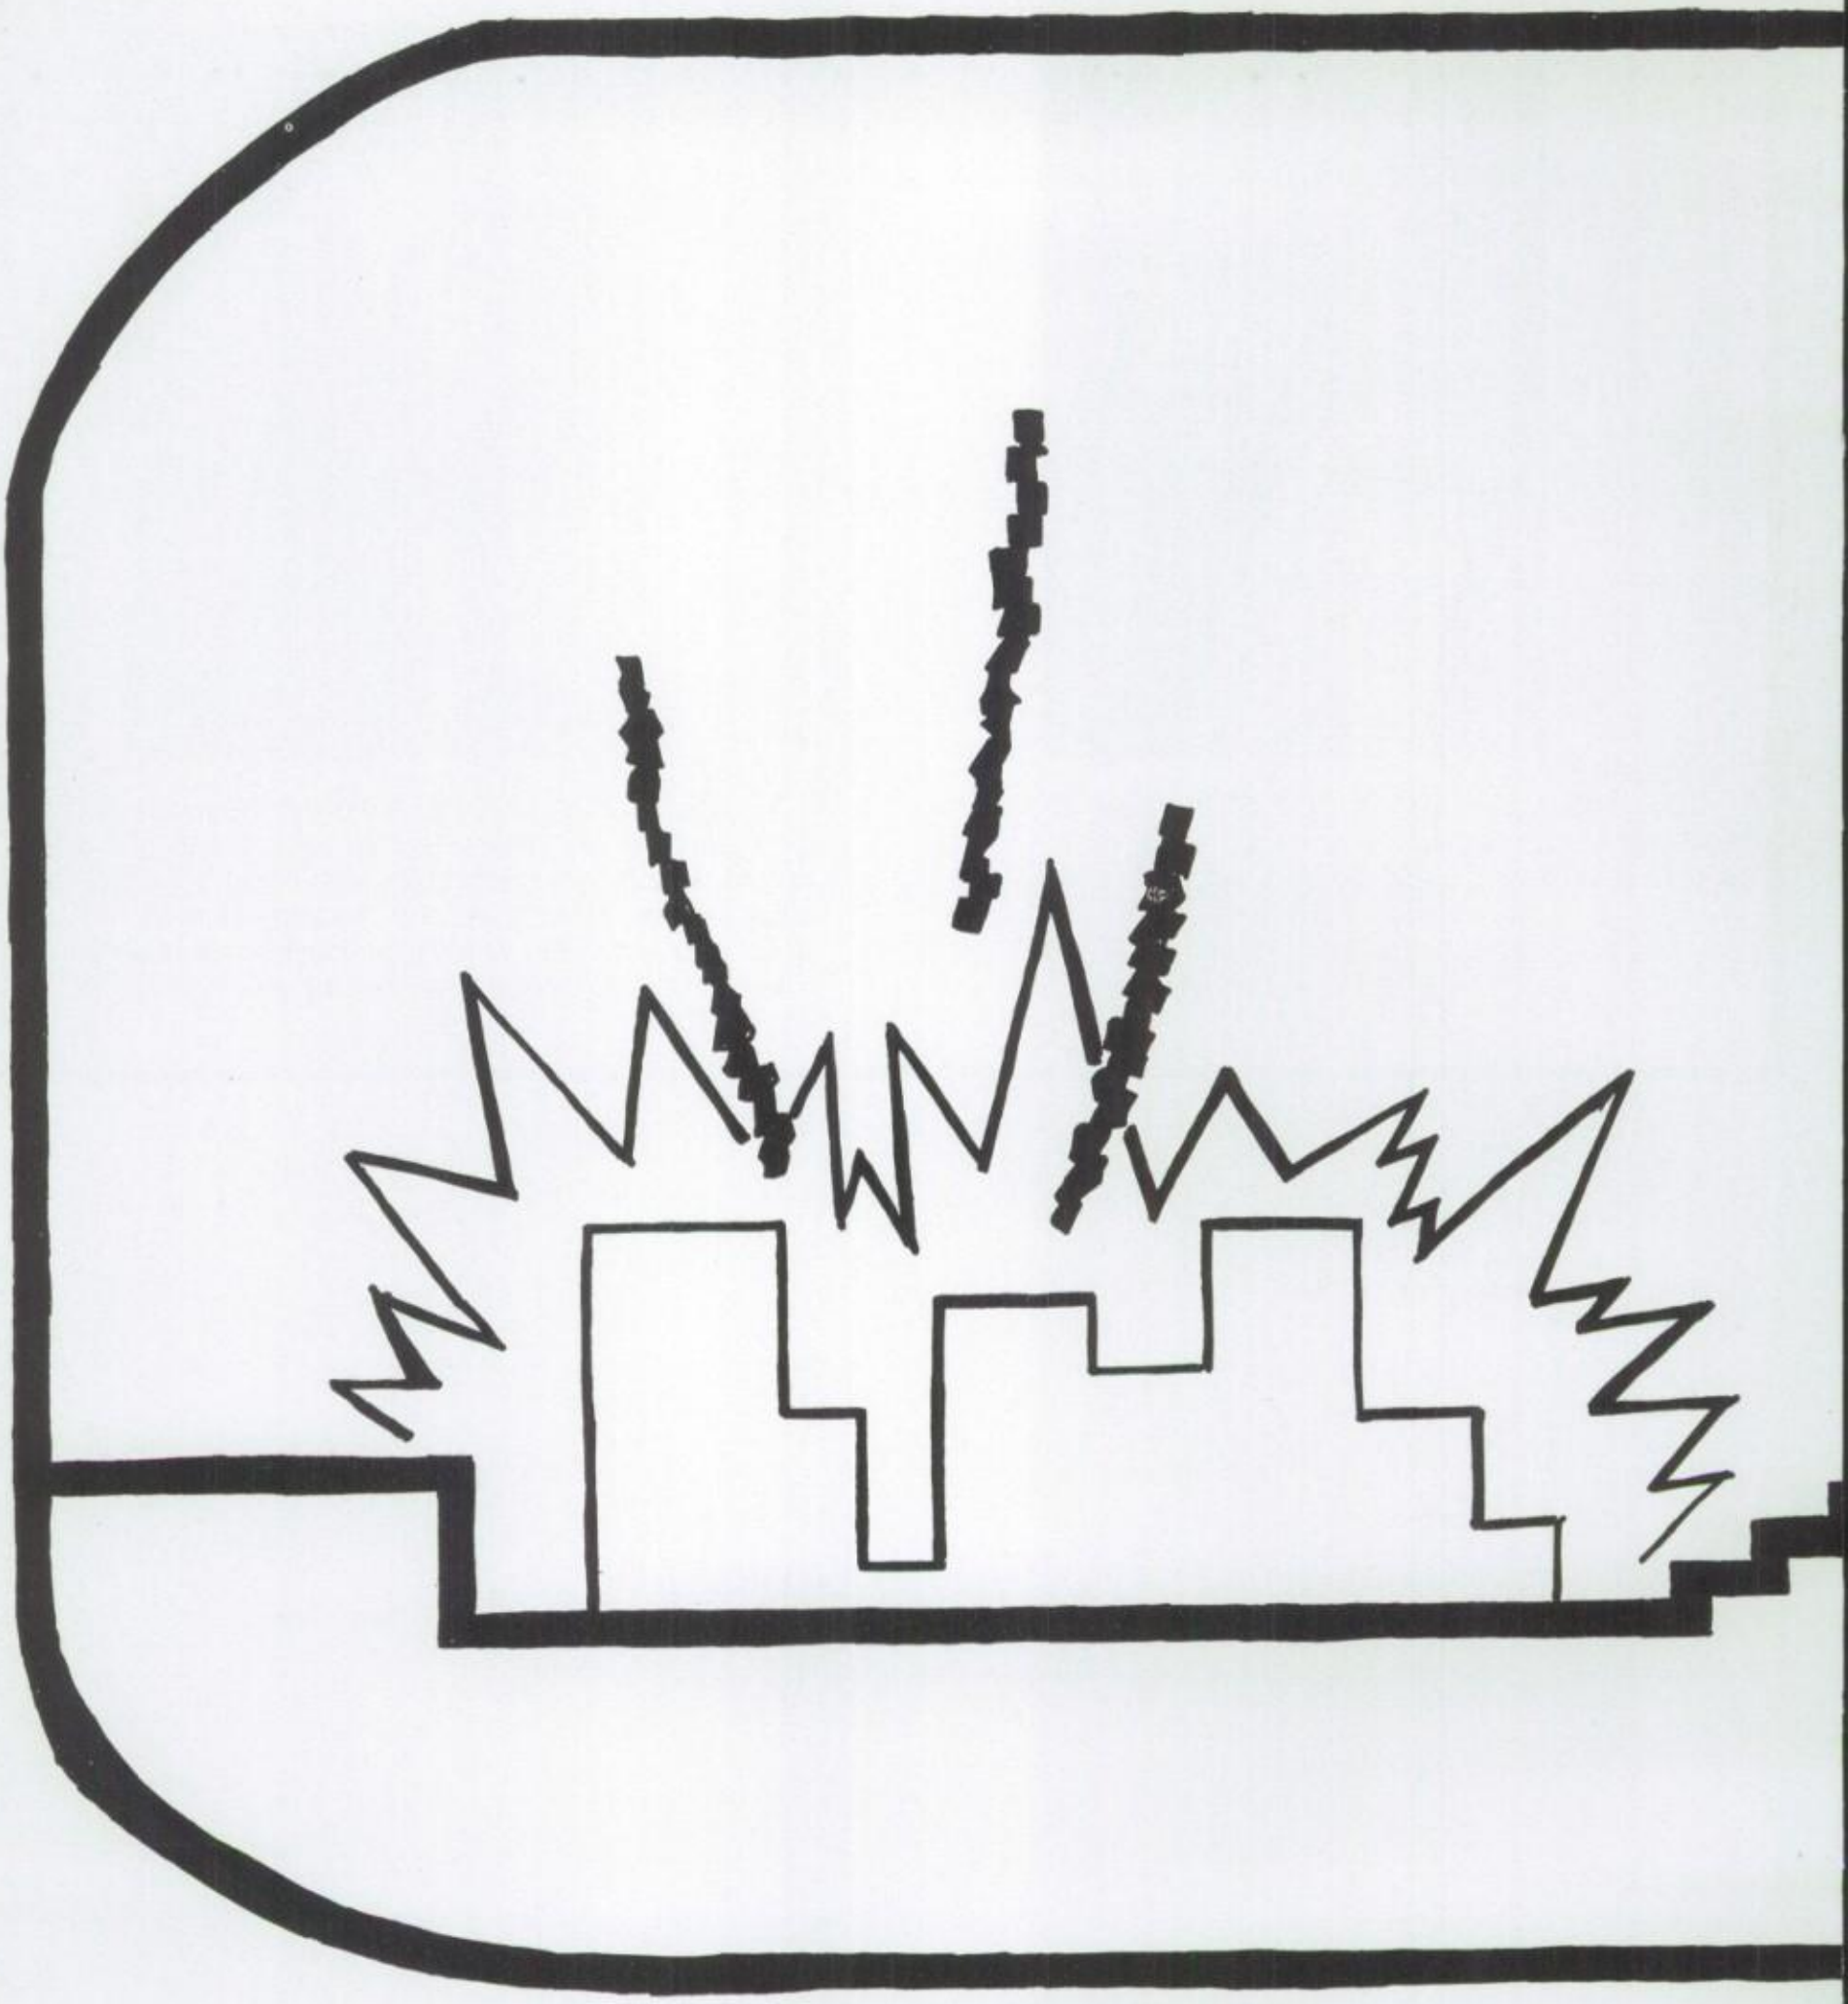
PHOTOGRAPHY BY CILENTO

"The Image Makers."

Troy, Today is the first day of the rest of your life. Nothing is impossible if you really want it! Love, Mom, Floyd, Holly, Jim, Chuck, Teresa, and the Little Ones.

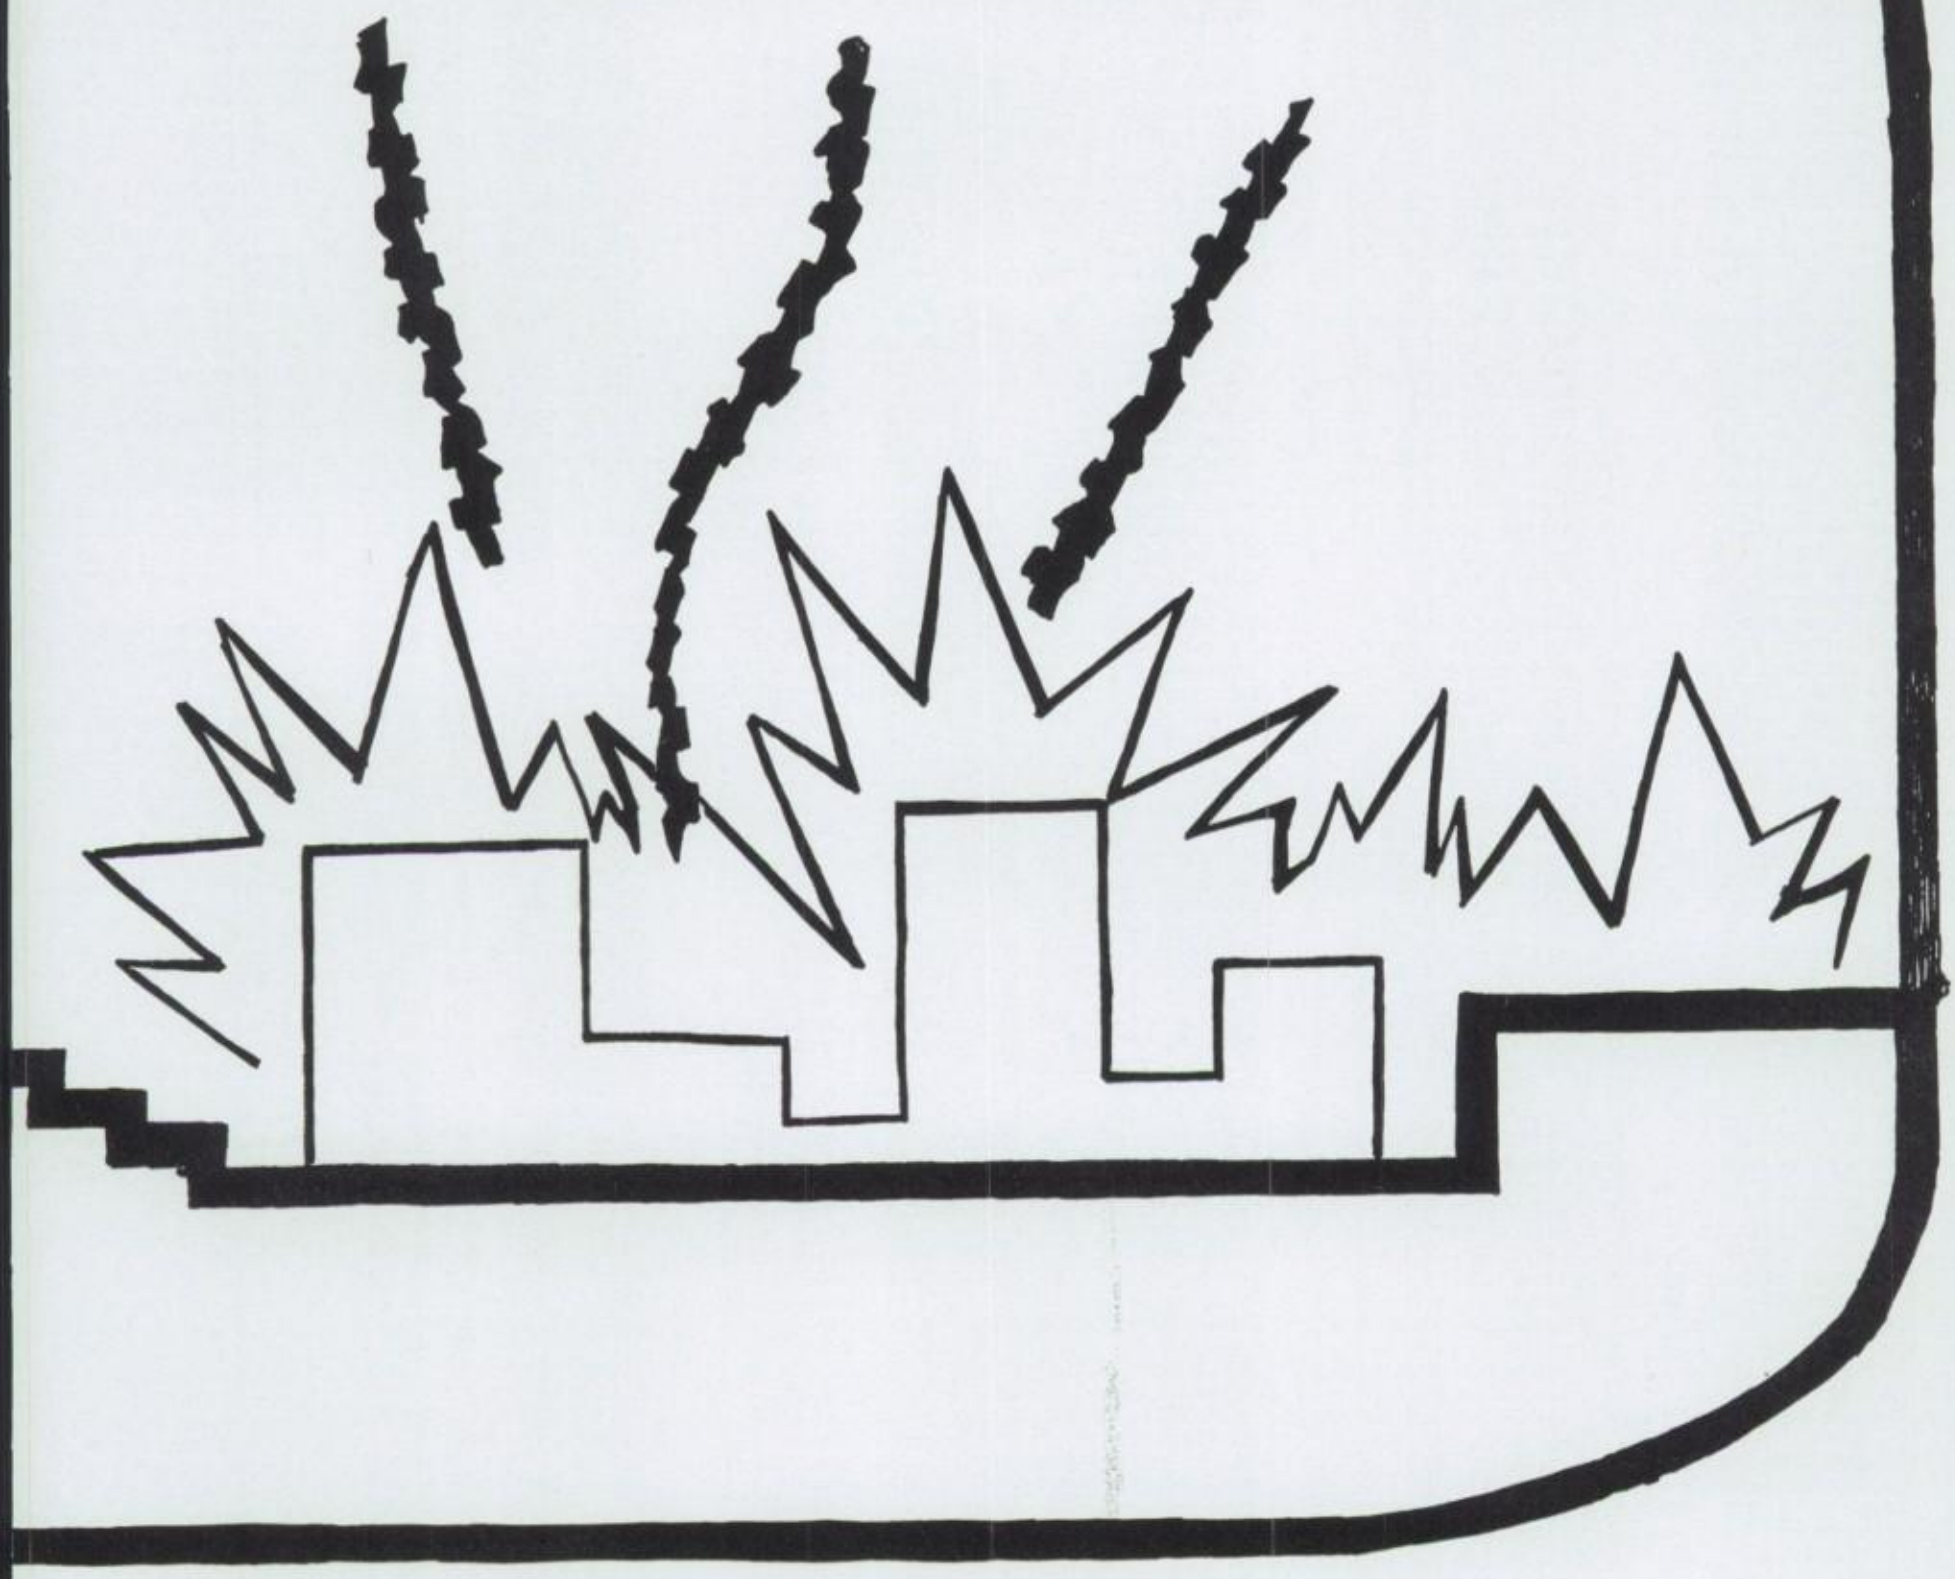
"To laugh often and much; to win the respect of intelligent people and the affection of children; to earn the appreciation of honest critics and endure the betrayal of false friends; to appreciate beauty, to find the best in others; to leave the world a bit better because you have lived. This is to have succeeded." Go with God, Ann. Love MOM



Just as every video game comes to an end in a flash of colored graphics and a blast of electronic sound when the quarters and the luck stop flowing, so Artisan '83 end.

But the thrill of achieving new high scores, reaching farther into the mind of the game never fades. And, of course, those who work the hardest, practice the most, and do their best always have a chance to record their name among the high scores, often more than once. Artisan '83 also serves this purpose, recognizing those people who worked harder at the game.

THE END



Let's not forget the designers of the game, the people whose ideas gave the video spectacle life and breath, the artists who created the sound effects and graphics, giving substance to the ideas, and the technicians who put it all together, making the game work while keeping the cost down.

The most important people of all, however, in the life of the video game are the players, the video game addicts, the people who enjoy the challenge and the memories of playing and winning Artisan '83.

LOST TROJAN

On November 30, 1982, Jeff Spottek was accidentally shot and killed while cleaning his father's service revolver. Jeff, a sophomore enrolled in the Electric Trade Shop, also participated in Debate as a member of Tech's Novice Debate Team.

According to most of his teachers, Jeff, a well-mannered, polite, and quiet student, did above average work. "Everyone was shocked at what happened," commented his drafting teacher, Mr. Birkholz.

Death, be not proud, though some have called
thee
Mighty and dreadful, for thou art not so;
For those whom thou think'st thou dost overthrow
Die not, poor Death; nor yet canst thou kill me.
From rest and sleep, which but thy pictures be,
Much pleasure; then from thee much more must
flow;
And soonest our best men with thee do go-
Rest of their bones and souls delivery!
Thou'rt slave to fate, chance, kings, and desperate
men,
And dost with poison, war, and sickness dwell;
And poppy or charms can make us sleep as well
And better than thy stroke. Why swell'st thou then?
One short sleep past, we wake eternally,
And Death shall be no more: Death thou shalt die.

-John Donne-

SPECIAL THANKS TO:

Mr. Gary Byrne and Dee Cordell for their technical advice and assistance.

Mr. Thomas Schwalbach for his aide to the artists.

Mr. Dick Lithgow and the Photo Club for tons of last minute pictures and prints.

Mr. Tony Cilento and Mr. David Leer for their professional pictorial coverage of many Tech people and events.

Mrs. Anderson and the Business Staff for marketing the book.

The members of the Artisan Class for their many good ideas and their excellent coverage of school events.

COLOPHON

Josten's American Yearbook Co. printed 1400 copies of the 1983 Artisan at the plant in Topeka, Kansas, using gloss-191 paper and a true life cover.

The 1982 Artisan received a 1st place rating from Columbia Scholastic Press Association, earning an All-Columbian Award for advertising, community coverage, and cover.

The 1982 Artisan also earned a 1st place rating from the American Scholastic Press Association.

SPECIAL EDITION

WE'RE NO. 1 !!

The State Class A boys' basketball title returned to Tech on April 19, 1983.

Tech finished the season with a 19-3 record under Coach Win Parkinson. After capturing the Regional title by defeating South and Bay View, the Trojans outclassed Franklin and outlasted Racine Horlick 66-63 to win the State Sectionals, earning their 1st State tournament berth since 1979.

Opening against Middleton, Tech jumped out to a quick lead, and coasted to an easy 51-30 victory.

Next, Tech faced a tough, tall Green Bay West team without their injured center Percy Eddie. After trailing through the 1st half, the Trojans rallied to a 22-22 tie. Led by point guard Darryl Terry, relief center Fred Bobo, and MAC most valuable player forward Greg Leach, the Trojans regrouped in the 2nd half, taking advantage of their speed to overcome the height disadvantage. Leach scored 27 points and Terry had 15 and a few key steals in the 56-46 victory.

Percy Eddie returned to the lineup for the championship game against Watertown. With Eddie controlling the middle, Terry showing his ball handling and shooting skills, and Leach finding enough openings inside for 22 points in the game, the Trojans jumped out to a 9 point lead in the 1st quarter. The Watertown Goslings came back to 30-29 at the half.

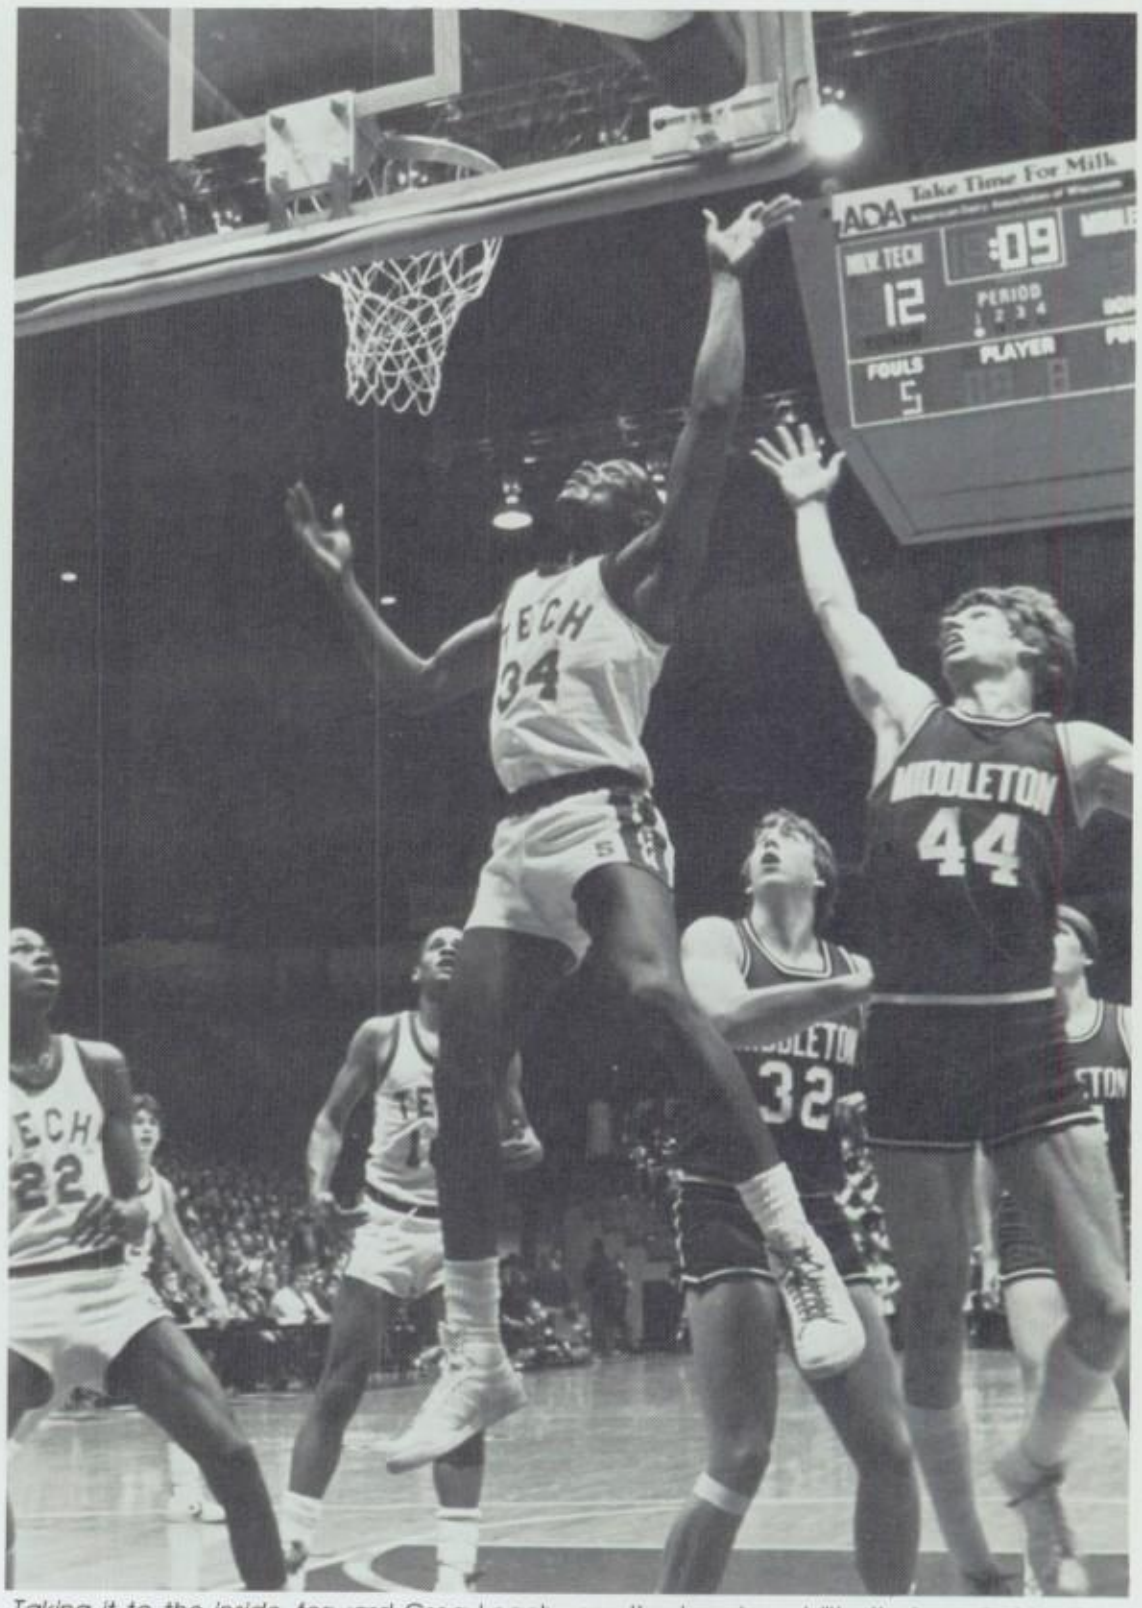
After the intermission, the Goslings, led by forward Bob Nass, continued to drive, leading at one point 35-34. Tech, however, surged back, scoring 8 straight behind some outside shooting by Eddie to lead 43-35 in the third quarter. After that, Leach and Terry took control, eventually steering Tech to a 62-54 victory.

Darryl Terry lofts a shot from the key, easily outjumping two Middleton players, as Fred Bobo looks on.

Showing the strength of Tech's full-court press, Greg Leach, Darryl Terry, and Merv waukau pressure a Watertown player in the championship game.

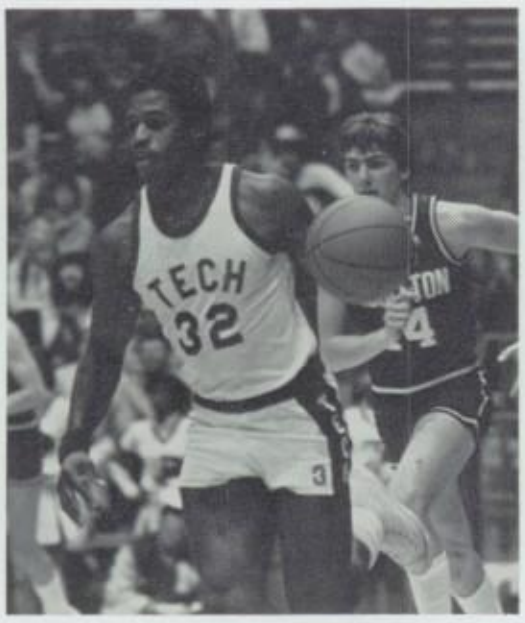
TOURNAMENT SUPPLEMENT

Forward Merv Waukau takes a shot from the corner in the tournament championship.

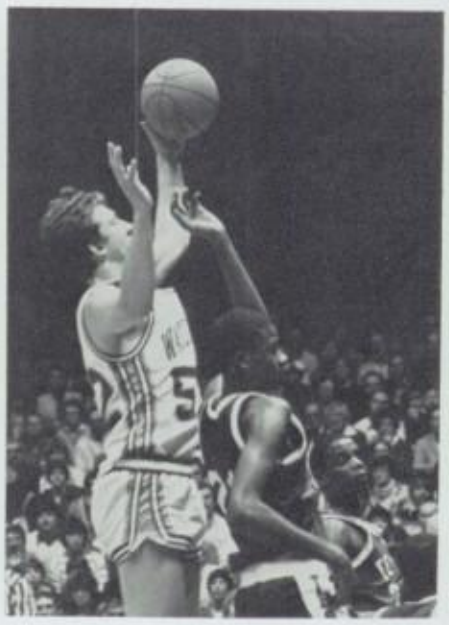


Taking it to the inside, forward Greg Leach uses the jumping ability that made him the highest overall scorer for the tournament.

Guard Shaun Hickman, the only junior starter on the team, brings the ball down court against Watertown.



In a foot race with several Middleton players, junior Fred Bobo shows his ball handling ability.



The "Big Man", center Percy Eddie, non-chalantly attempts to block the shot.

Firing the ball away, Guard Mike Stachowiak keeps Tech's offense moving.

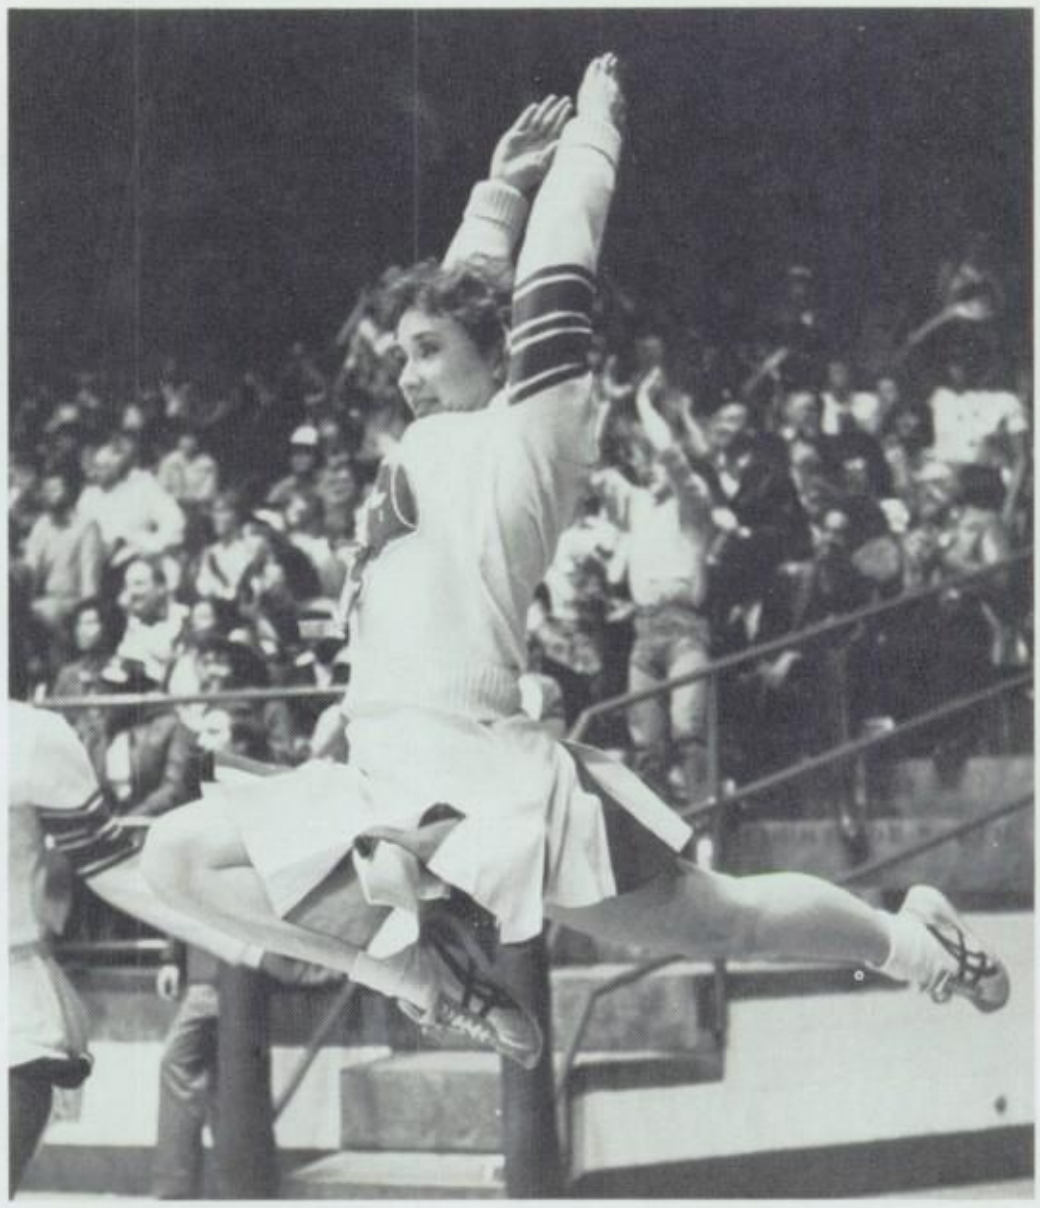
Led by Mr. Simiele, Tech's band blasts out one of the songs that kept the stands shaking and the Trojans winning throughout the tournament.

Tech's cheerleaders keep the Trojan spirit alive during a break in the action in the Championship Game.

With a precision earned by hours of practice, the Pom-Pon Squad entertains the fans during halftime with one of its routines.

Tech students show that they know who's No. 1.

Reacting to another Tech basket, Debbie Sproles shows the spirit that made her a Pom-Pon girl.



Jeannie Brahm gives her all, encouraging the Tech team to victory.

Pointing out an errant call to the referee, coaches Parkinson and Borowicz express their feelings during the final game.
